

PROGRESS AND FUTURE PROSPECTS OF MACHINE READING COMPREHENSION

YIMING CUI

JOINT LABORATORY OF HIT AND iFLYTEK RESEARCH (HFL), CHINA

NOVEMBER 13TH, 2017

OUTLINE

- Introduction to Machine Reading Comprehension (MRC)
- (Almost) Recent Progress of MRC
 - Cloze-style MRC
 - Complex MRC
- Future Prospects
- Conclusion

OUTLINE

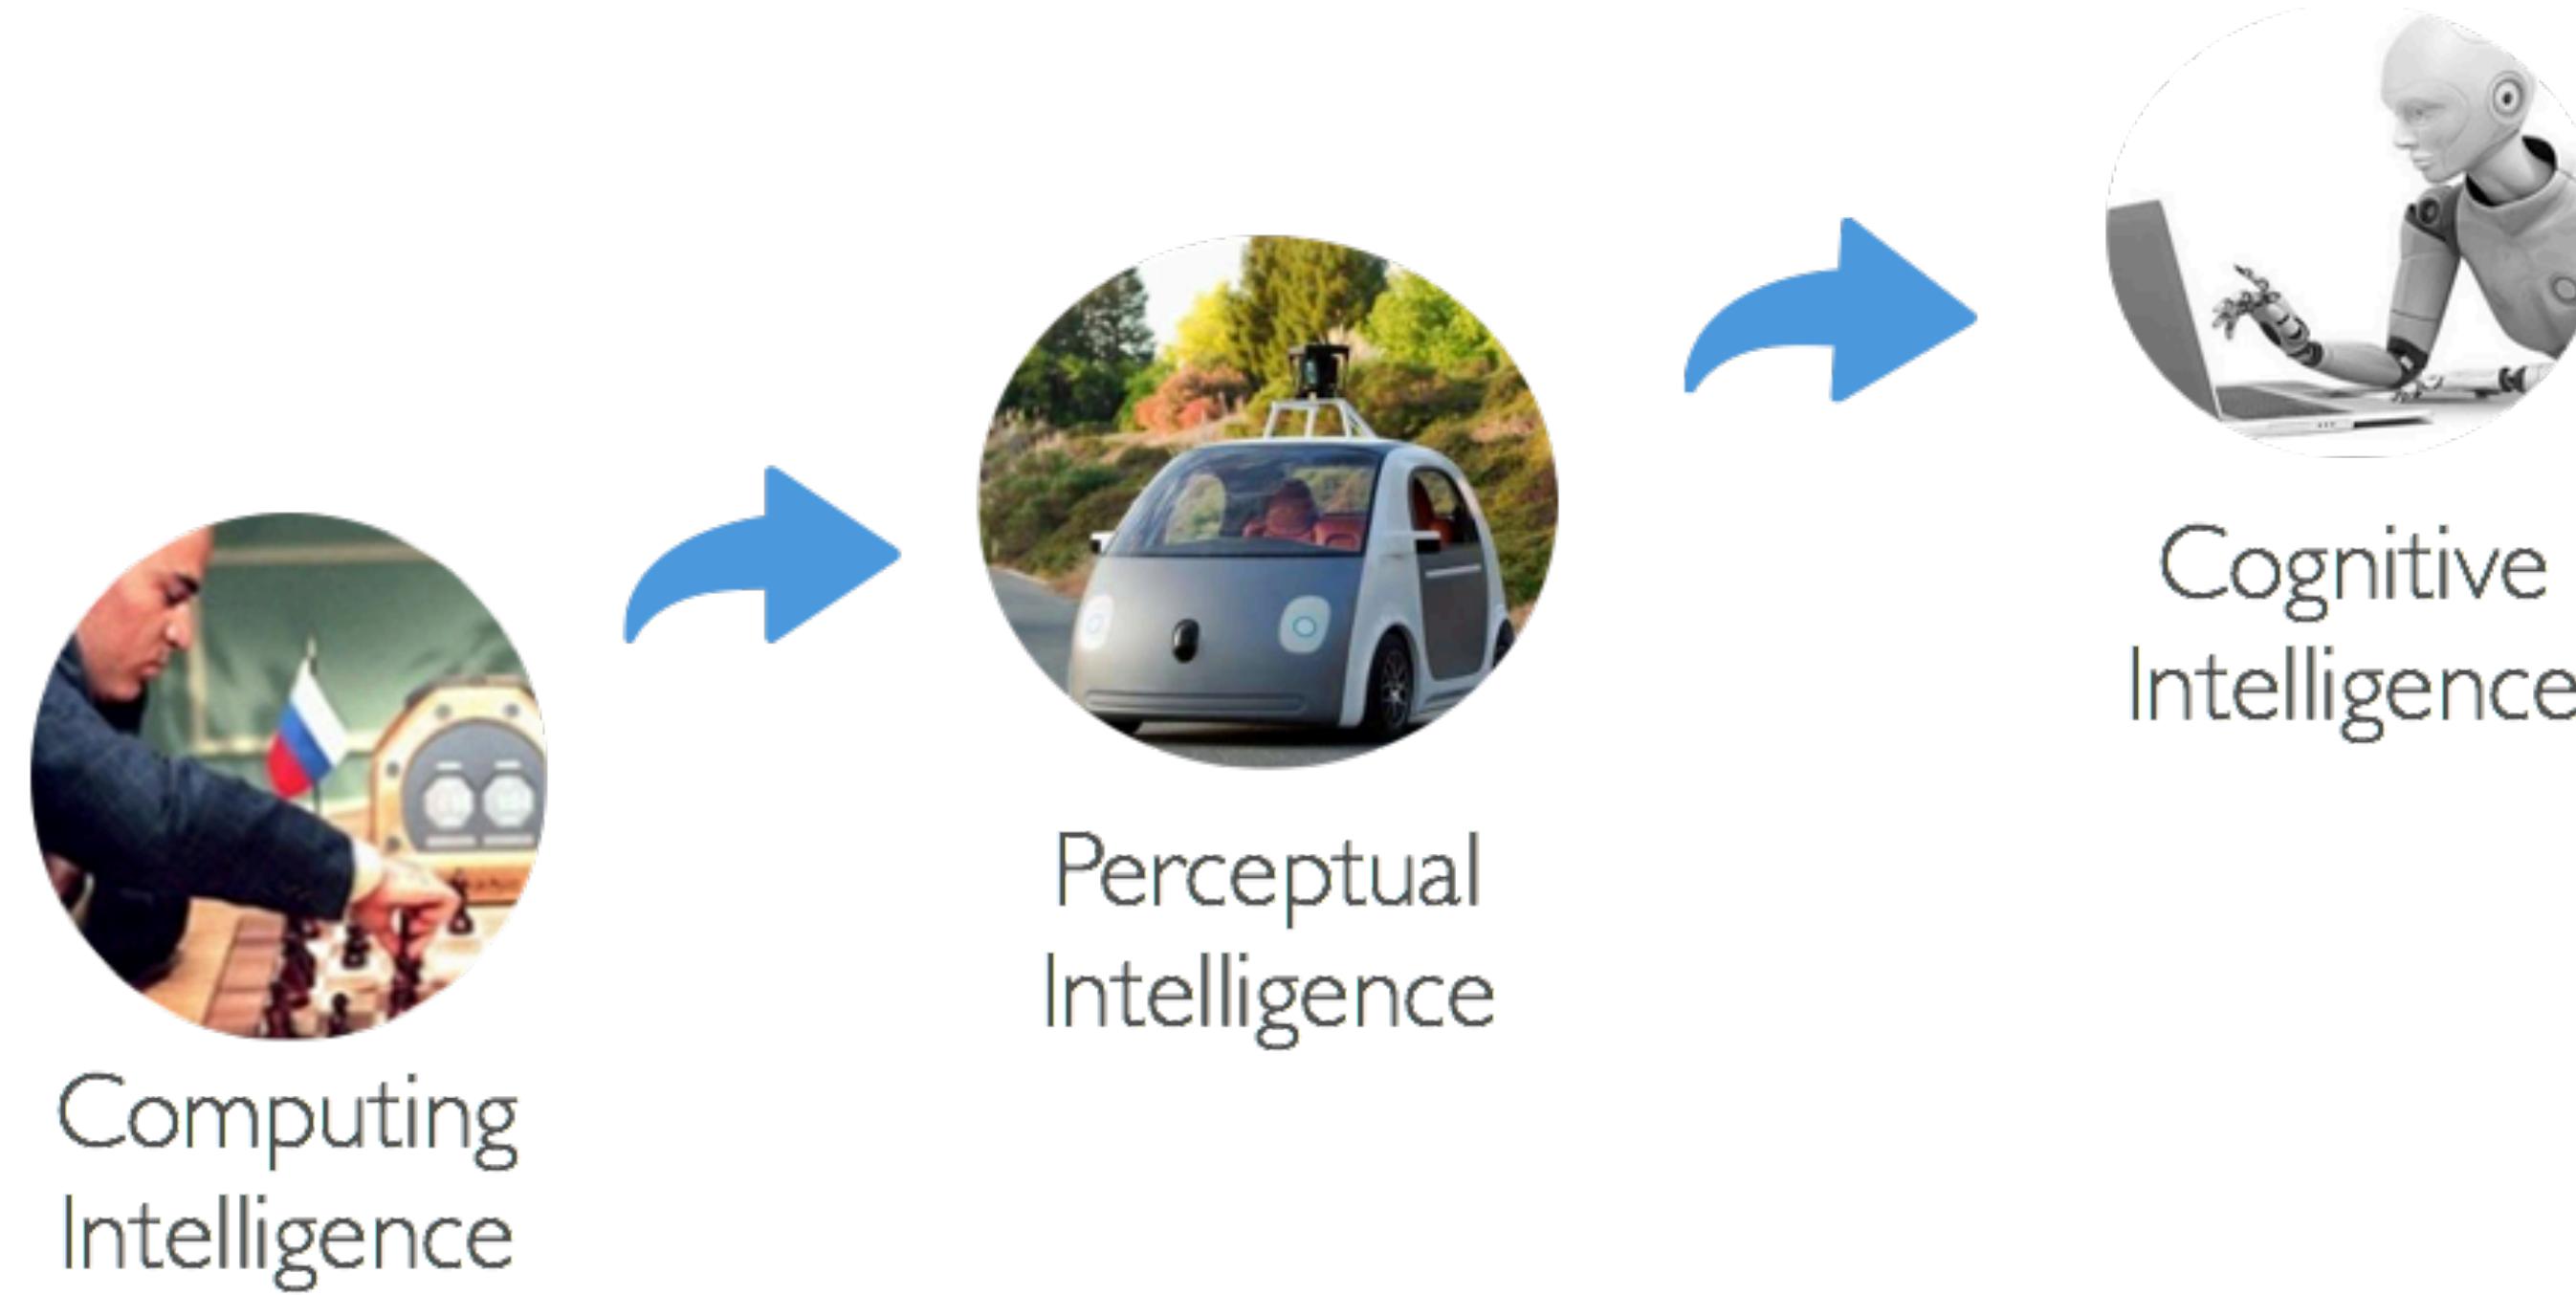

- **Introduction to Machine Reading Comprehension (MRC)**
- (Almost) Recent Progress of MRC
 - Cloze-style MRC
 - Complex MRC
- Future Prospects
- Conclusion

INTRODUCTION

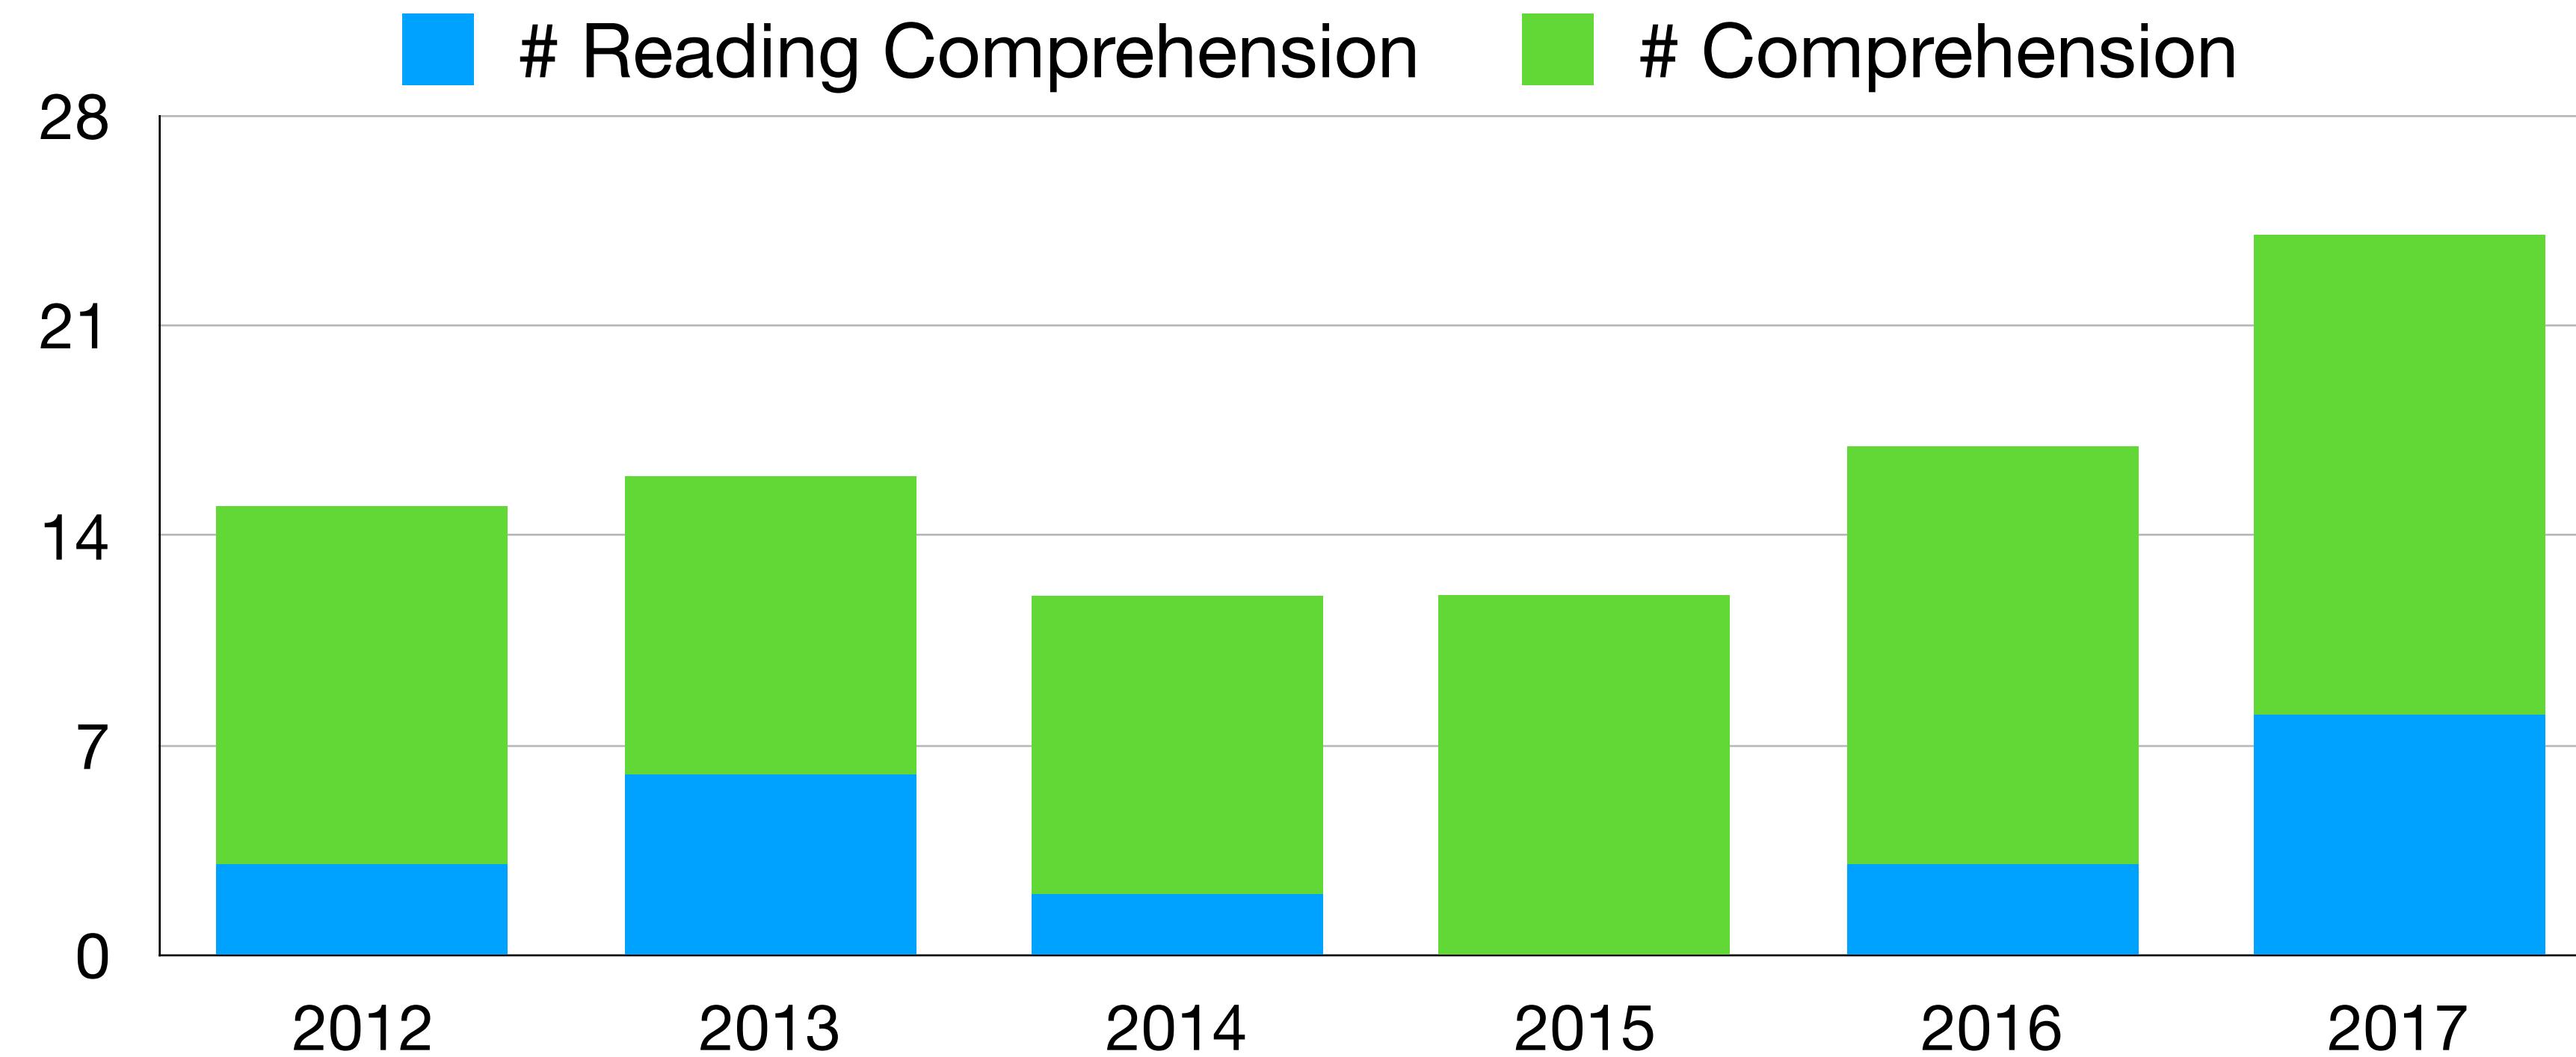

- To comprehend human language is essential in AI
- As a typical task in cognitive intelligence, Machine Reading Comprehension (MRC) has attracted lots of attentions from NLP field

RESEARCH TRENDS

- Research trends of MRC (from 2012)
 - Keywords: Reading Comprehension, Comprehension

*Statistics are obtained from ACL Anthology

INTRODUCTION

- **Definition of Reading Comprehension**
- **Macro-view**
 - To learn and do reasoning with world knowledge and common knowledge while we are growing up
- **Micro-view**
 - Read an article/several articles, and answer the questions based on it

INTRODUCTION

- Four key components in RC
- → Document
- Query
- Candidates
- Answer

James the Turtle was always getting in trouble. Sometimes he'd reach into the freezer and empty out all the food. Other times he'd sled on the deck and get a splinter. His aunt Jane tried as hard as she could to keep him out of trouble, but he was sneaky and got into lots of trouble behind her back.

One day, James thought he would go into town and see what kind of trouble he could get into. He went to the grocery store and pulled all the pudding off the shelves and ate two jars. Then he walked to the fast food restaurant and ordered 15 bags of fries. He didn't pay, and instead headed home.

His aunt was waiting for him in his room. She told James that she loved him, but he would have to start acting like a well-behaved turtle.

After about a month, and after getting into lots of trouble, James finally made up his mind to be a better turtle.

- 1) What is the name of the trouble making turtle?
A) Fries
B) Pudding
C) James
D) Jane

*Example is chosen from the MCTest dataset (Richardson et al., 2013)

"Well, Miss Maxwell, I think it only fair to tell you that you may have trouble with those boys when they do come. Forewarned is forearmed, you know. Mr. Cropper was opposed to our hiring you. Not, of course, that he had any personal objection to you, but he is set against female teachers, and when a Cropper is set there is nothing on earth can change him. He says female teachers can't keep order. He's started in with a spite at you on general principles, and the boys know it. They know he'll back them up in secret, no matter what they do, just to prove his opinions. Cropper is sly and slippery, and it is hard to corner him."

"Are the boys big?" queried Esther anxiously.

"Yes. Thirteen and fourteen and big for their age. You can't whip 'em -- that is the trouble. A man might, but they'd twist you around their fingers. You'll have your hands full, I'm afraid. But maybe they'll behave all right after all."

Mr. Baxter privately had no hope that they would, but Esther hoped for the best. She could not believe that Mr. Cropper would carry his prejudices into a personal application. This conviction was strengthened when he overtook her walking from school the next day and drove her home. He was a big, handsome man with a very suave, polite manner. He asked interestedly about her school and her work, hoped she was getting on well, and said he had two young rascals of his own to send soon. Esther felt relieved. She thought that Mr. Baxter had exaggerated matters a little.

S: 1 Mr. Cropper was opposed to our hiring you .
2 Not , of course , that he had any personal objection to you , but he is set against female teachers , and when a Cropper is set there is nothing on earth can change him .
3 He says female teachers ca n't keep order .
4 He 's started in with a spite at you on general principles , and the boys know it .
5 They know he 'll back them up in secret , no matter what they do , just to prove his opinions .
6 Cropper is sly and slippery , and it is hard to corner him . ''
7 `` Are the boys big ? ''
8 queried Esther anxiously .
9 `` Yes .
10 Thirteen and fourteen and big for their age .
11 You ca n't whip 'em -- that is the trouble .
12 A man might , but they 'd twist you around their fingers .
13 You 'll have your hands full , I 'm afraid .
14 But maybe they 'll behave all right after all . ''
15 Mr. Baxter privately had no hope that they would , but Esther hoped for the best .
16 She could not believe that Mr. Cropper would carry his prejudices into a personal application .
17 This conviction was strengthened when he overtook her walking from school the next day and drove her home .
18 He was a big , handsome man with a very suave , polite manner .
19 He asked interestedly about her school and her work , hoped she was getting on well , and said he had two young rascals of his own to send soon .
20 Esther felt relieved .

Q: She thought that Mr. _____ had exaggerated matters a little .

C: Baxter, Cropper, Esther, course, fingers, manner, objection, opinion, right, spite.

a: Baxter

PROGRESS OF MRC DATASETS

- HFL-RC: PD&CFT (Cui et al., COLING2016)

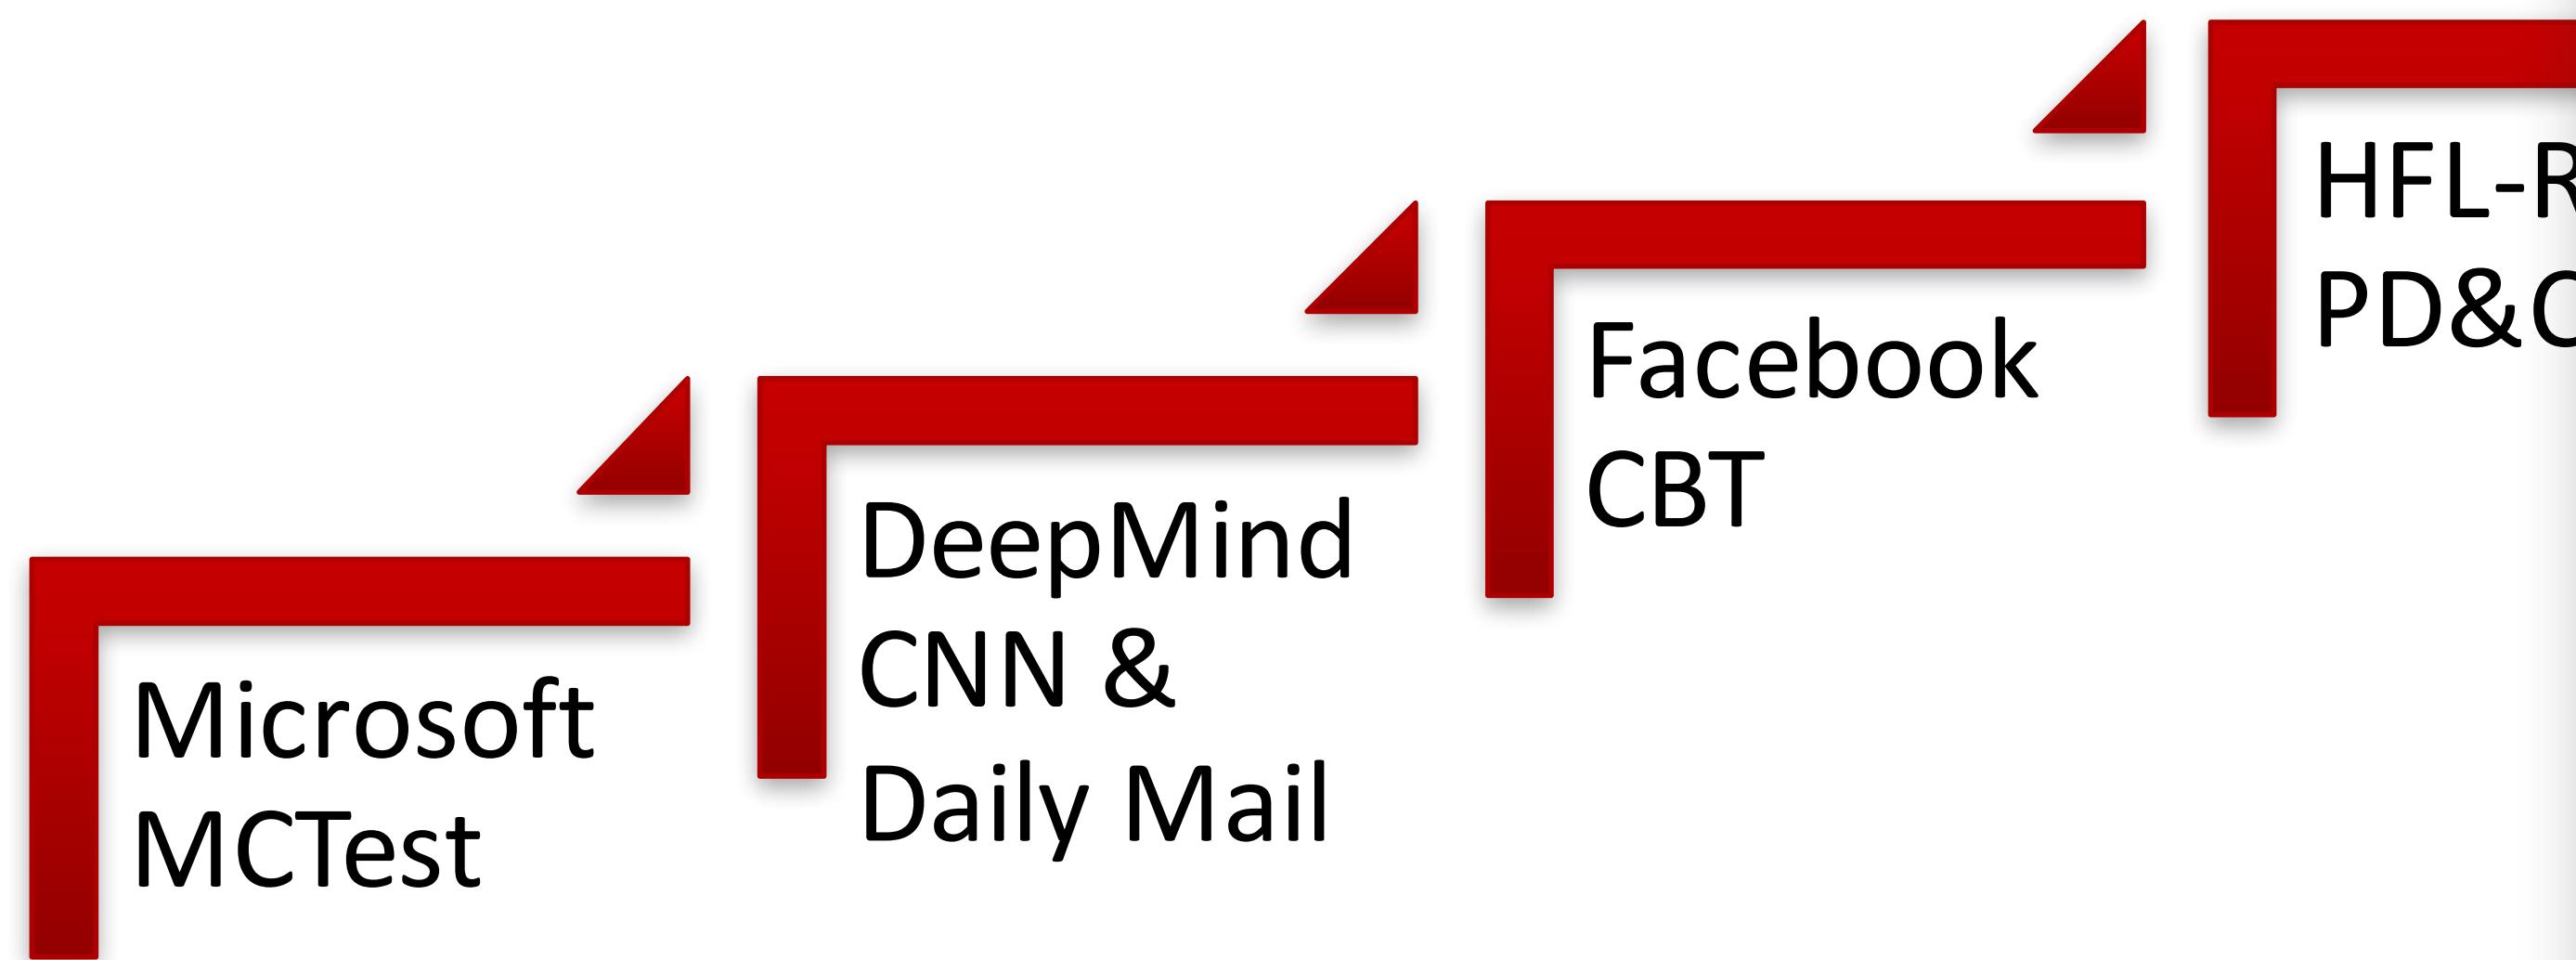

Document	1 人民网 1月 1日 讯 据《纽约时报》报道，美国华尔街股市在 2013年的最后一天继续上涨，和全球股市一样，都以最高纪录或接近最高纪录结束本年的交易。 2 《纽约时报》报道说，标普 500 指数今年上升 29.6%，为 1997年以来的最大涨幅； 3 道琼斯工业平均指数上升 26.5%，为 1996年以来的最大涨幅； 4 纳斯达克 上涨 38.3%。 5 就 12月 31日来说，由于就业前景看好和经济增长明年可能加速，消费者信心上升。 6 工商协进会报告，12月 消费者信心上升到 78.1，明显高于 11月的 72。 7 另据《华尔街日报》报道，2013年是 1995年以来美国股市表现最好的一年。 8 这一年里，投资美国股市的明智做法是追着“傻钱”跑。 9 所谓的“傻钱”X，其实就是买入并持有美国股票这样的普通组合。 10 这个策略要比对冲基金和其它专业投资者使用的更为复杂的投资方法效果好得多。
Query	所谓的“傻钱”X，其实就是买入并持有美国股票这样的普通组合。
Answer	策略

PROGRESS OF MRC DATASETS

- Stanford SQuAD (Rajpurkar et al., EMNLP2016)

In meteorology, precipitation is any product of the condensation of atmospheric water vapor that falls under **gravity**. The main forms of precipitation include drizzle, rain, sleet, snow, **graupel** and hail... Precipitation forms as smaller droplets coalesce via collision with other rain drops or ice crystals **within a cloud**. Short, intense periods of rain in scattered locations are called "showers".

What causes precipitation to fall?
gravity

What is another main form of precipitation besides drizzle, rain, snow, sleet and hail?
graupel

Where do water droplets collide with ice crystals to form precipitation?
within a cloud

OUTLINE

- Introduction to Machine Reading Comprehension (MRC)

 - Complex MRC
- Future Prospects
- Conclusion

CLOZE-STYLE RC

- Definition of cloze-style RC
 - Document: the same as the general RC
 - Query: a sentence with a blank
 - Candidate (optional): several candidates to fill in
 - Answer: a single word that exactly matches the query (the answer word should appear in the document)

Original Version

Context

The BBC producer allegedly struck by Jeremy Clarkson will not press charges against the “Top Gear” host, his lawyer said Friday. Clarkson, who hosted one of the most-watched television shows in the world, was dropped by the BBC Wednesday after an internal investigation by the British broadcaster found he had subjected producer Oisin Tymon “to an unprovoked physical and verbal attack.” ...

Query

Producer **X** will not press charges against Jeremy Clarkson, his lawyer says.

Answer

Oisin Tymon

*Example is chosen from the CNN dataset (Hermann et al., 2015)

CLOZE-STYLE RC

- CBT Dataset (Hill et al., ICLR2016)

"Well, Miss Maxwell, Step1: Choose 21 sentences have trouble with those boys when they do come. Forewarned is forearmed, you know. Mr. Cropper was opposed to our hiring you. Not, of course, that he had any personal objection to you, but he is set against female teachers, and when a Cropper is set there is nothing on earth can change him. He says female teachers can't keep order. He's started in with a spite at you on general principles, and the boys know it. They know he'll back them up in secret, no matter what they do, just to prove his opinions. Cropper is sly and slippery, and it is hard to corner him."

"Are the boys big?" queried Esther anxiously.

"Yes. Thirteen and fourteen and big for their age. You can't whip 'em -- that is the trouble. A man might, but they'd twist you around their fingers. You'll have your hands full, I'm afraid. But maybe they'll behave all right after all."

Mr. Baxter privately had no hope that they would, but Esther hoped for the best. She could not believe that Mr. Cropper would carry his prejudices into a personal application. This conviction was strengthened when he overtook her walking from school the next day and drove her home. He was a big, handsome man with a very suave, polite manner. He asked interestedly about her school and her work, hoped she was getting on well, and said his own to rascals of his own to send soon. Esther Baxter had exaggerated matters a little.

Step3: Choose 21st sentence as Query

S: 1 Mr. Cropper was opposed to our hiring you .
2 Not , of course , that he had any personal objection to you , but he is set against female teachers , and when a Cropper is set there is nothing on earth can change him .
3 He says female teachers ca n't keep order .
4 He 's started in with a spite at you on general principles , and the boys know it .
5 They know he 'll back them up in secret , no matter what they do , just to prove his opinions .
6 Cropper is sly and slippery , and it is hard to corner him . ''
7 `` Are the boys big ? ''
8 queried Esther anxiously .
9 `` Yes .
10 Thirteen and fourteen and big for their age .
11 You ca n't whip 'em -- that is the trouble .
12 A man might , but they 'd twist you around their fingers .
13 You 'll have your hands full , I 'm afraid .
14 But maybe they 'll behave all right after all . ''
15 Mr. Baxter privately had no hope that they would , but Esther hoped for the best .
16 She could not believe that Mr. Cropper would carry his prejudices into a personal application .
17 This conviction was strengthened when he overtook her next day and drove her home .
18 He was a b suave , polite
19 He asked i and her work
well , and sa f his own to
20 Esther felt relieved

Step3:With a BLANK

q: She thought that Mr. _____ had exaggerated matters a little .
C: Baxter, Cropper, Esther, course, fingers, manner, objection, opinion, right, spite.
a: Baxter

Step2: Choose first 20 sentences as Context

Step4: Choose other 9 similar words from Context as Candidate

Step3:The word removed from Query

RELATED WORKS

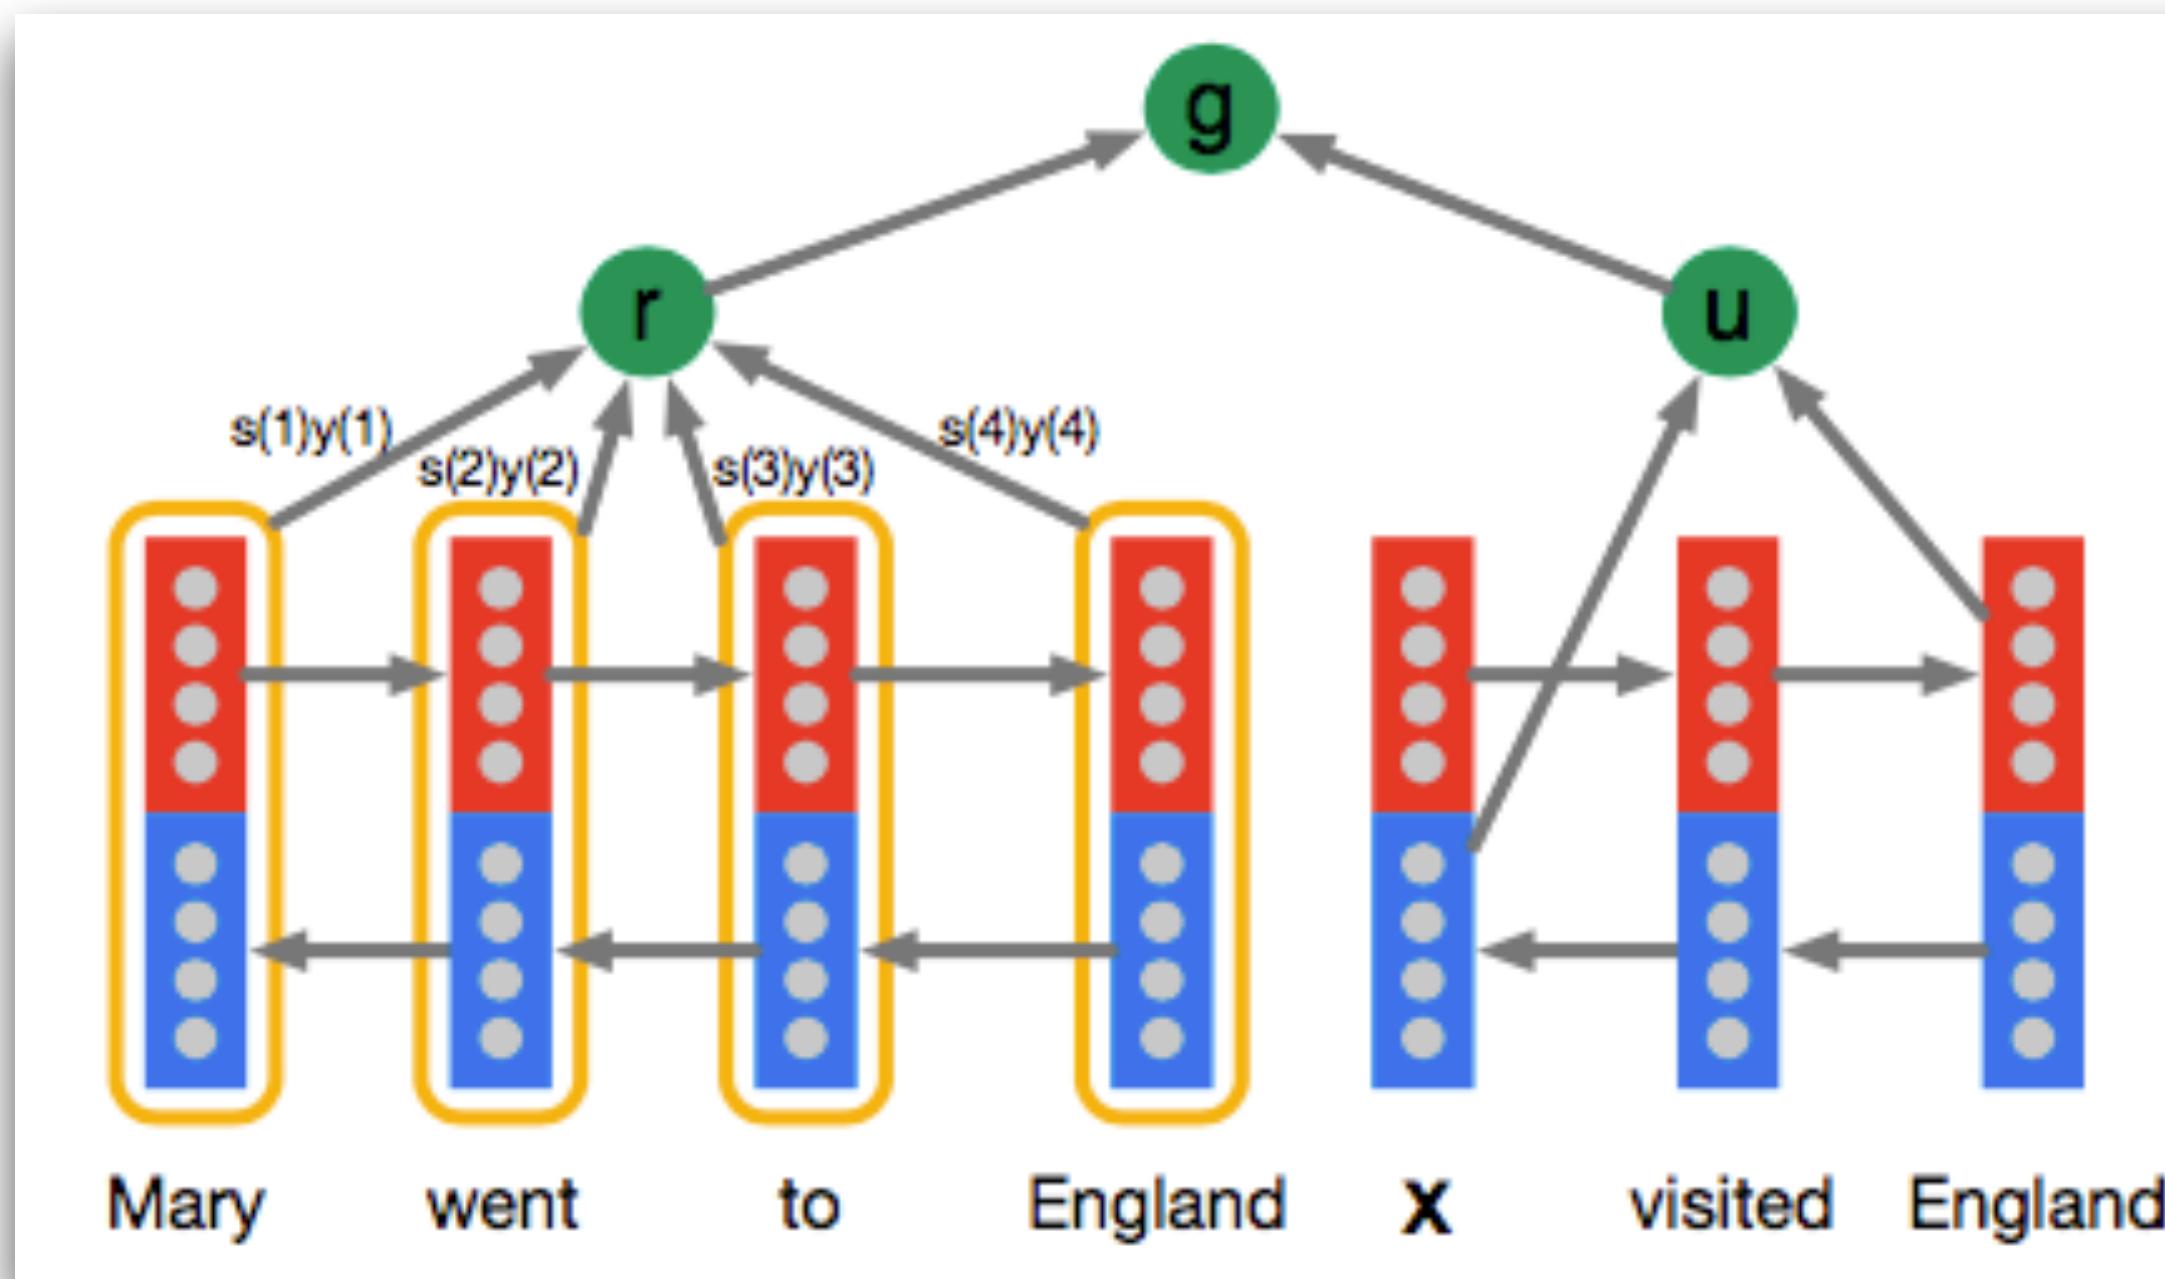

- **Predictions on full vocabulary**
 - Attentive Reader (Hermann et al., 2015)
 - Stanford AR (Chen et al., 2016)
- **Pointer-wise predictions (Vinyals et al., 2015)**
 - Attention Sum Reader (Kadlec et al., 2016)
 - Consensus Attention Reader (Cui et al., 2016)
 - Gated-attention Reader (Dhingra et al., 2017)

ATTENTIVE READER

- Teaching Machines to Read and Comprehend (Hermann et al., NIPS2015)
- Propose attention-based neural networks for reading comprehension

$$m(t) = \tanh(W_{ym}y_d(t) + W_{um}u),$$

$$s(t) \propto \exp(w_{ms}^T m(t)),$$

$$r = y_d s,$$

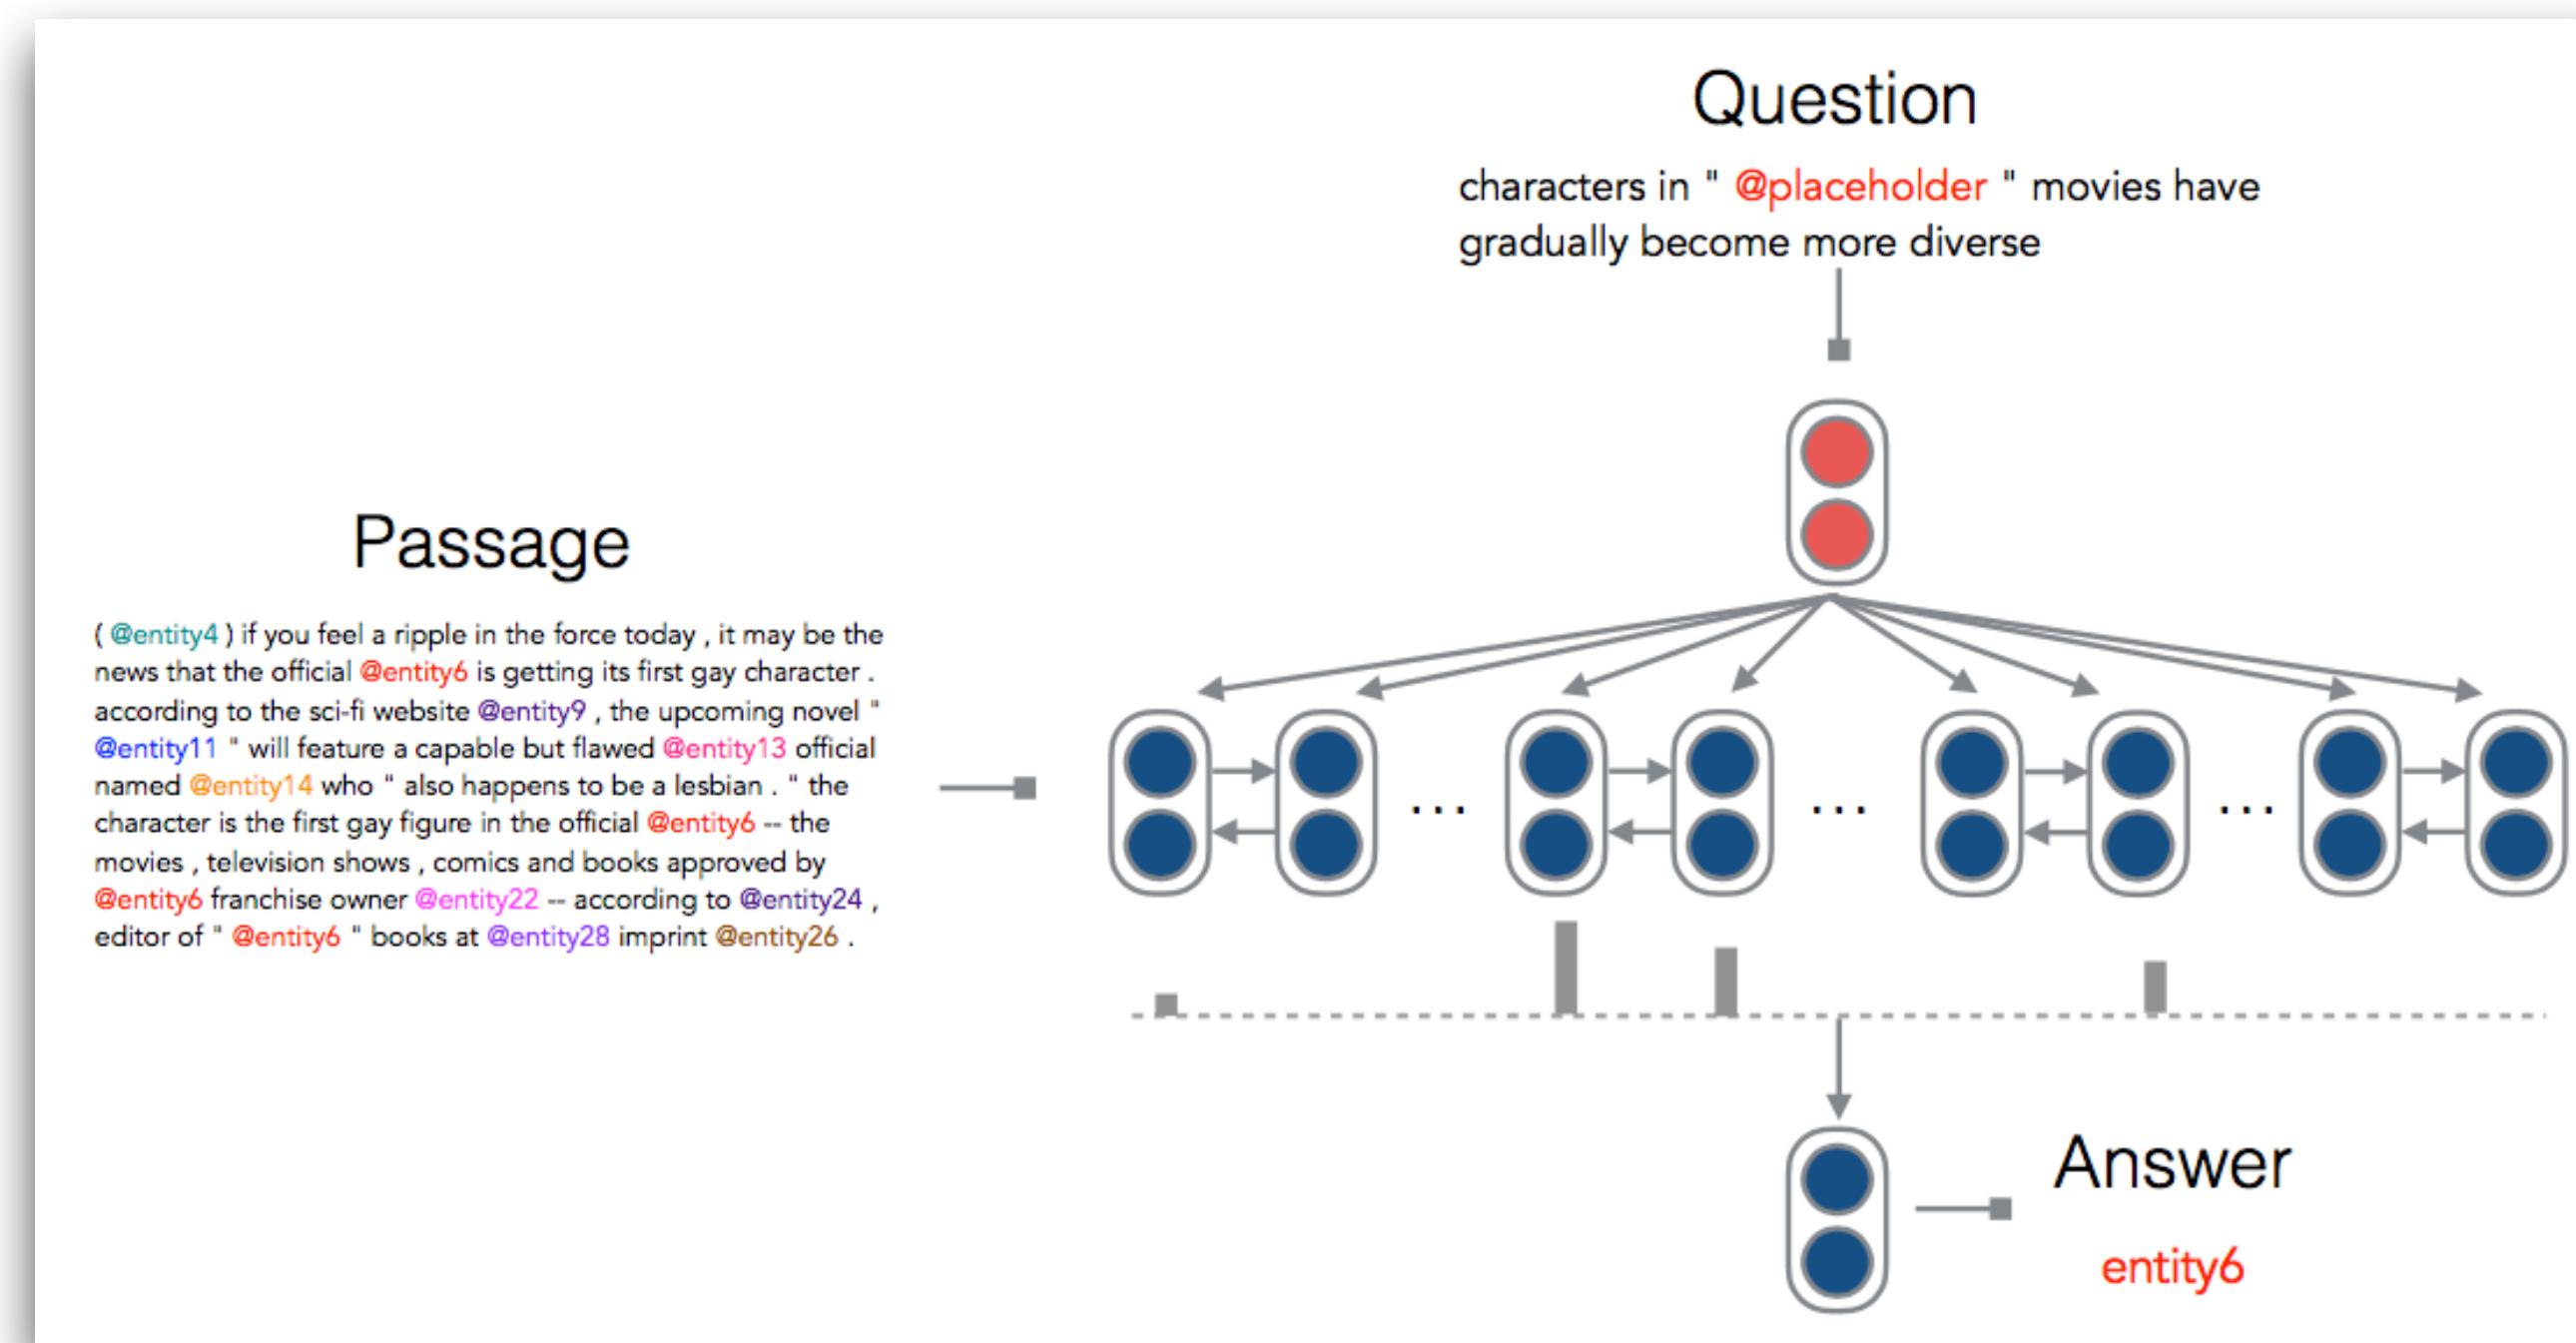

$$g^{AR}(d, q) = \tanh(W_{rg}r + W_{ug}u).$$

STANFORD AR

- A Thorough Examination of the CNN/Daily Mail Reading Comprehension Task (Chen et al., ACL2016)
- Nothing special in NN model, but provides valuable insights on the CNN/DailyMail datasets

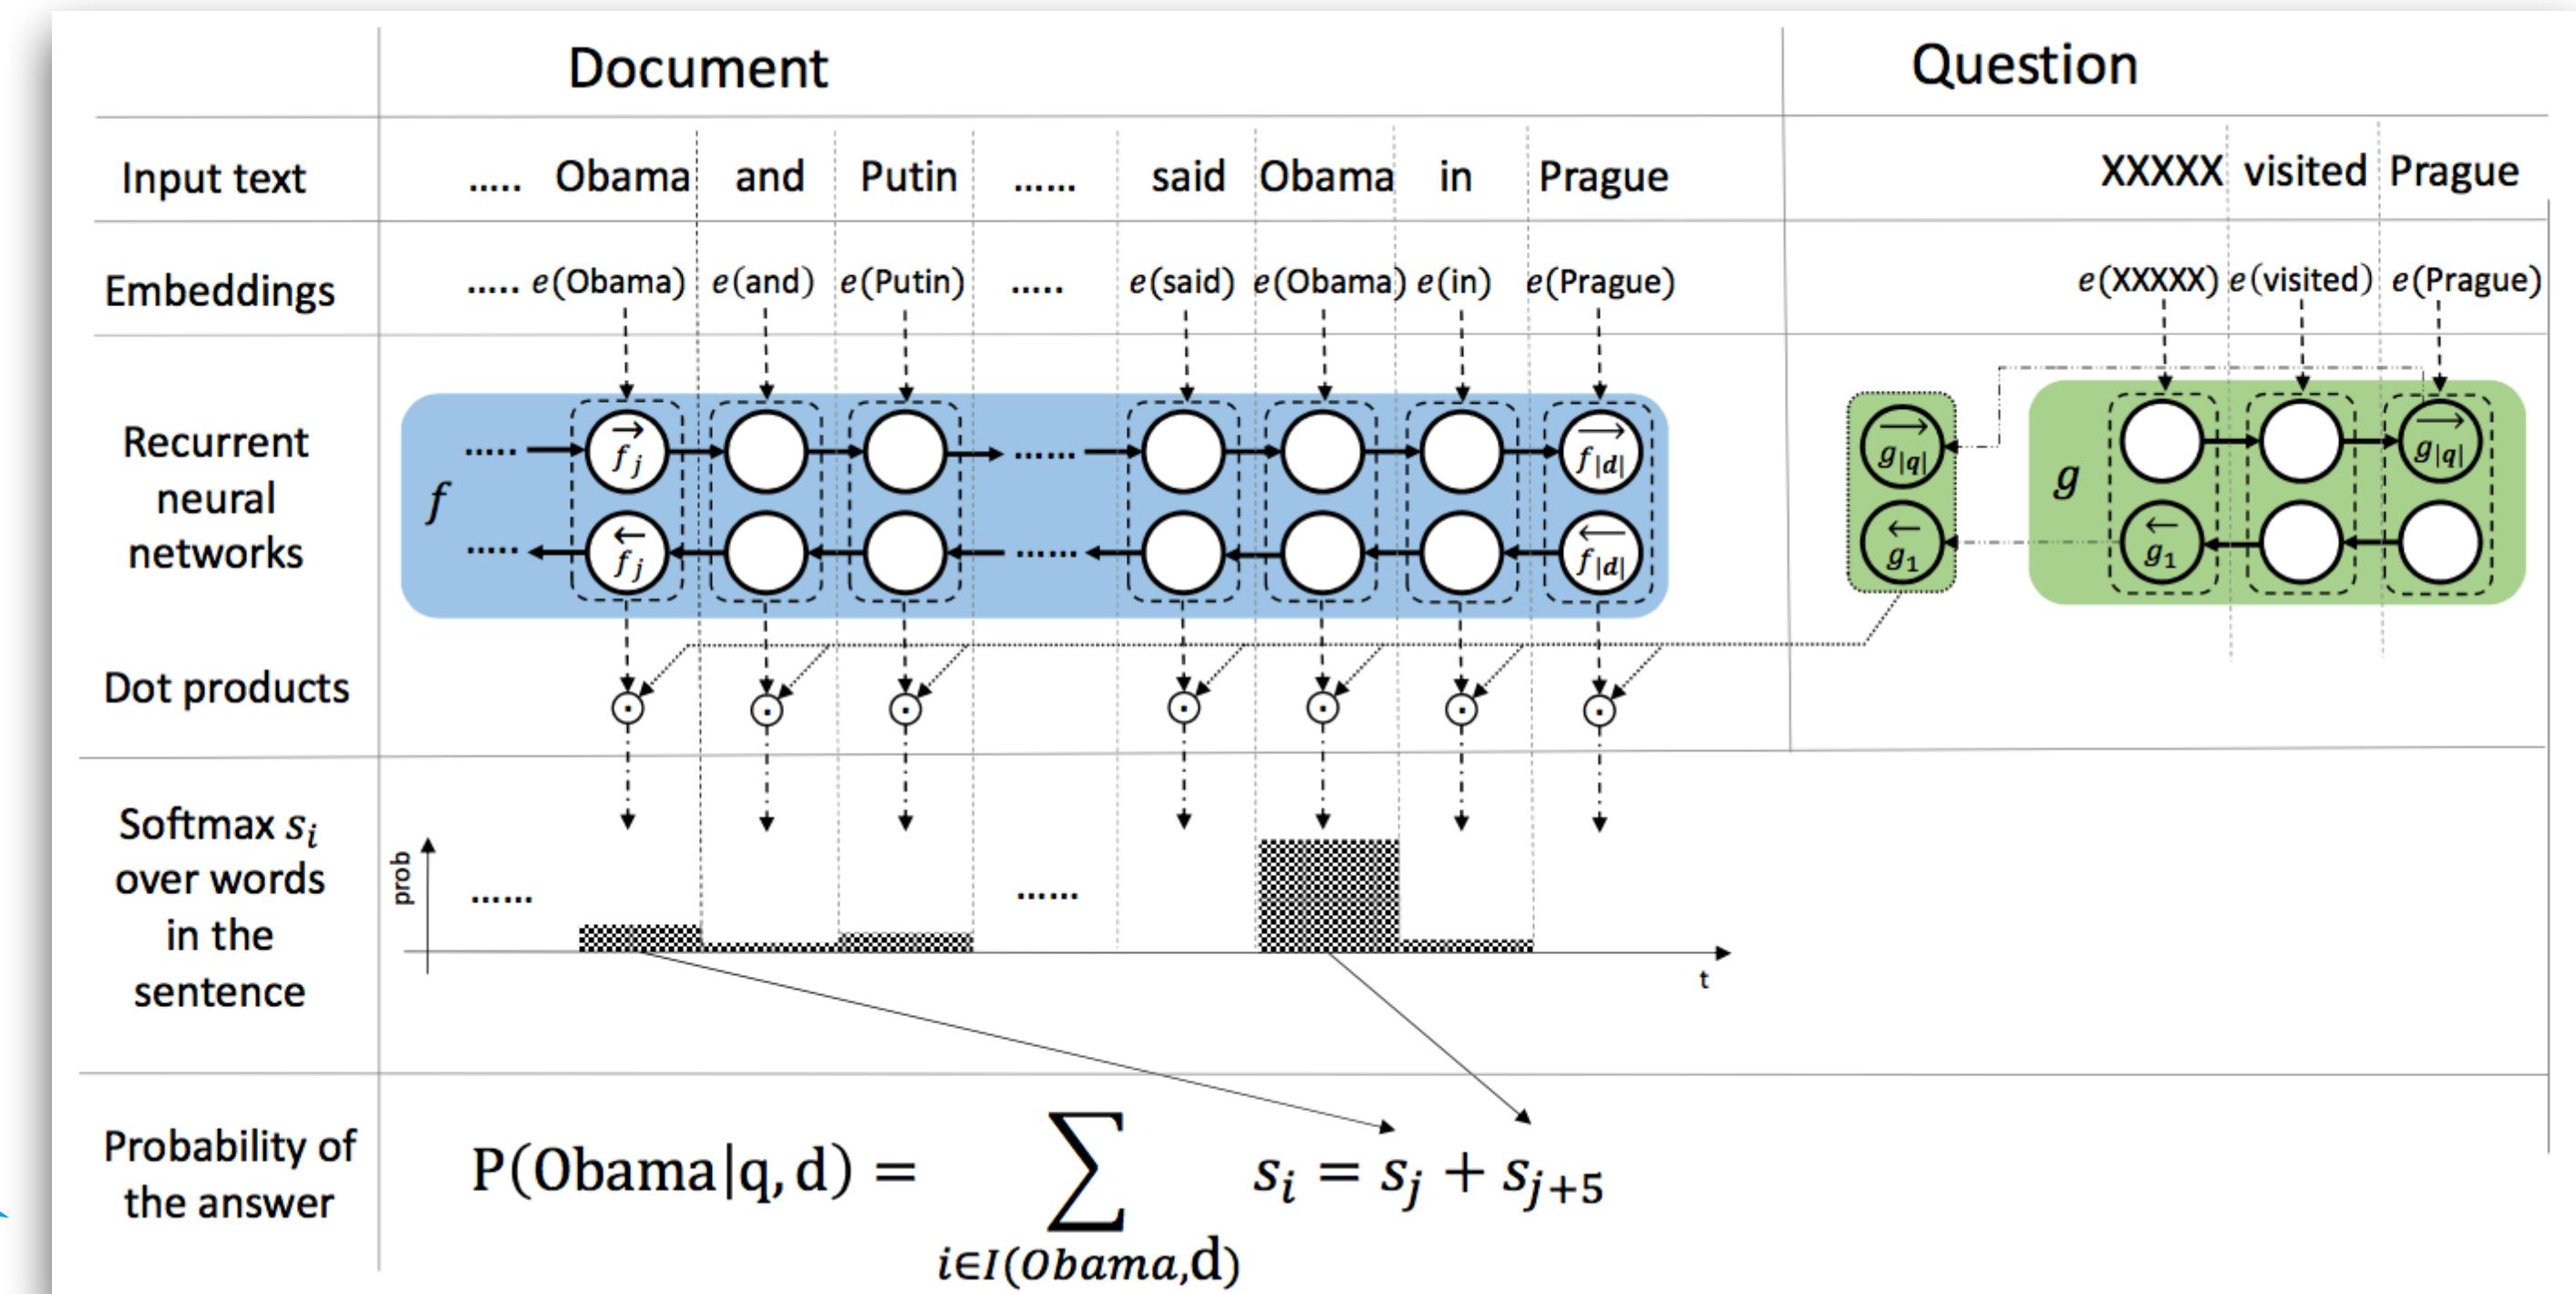

- 1) CNN/DailyMail dataset is noisy
- 2) Current NN models have almost reached CEILING performance
- 3) Requires less reasoning and inference

ATTENTION SUM READER

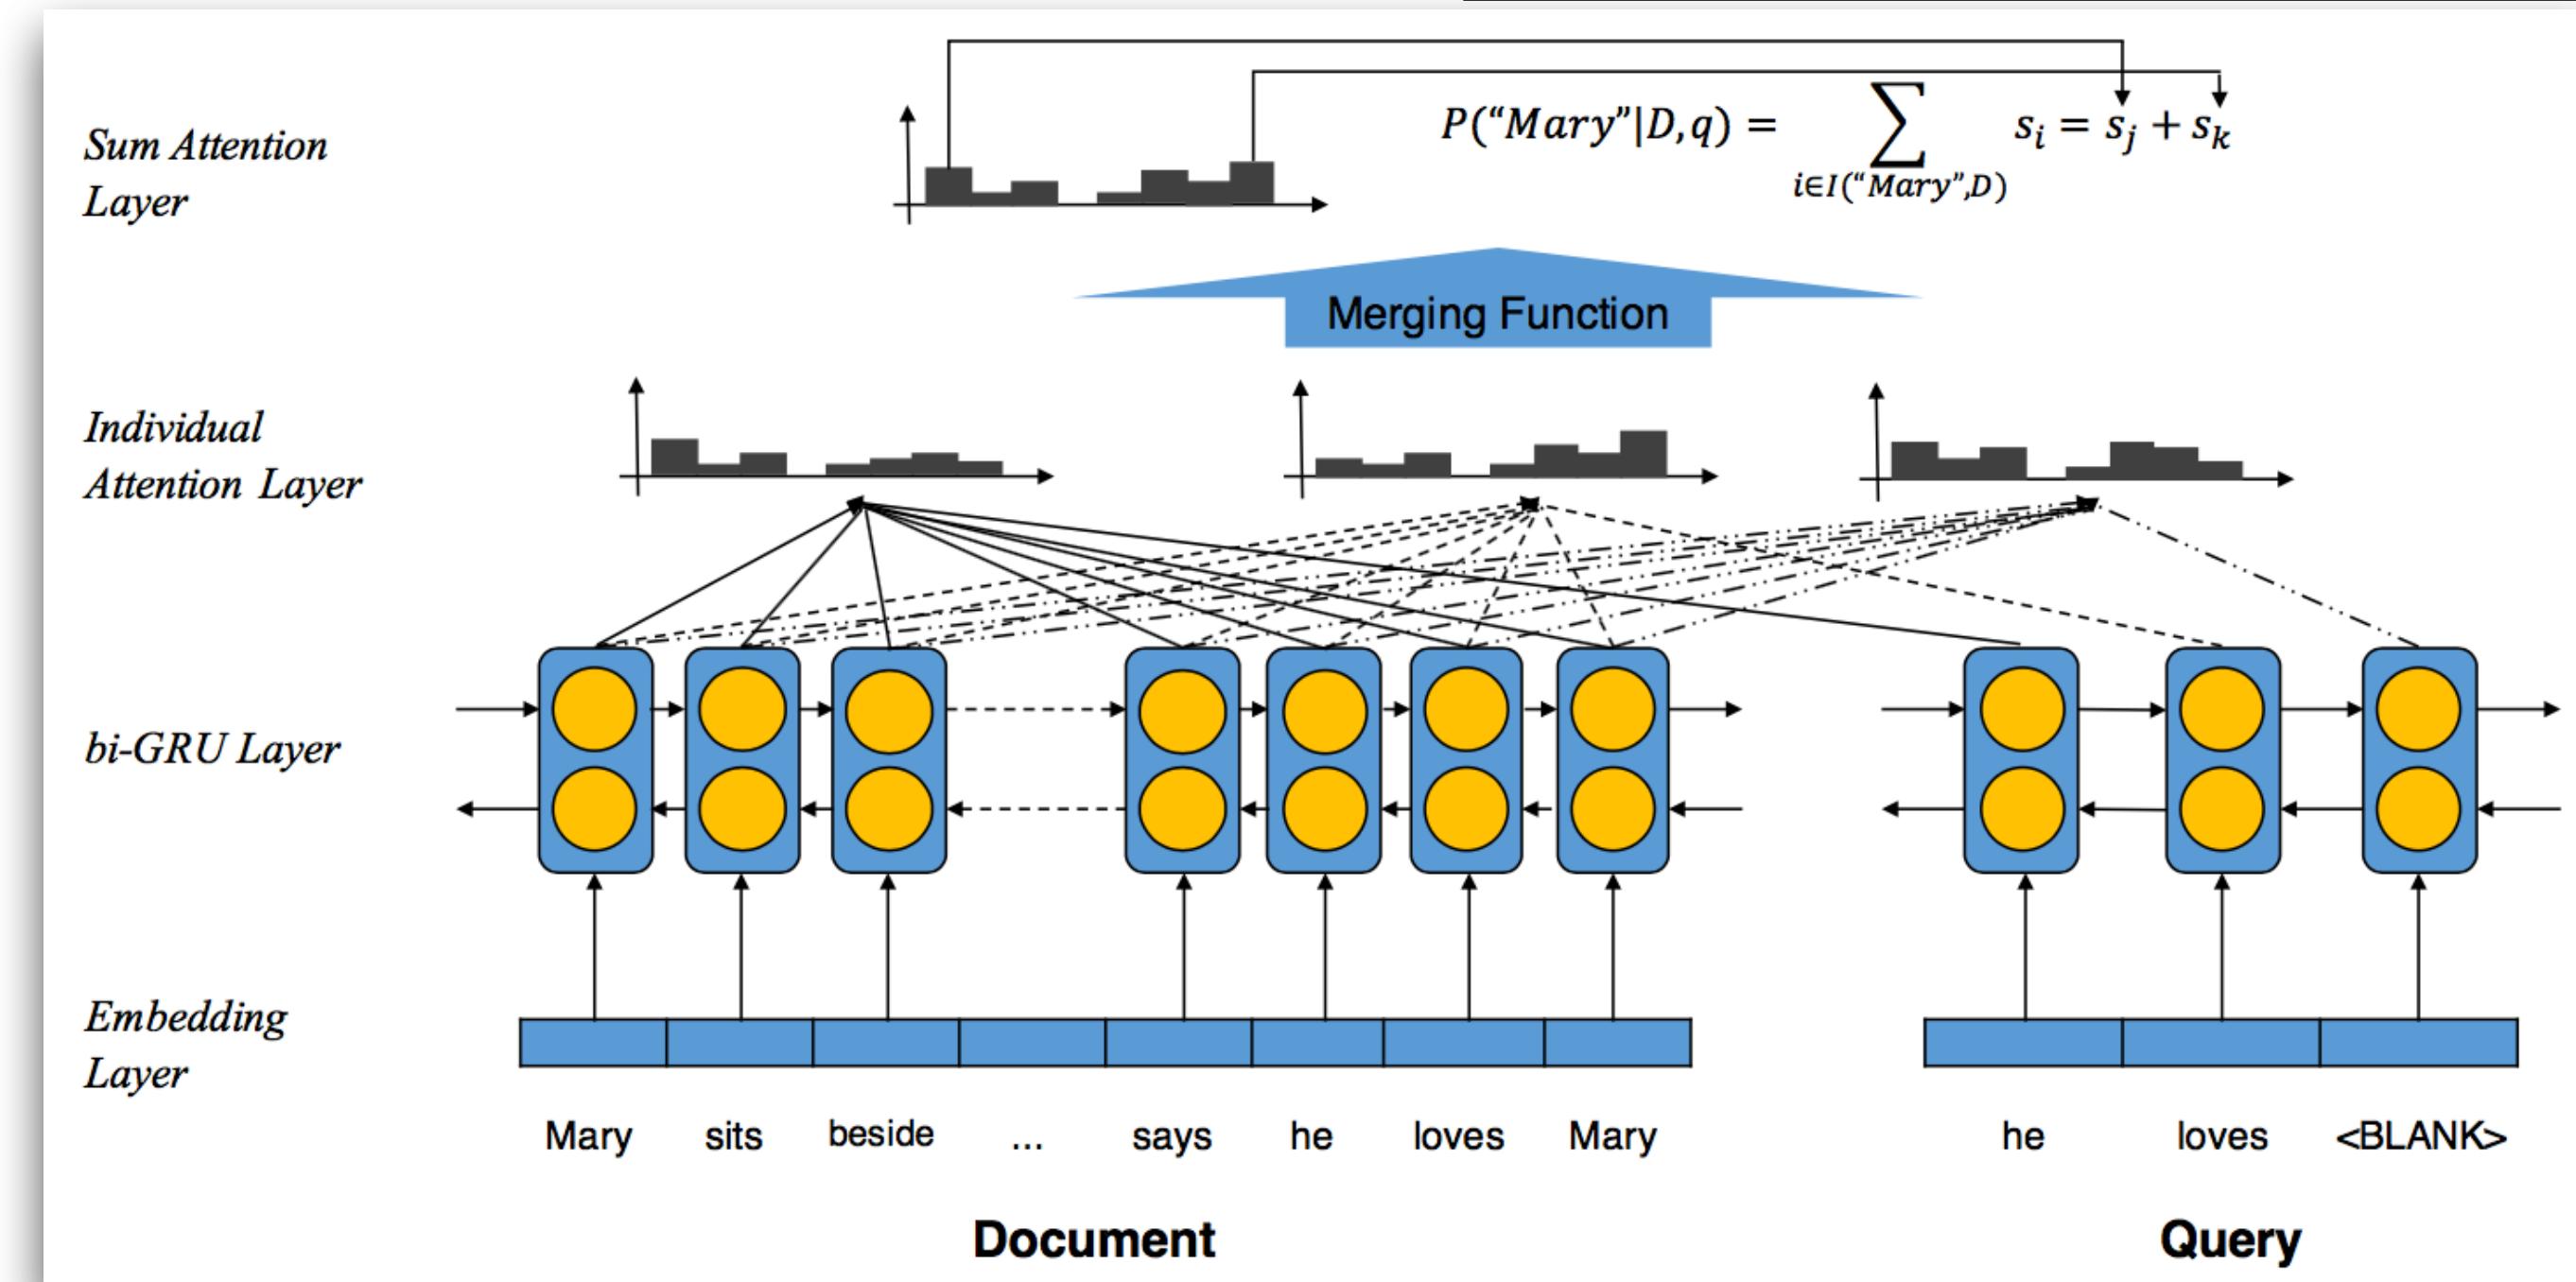

- Text Understanding with the Attention Sum Reader Network (Kadlec et al., ACL2016)
- Propose to utilize and improve Pointer Network (Vinyals et al., 2015) in RC

CAS READER

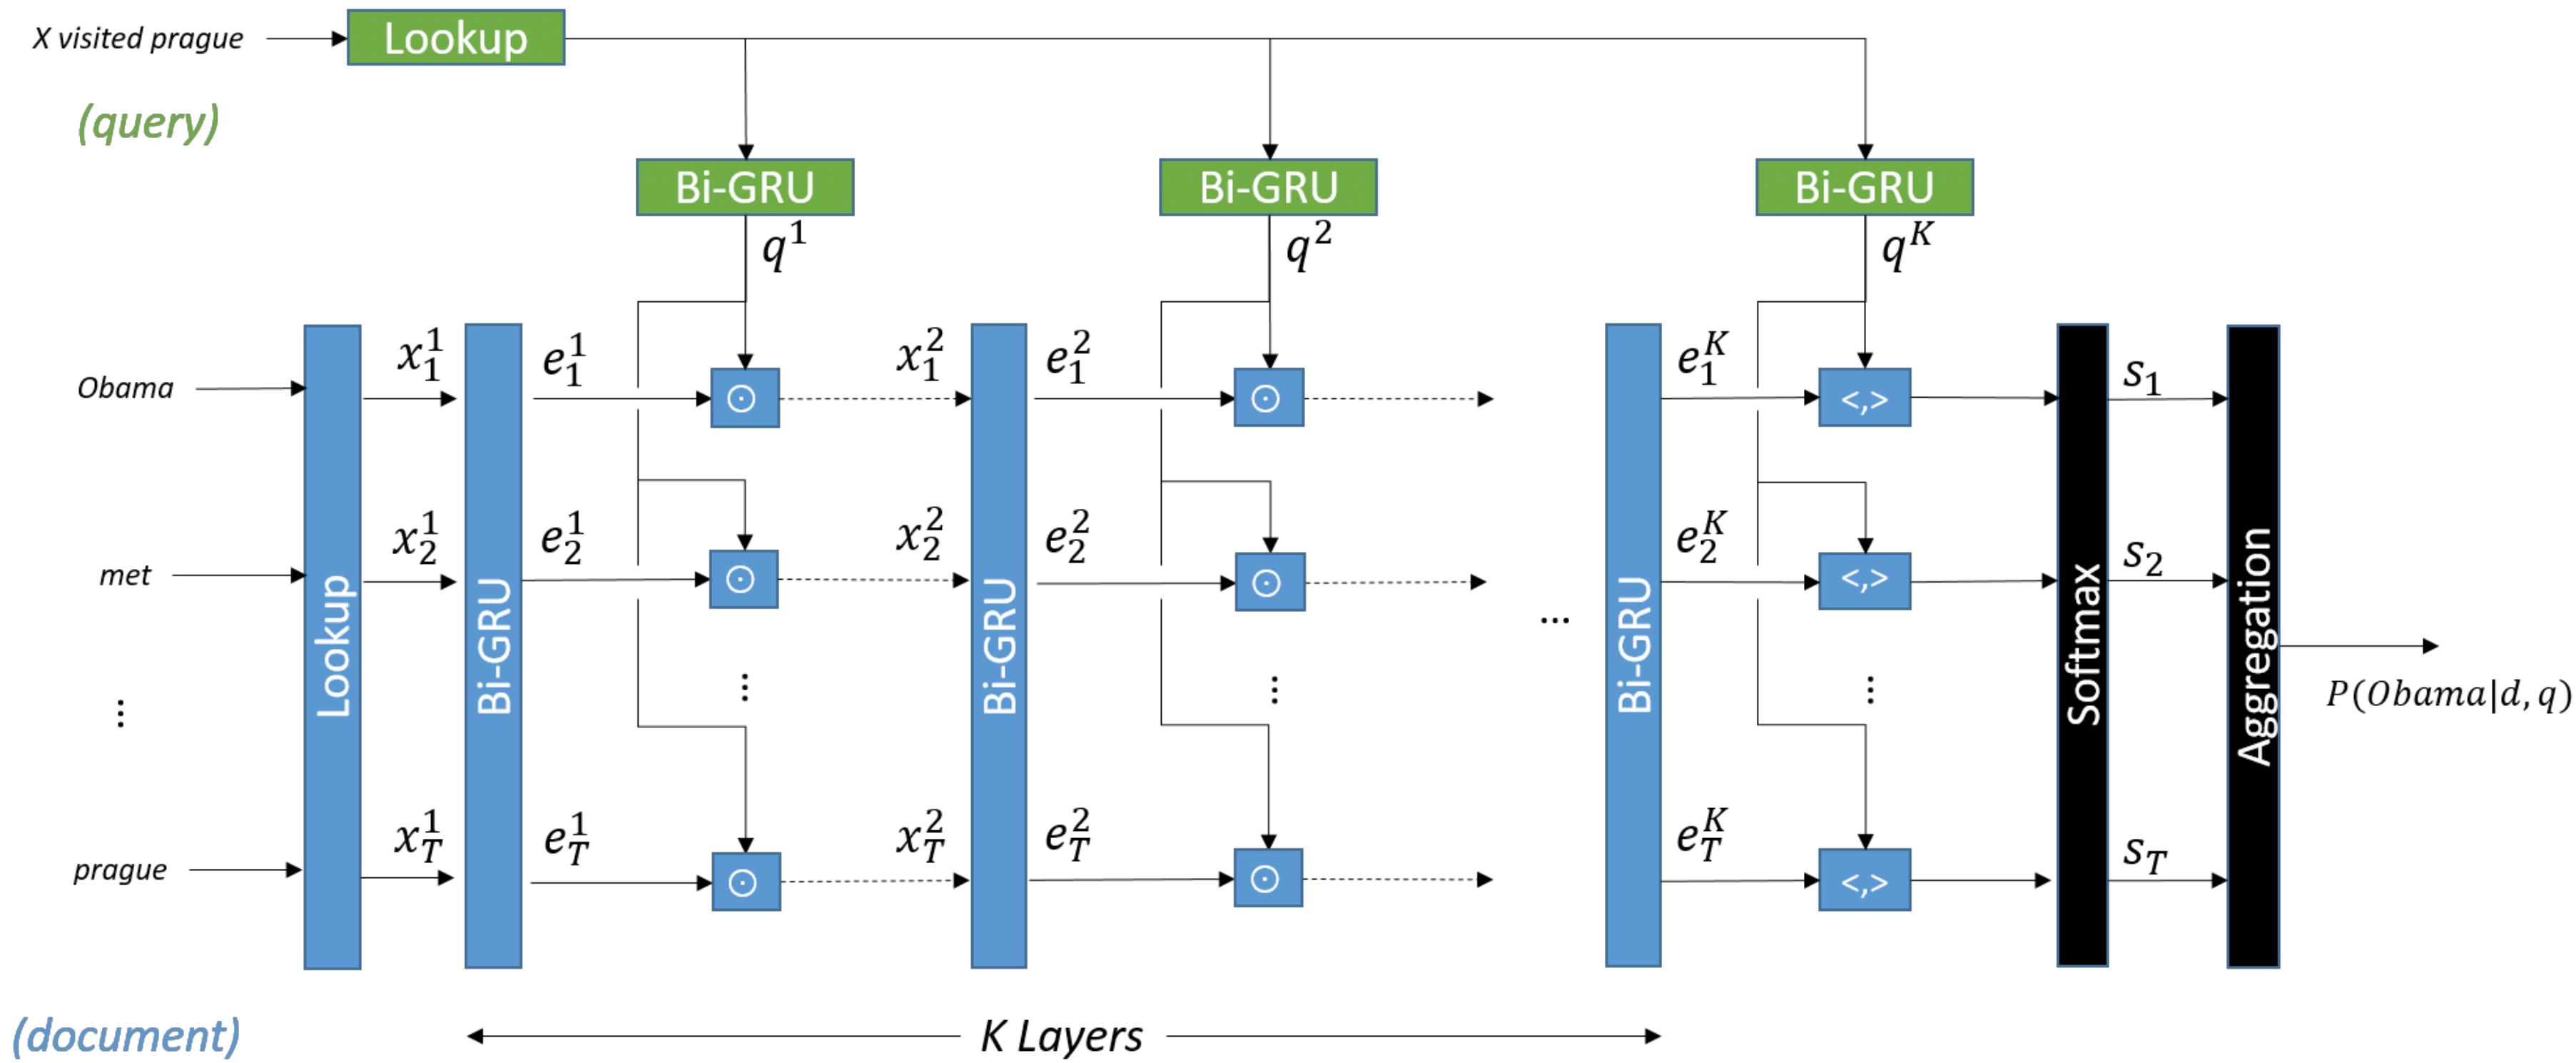

- Consensus Attention-based Neural Networks for Chinese Reading Comprehension (Cui et al., COLING2016)
- Propose to consider different timesteps of query and **generate multiple doc-level attentions**

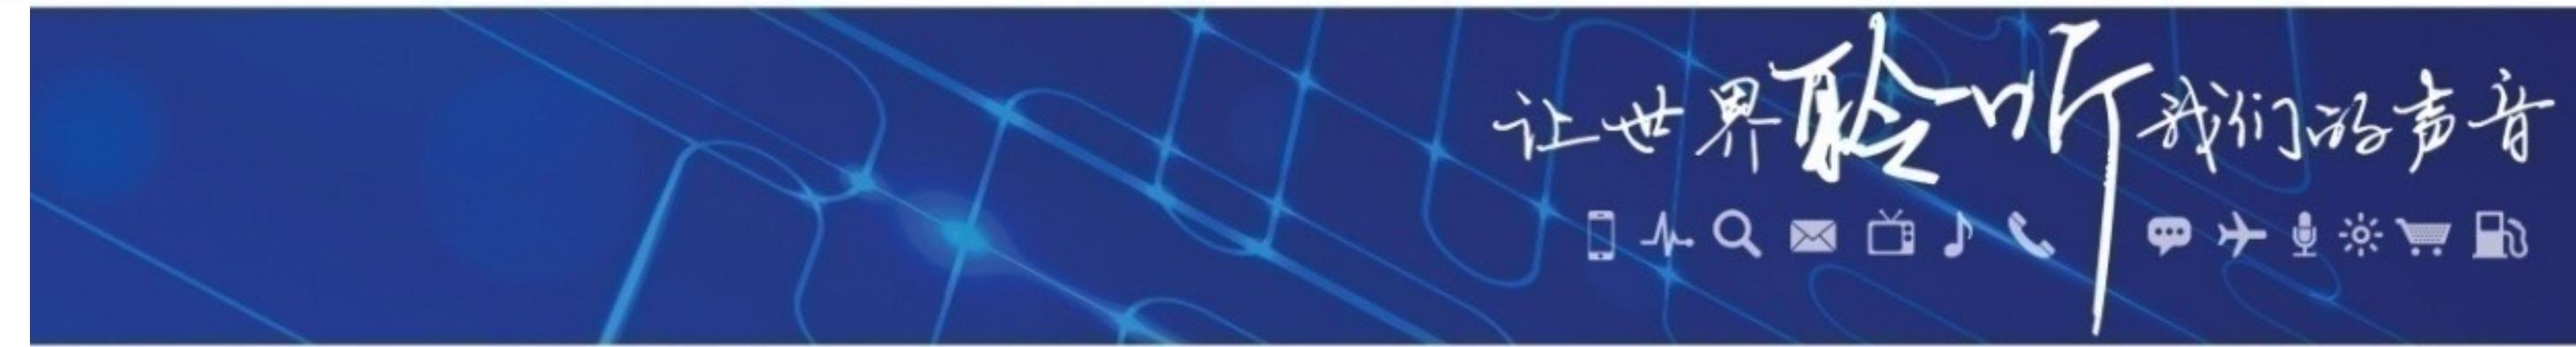

GATED-ATTENTION READER

- Gated-Attention Reader for Text Comprehension (Dhingra et al., ACL2017)
- Propose to use multiple hops for refining attended representations

AoA READER

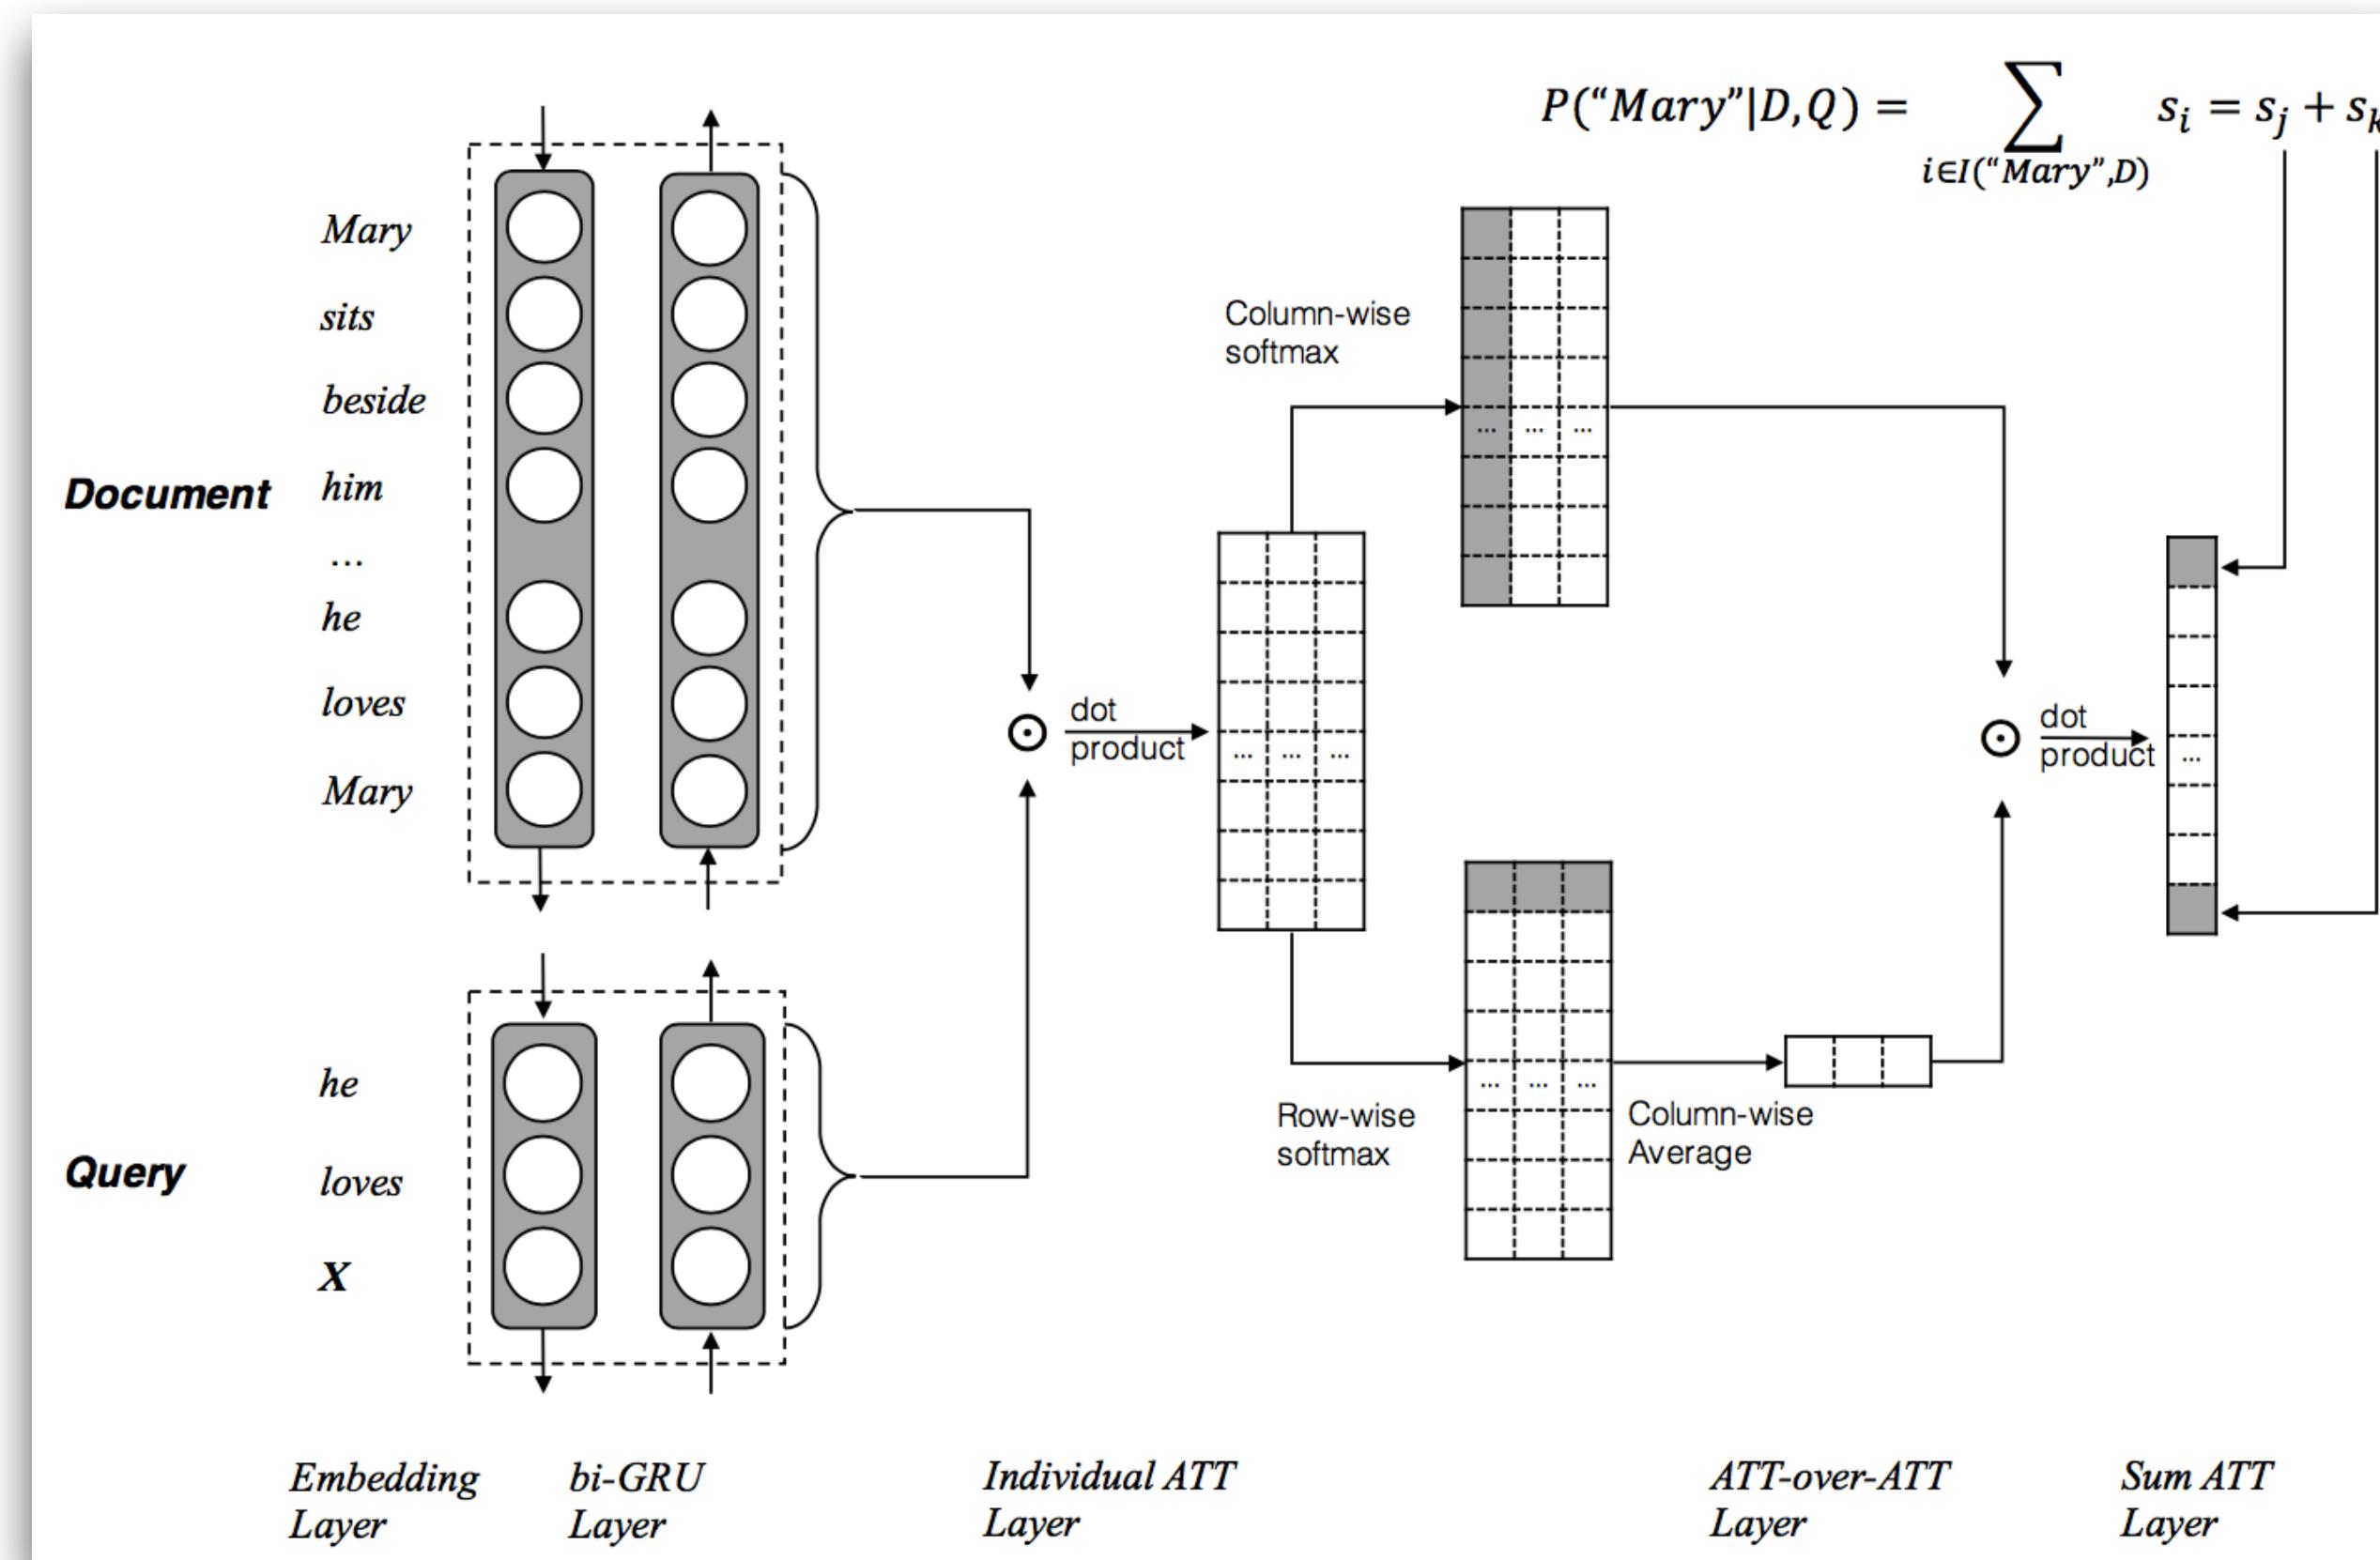

- Attention-over-Attention Neural Networks for Reading Comprehension (Cui et al., ACL2017)
- Primarily motivated by AS Reader (Kadlec et al., 2016) and CAS Reader (Cui et al., 2016)
 - Introduce matching matrix for indicating doc-query relationships
 - Mutual attention: doc-to-query and query-to-doc
 - Instead of using heuristics to combine individual attentions, we place another attention to dynamically assign weights to the individual ones
- Some of the ideas in our work has already been adopted in the follow-up works not only in cloze-style RC but also other types of RC (such as SQuAD).

AoA READER

- Model architecture at a glance

AoA READER

- Contextual Embedding

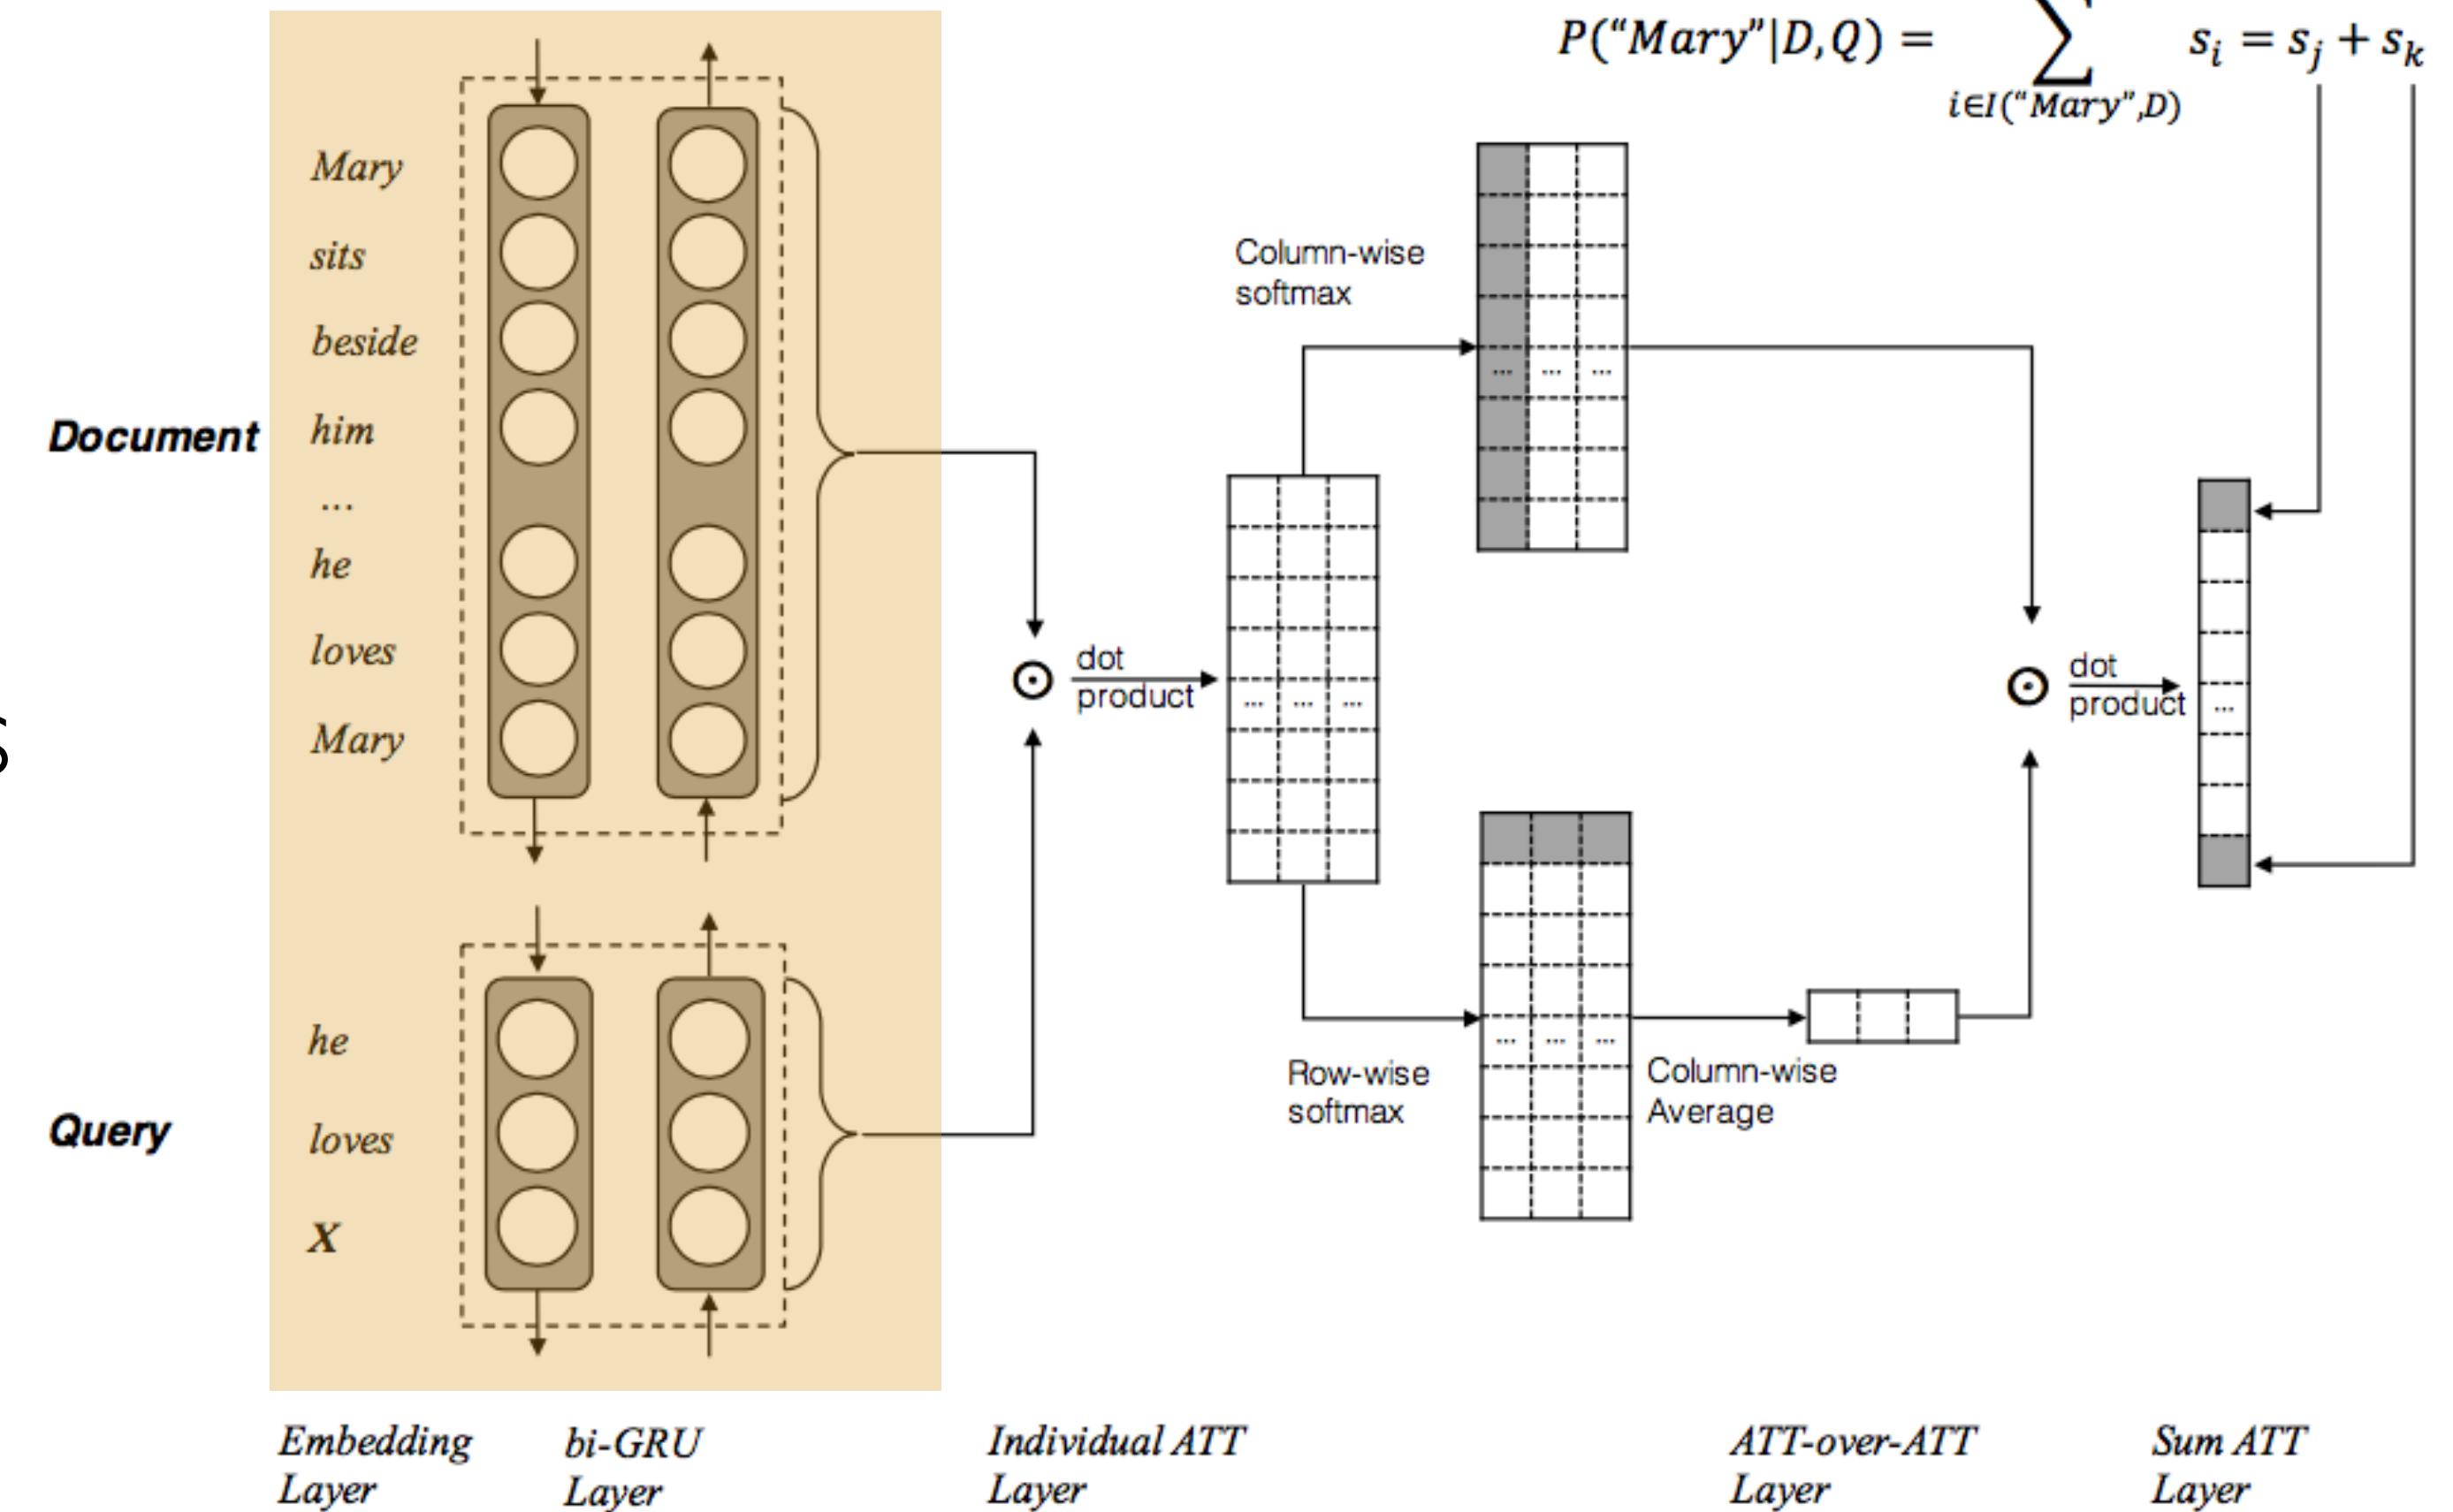

- Transform document and query into contextual representations using word-embeddings and bi-GRU units

$$e(x) = W_e \cdot x, \text{ where } x \in \mathcal{D}, \mathcal{Q} \quad (1)$$

$$\overrightarrow{h_s(x)} = \overrightarrow{GRU}(e(x)) \quad (2)$$

$$\overleftarrow{h_s(x)} = \overleftarrow{GRU}(e(x)) \quad (3)$$

$$h_s(x) = [\overrightarrow{h_s(x)}; \overleftarrow{h_s(x)}] \quad (4)$$

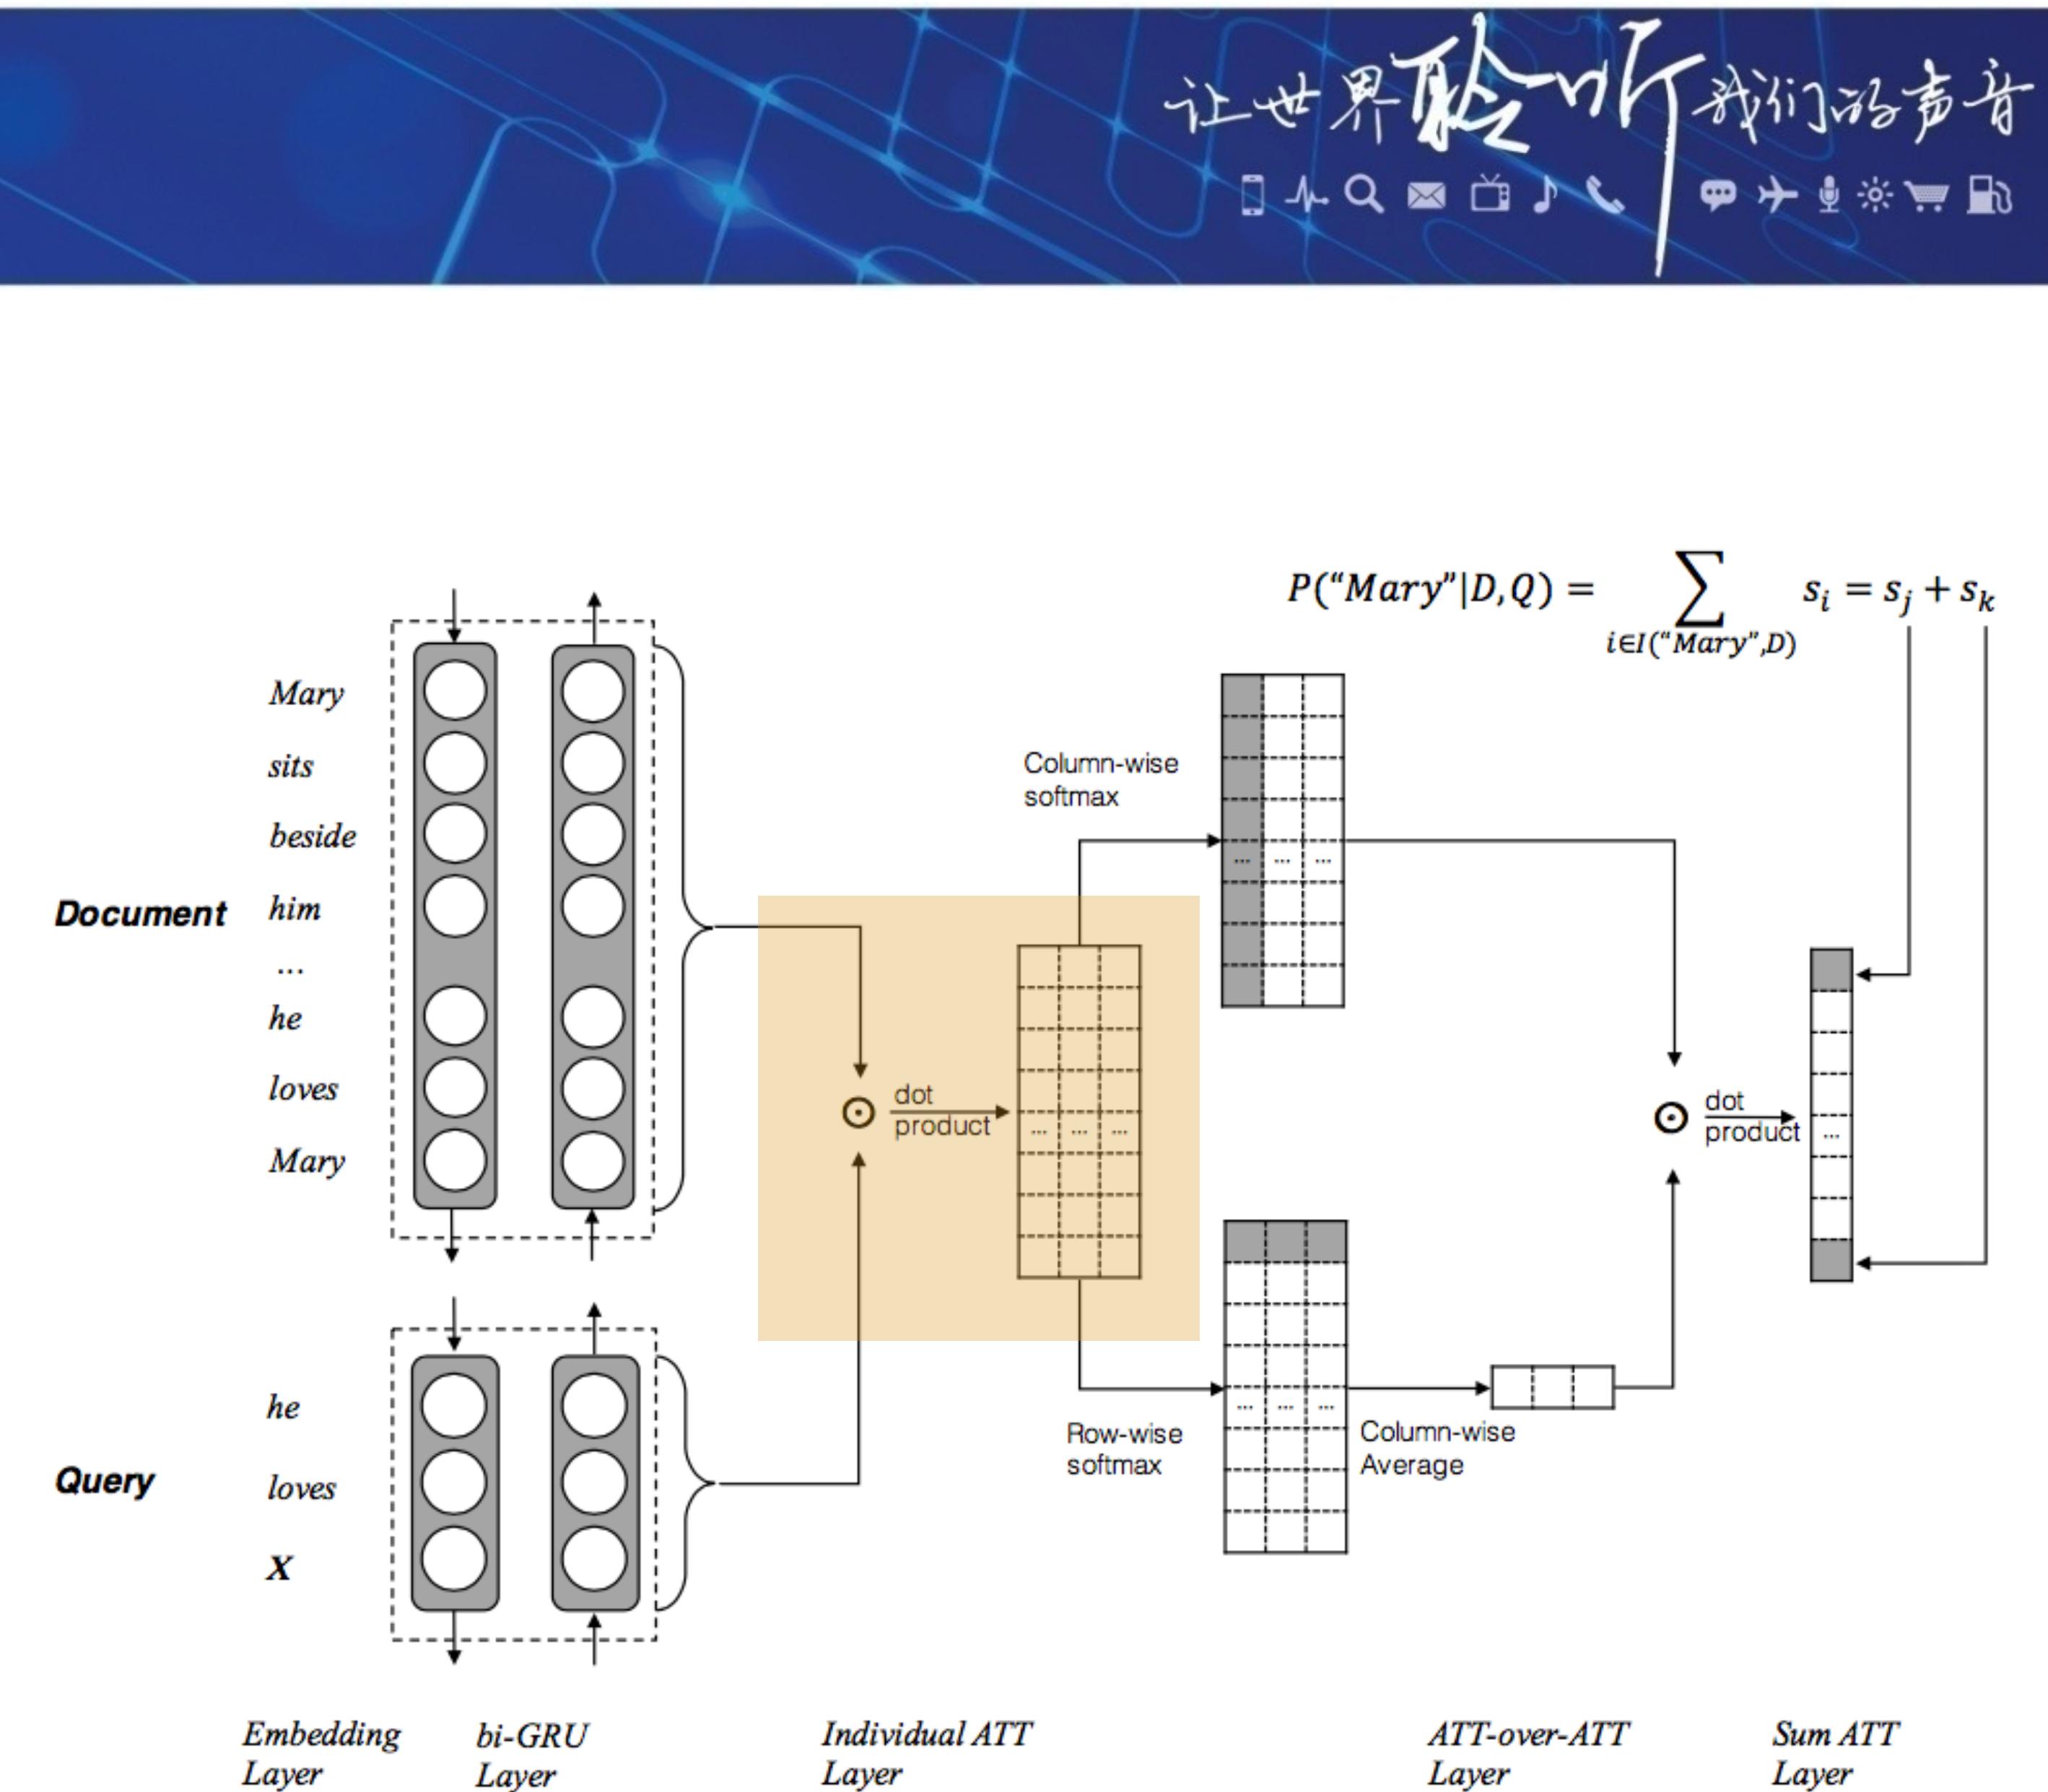

AoA READER

- **Pair-wise Matching Score**

- Calculate similarity between each document word and query word
- For simplicity, we just calculate dot product between document and query word

$$M(i, j) = h_{doc}(i)^T \cdot h_{query}(j) \quad (5)$$

AoA READER

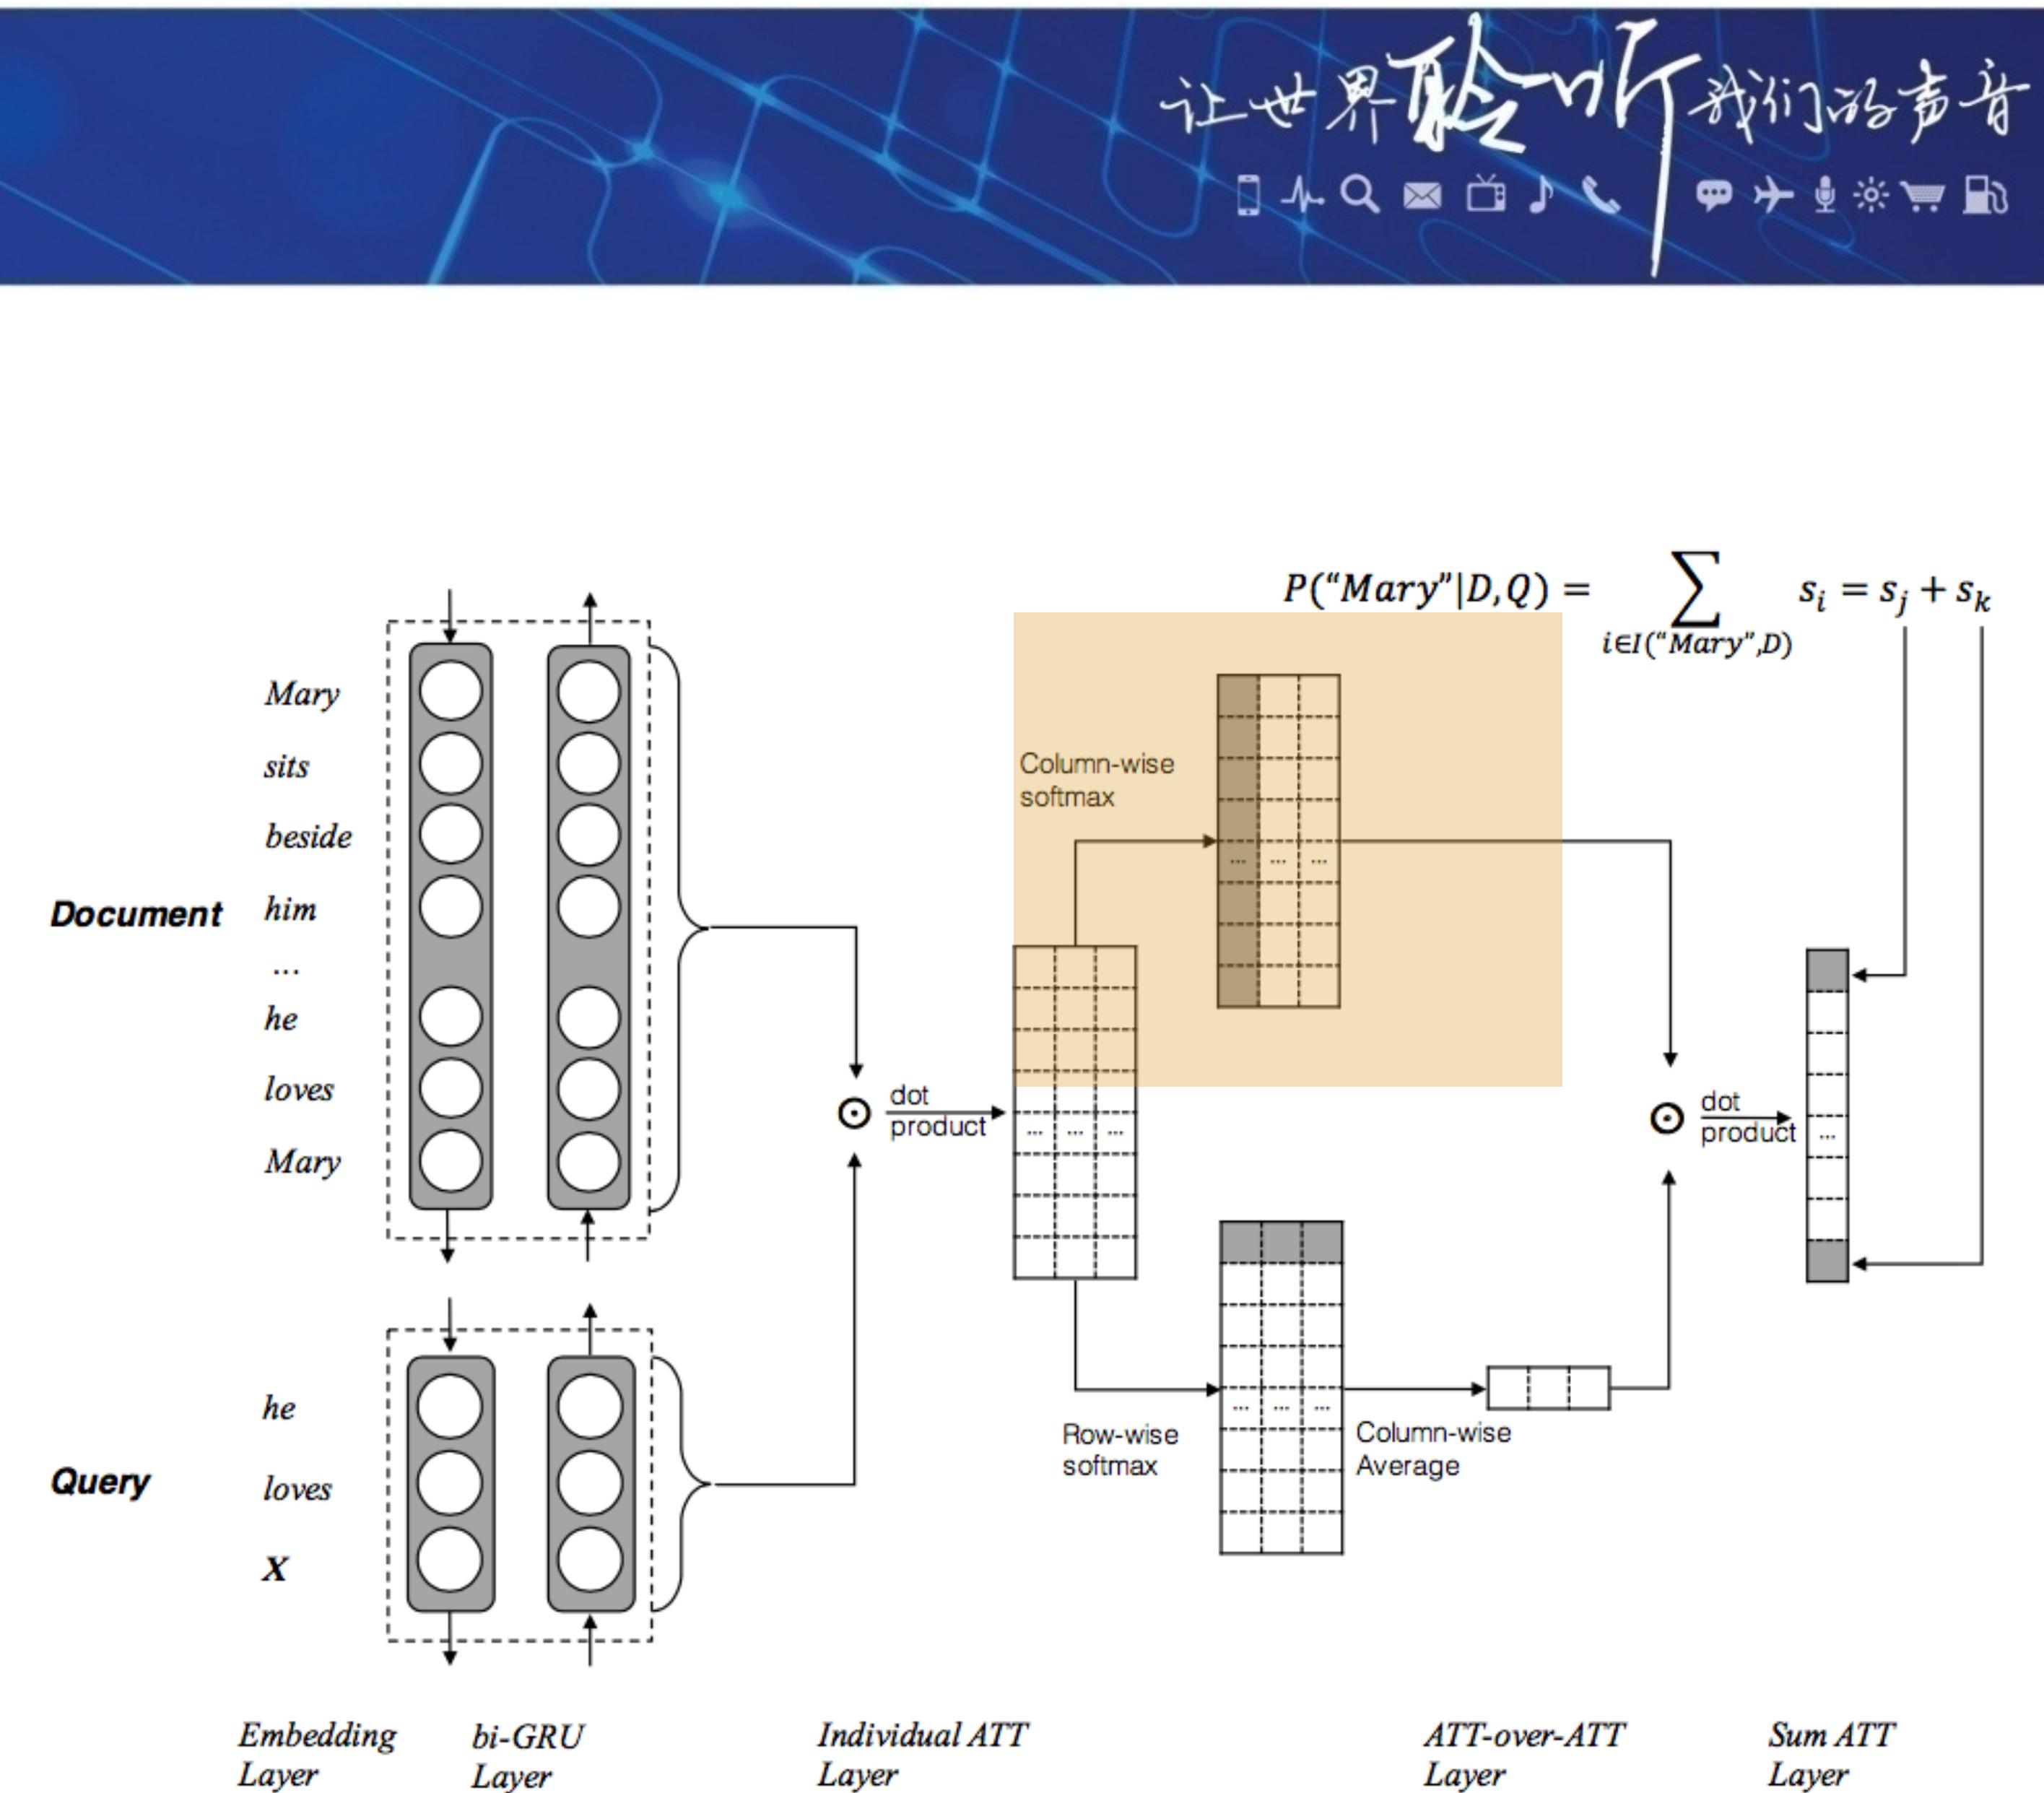

- Individual Attentions

- Calculate document-level attention with respect to each query word

$$\alpha(t) = \text{softmax}(M(1, t), \dots, M(|\mathcal{D}|, t)) \quad (6)$$

$$\alpha = [\alpha(1), \alpha(2), \dots, \alpha(|\mathcal{Q}|)] \quad (7)$$

AoA READER

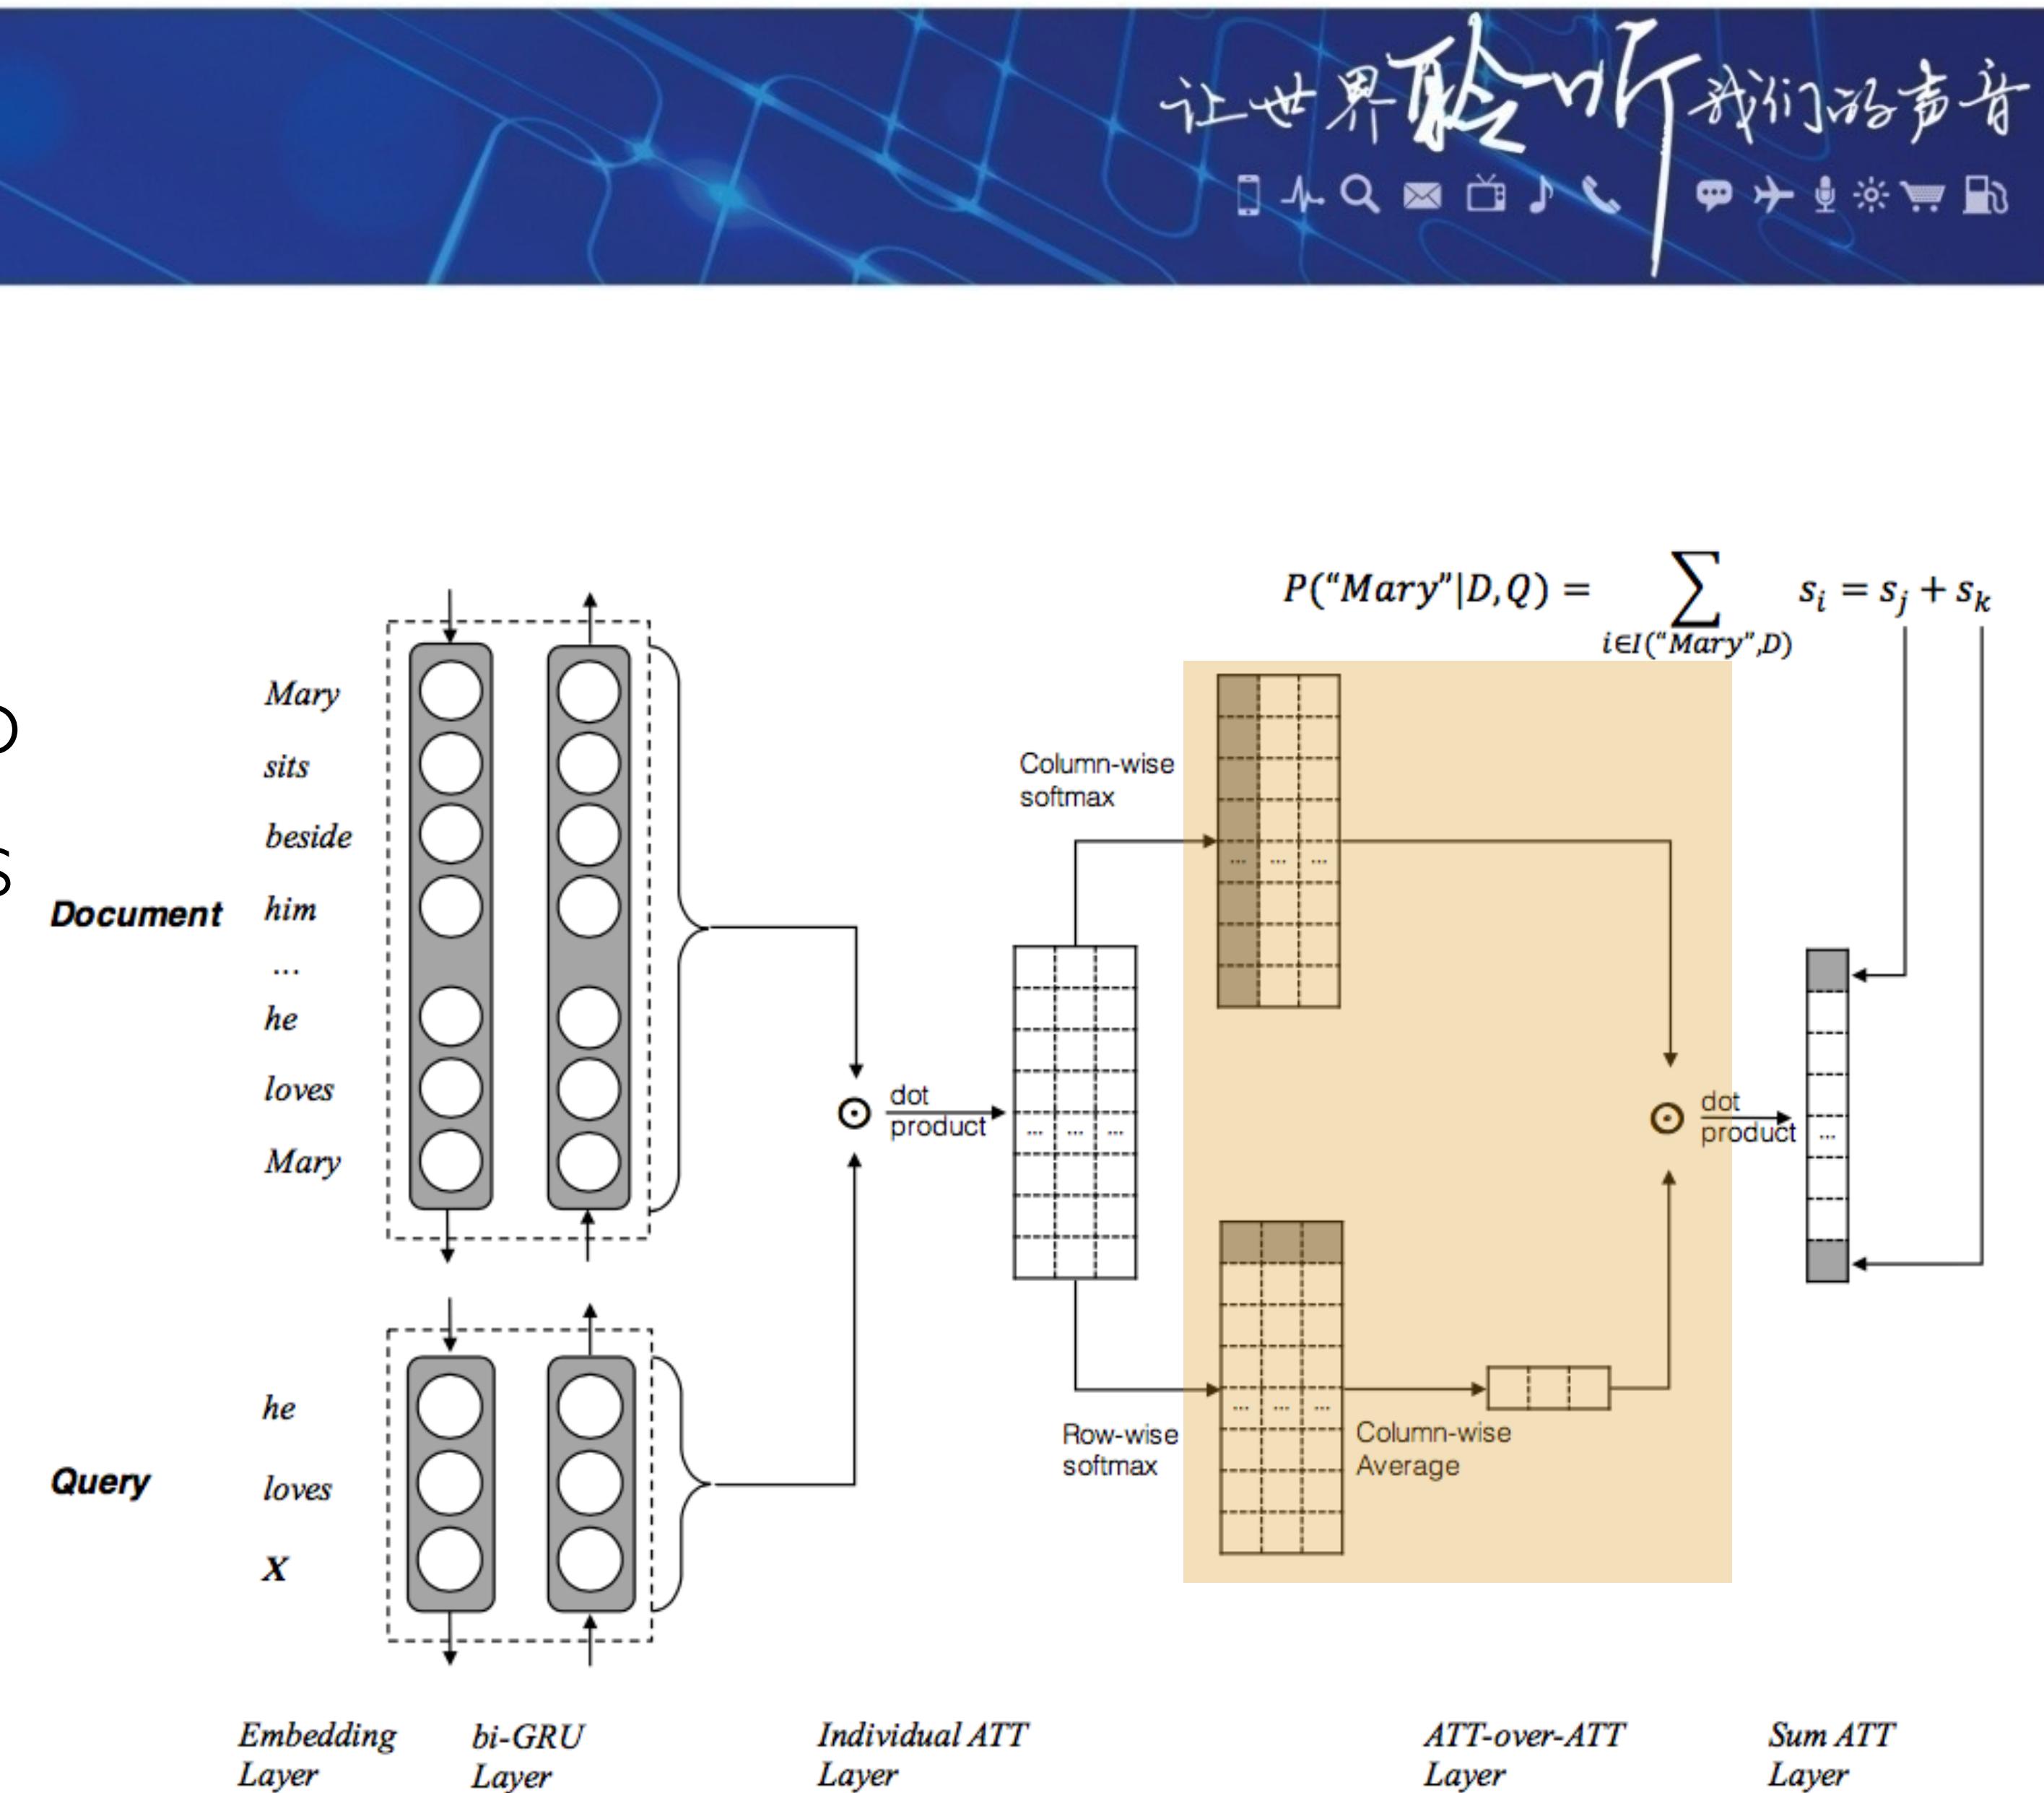

- **Attention-over-Attention**

- Dynamically assign weights to individual doc-level attentions
- Get “attended attention”

$$\beta(t) = \text{softmax}(M(t, 1), \dots, M(t, |\mathcal{Q}|)) \quad (8)$$

$$\beta = \frac{1}{n} \sum_{t=1}^{|D|} \beta(t) \quad (9)$$

$$s = \alpha^T \beta \quad (10)$$

AoA READER

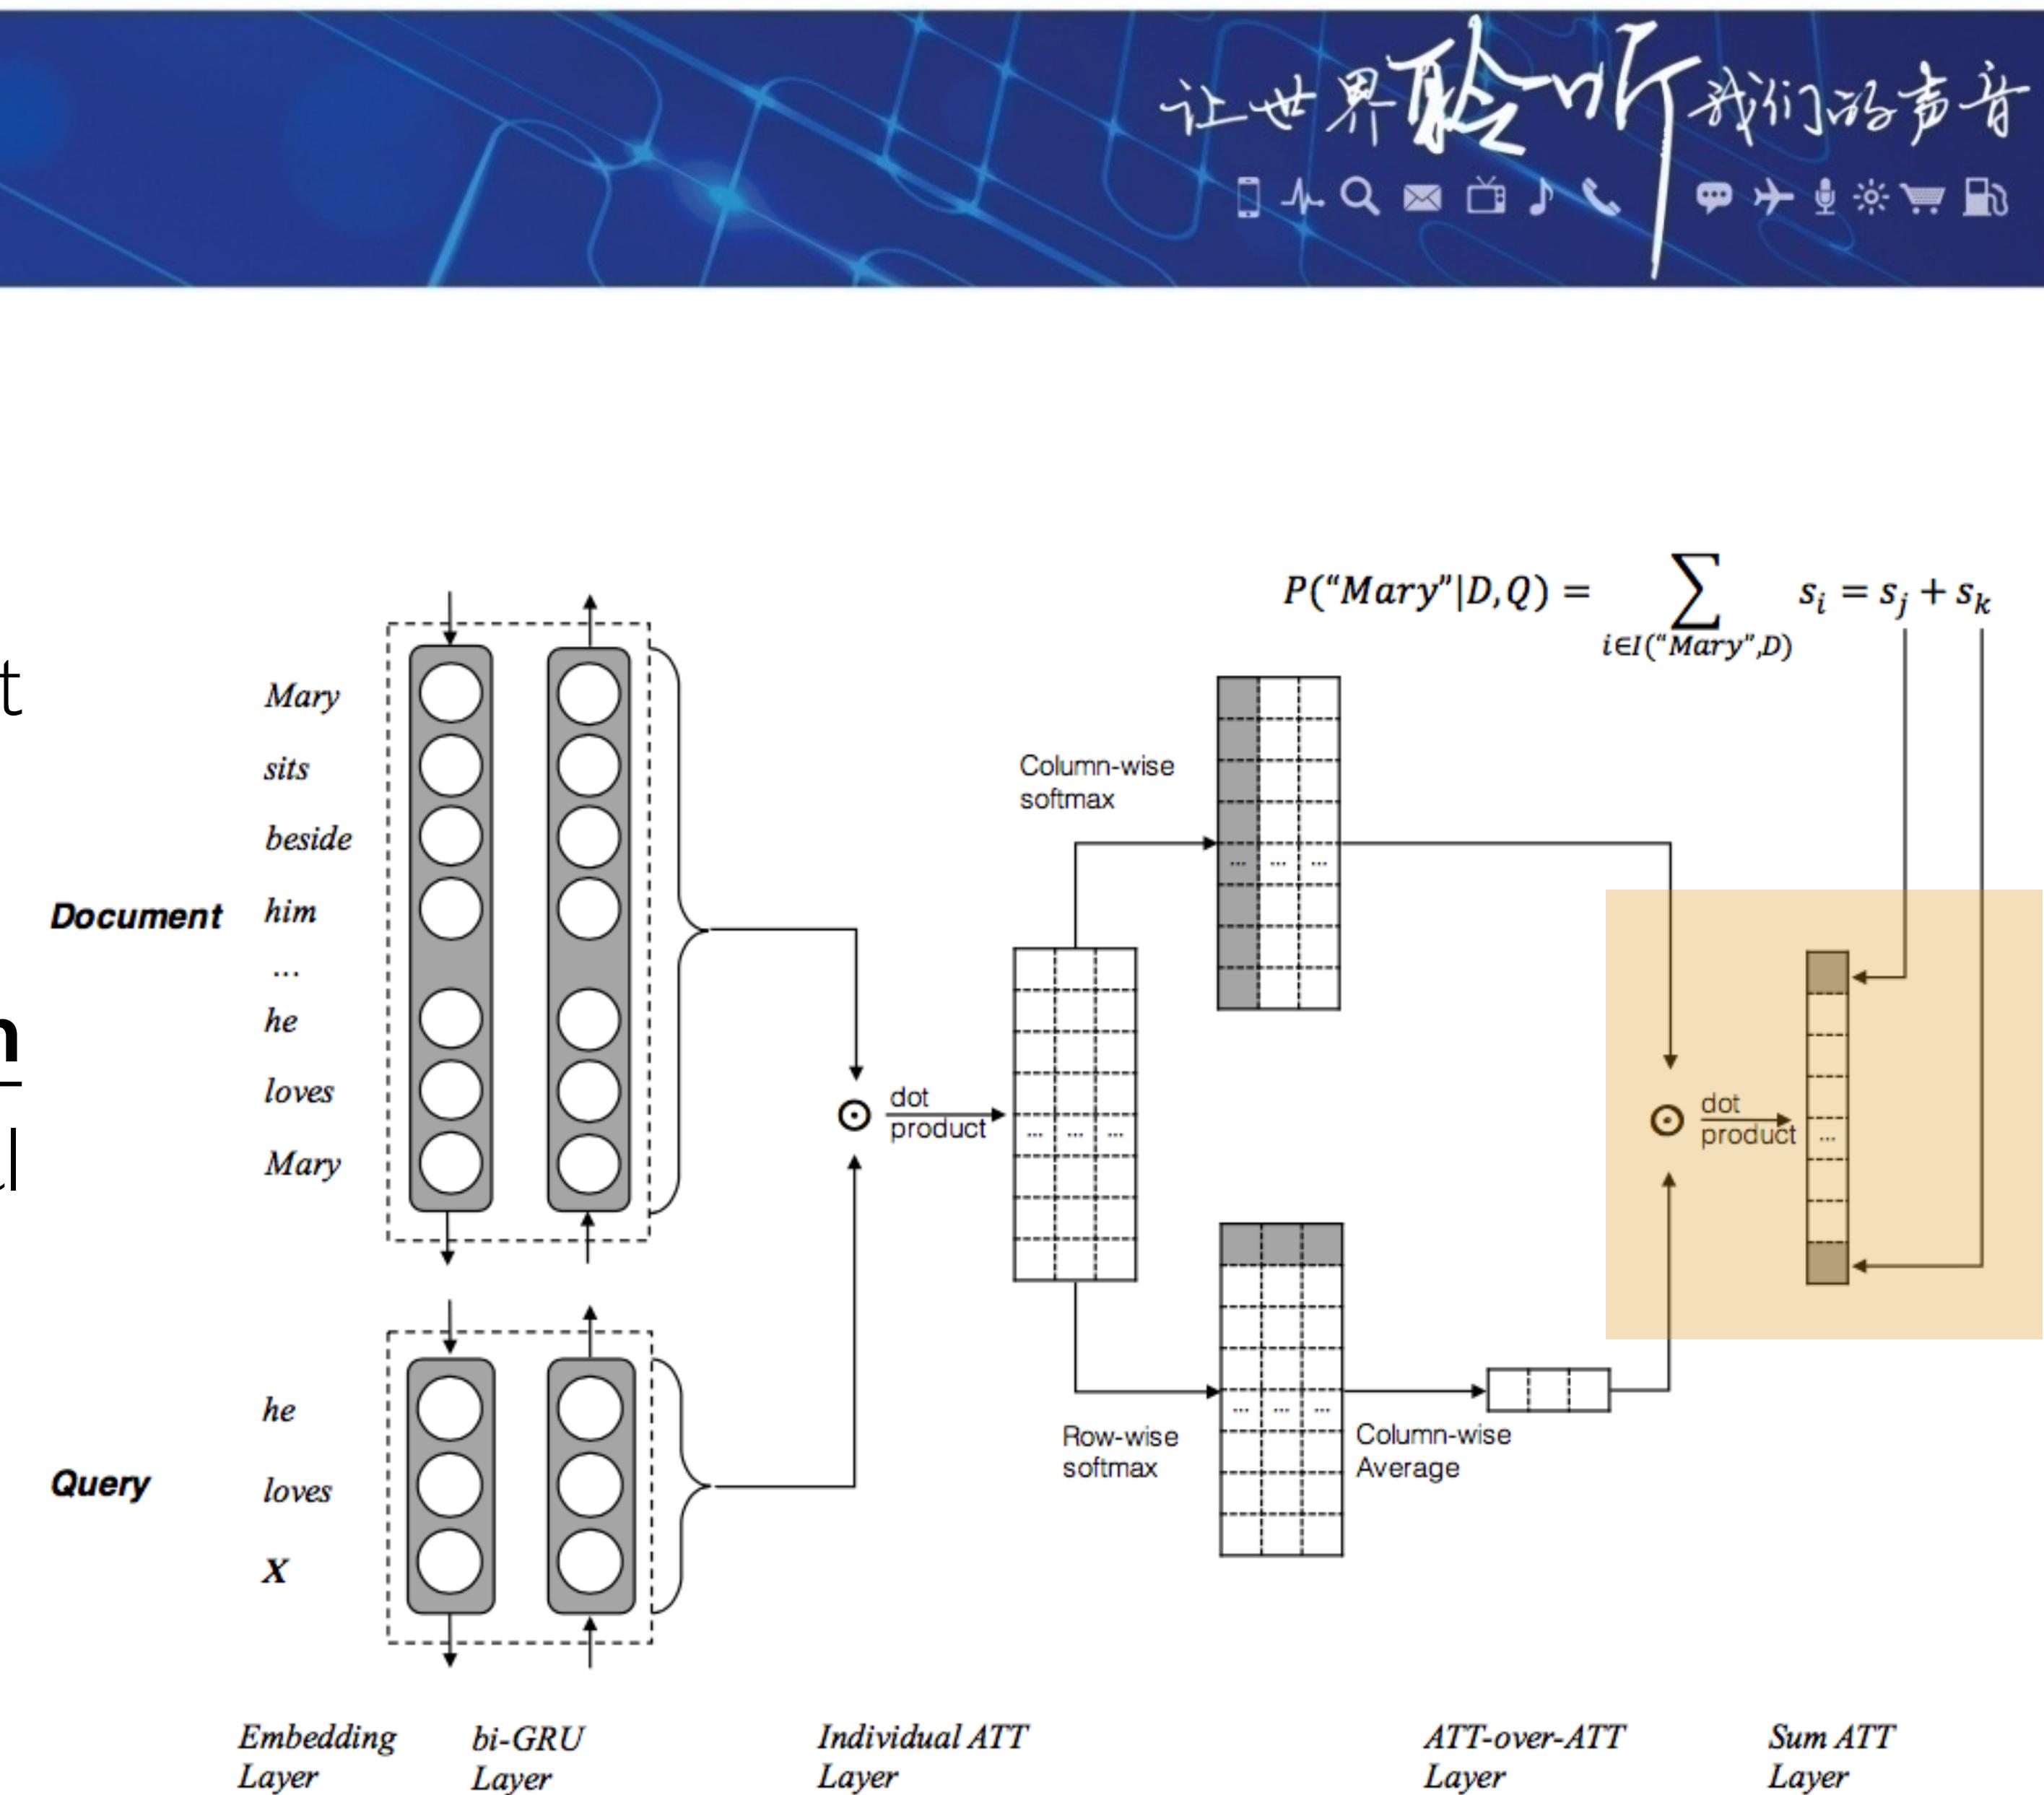

- **Final Predictions**

- Adopt Pointer Network (Vinyals et al., 2015) for predictions

- Apply **sum-attention mechanism** (Kadlec et al., 2016) to get the final probability of the answer

$$P(w|\mathcal{D}, \mathcal{Q}) = \sum_{i \in I(w, \mathcal{D})} s_i, \quad w \in V \quad (11)$$

$$\mathcal{L} = \sum_i \log(p(x)) , x \in \mathcal{A} \quad (12)$$

AoA READER

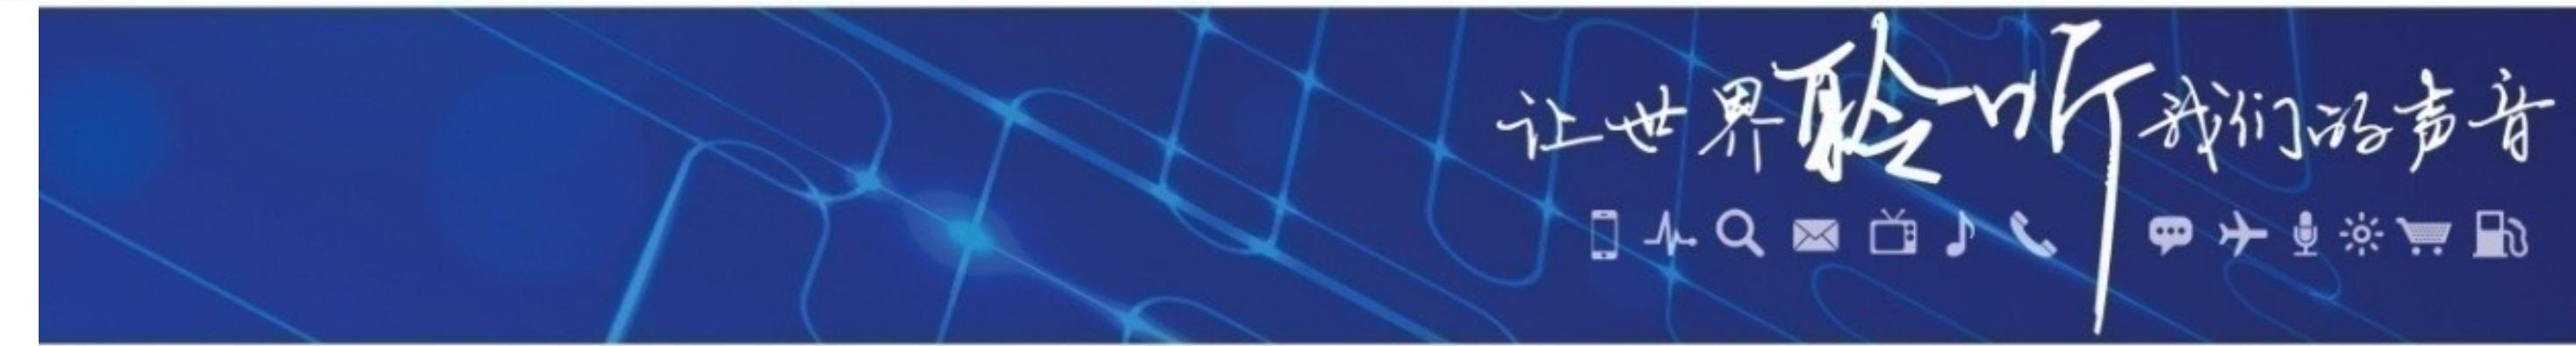

- An intuitive example
- Let say this is a story about 'Tom bought a diamond ring for his beloved girl friend...'

	Tom	loves	<blank>	.
Query-level Attention	0.5	0.3	0.15	0.05
Candidate Answers	Mary = 0.6 diamond = 0.3 beside = 0.1	Mary = 0.3 diamond = 0.5 beside = 0.2	Mary = 0.4 diamond = 0.4 beside = 0.2	Mary = 0.2 diamond = 0.4 beside = 0.4
Average Score (CAS Reader)		Mary = $(0.6+0.3+0.4+0.2) / 4 = 0.375$ diamond = $(0.3+0.5+0.4+0.4) / 4 = 0.400$ beside = $(0.1+0.2+0.2+0.4) / 4 = 0.225$		
Weighted Score (AoA Reader)		Mary = $0.6*0.5+0.3*0.3+0.4*0.15+0.2*0.05 = 0.460$ diamond = $0.3*0.5+0.5*0.3+0.4*0.15+0.4*0.05 = 0.380$ beside = $0.1*0.5+0.2*0.3+0.2*0.15+0.4*0.05 = 0.160$		

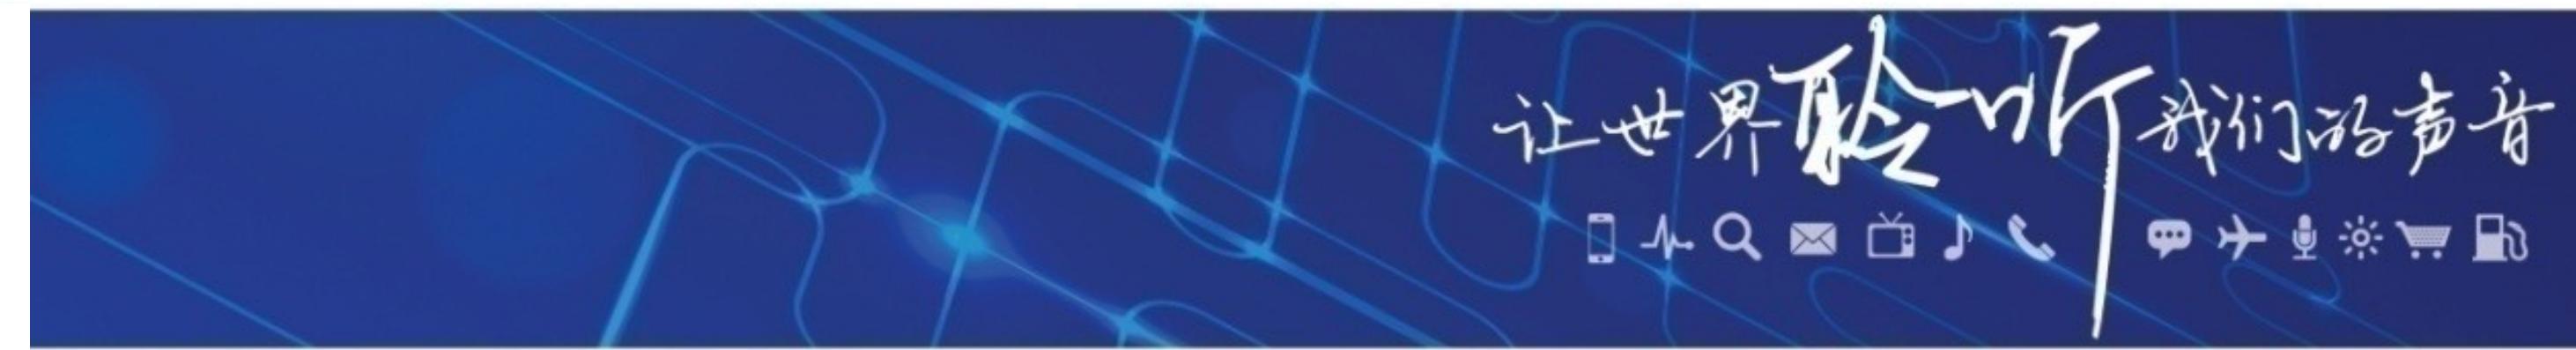

AoA READER

- **N-best re-ranking strategy for cloze-style RC**
 - Mimic the process of double-checking, in terms of fluency, grammatical correctness etc.
 - Main idea: Re-fill the candidate answer into the blank of query to form a complete sentence and using additional features to score the sentences

AoA READER

- **Single model performance**

- Significantly outperform previous works
- Re-ranking strategy substantially improve performance
- Introducing attention-over-attention mechanism instead of using heuristic merging function (Cui et al., 2016) may bring significant improvements

- **Ensemble performance**

- We use greedy ensemble approach of 4 models trained on different random seed
- Significant improvements over state-of-the-art systems

TAKEAWAYS - I

- What are the **gooooooooood** things in cloze-style RC?
 - Pointer Network is especially useful in this task, as the answer is assumed to be existed in the document, just directly PICK the right answer from document
 - A simple DOT product is capable of attention calculation
 - Mutual attention mechanism could bring additional information, using both doc-to-query and query-to-doc attentions
 - Re-ranking strategy with traditional N-gram LMs could substantially improve cloze-style RC performance due to its nature

OUTLINE

- Introduction to Machine Reading Comprehension (MRC)
- **(Almost) Recent Progress of MRC**
 - Cloze-style MRC
 - **Complex MRC**
- Future Prospects
- Conclusion

COMPLEX MRC

- **Complex MRC (informal definition)**
- Including following types
 - Span extraction from passage (phrase, sentences etc.)
 - Generate answer directly
 - Choose correct answer from candidate choices (A/B/C/D)
- Span extraction is the most popular type in recent studies

SQuAD

- SQuAD: 100,000+ Questions for Machine Comprehension of Text (Rajpurkar et al., EMNLP2016)
- Dataset Features
 - More Difficult: word-level answers → words, phrases or even sentences
 - High Quality: automatically generated data → human-annotated data
 - Much Bigger: 100K+ questions, bigger than previous human-annotated RC datasets

- **Sample of SQuAD**

- **Document:** Passages from Wikipedia pages, segment into several small paragraphs
- **Query:** Human-annotated, including various query types (what/when/where/who/how/why etc.)
- **Answer:** Continuous segments (text spans) in the passage, which has a larger search space, and much harder to answer than cloze-style RC

Oxygen

The Stanford Question Answering Dataset

In the meantime, on August 1, 1774, an experiment conducted by the British clergyman Joseph Priestley focused sunlight on mercuric oxide (HgO) inside a glass tube, which liberated a gas he named "dephlogisticated air". He noted that candles burned brighter in the gas and that a mouse was more active and lived longer while breathing it. After breathing the gas himself, he wrote: "The feeling of it to my lungs was not sensibly different from that of common air, but I fancied that my breast felt peculiarly light and easy for some time afterwards." Priestley published his findings in 1775 in a paper titled "An Account of Further Discoveries in Air" which was included in the second volume of his book titled Experiments and Observations on Different Kinds of Air. Because he published his findings first, Priestley is usually given priority in the discovery.

Why is Priestley usually given credit for being first to discover oxygen?
Ground Truth Answers: published his findings first he published his findings first he published his findings first he published his findings first Because he published his findings first

RELATED WORKS

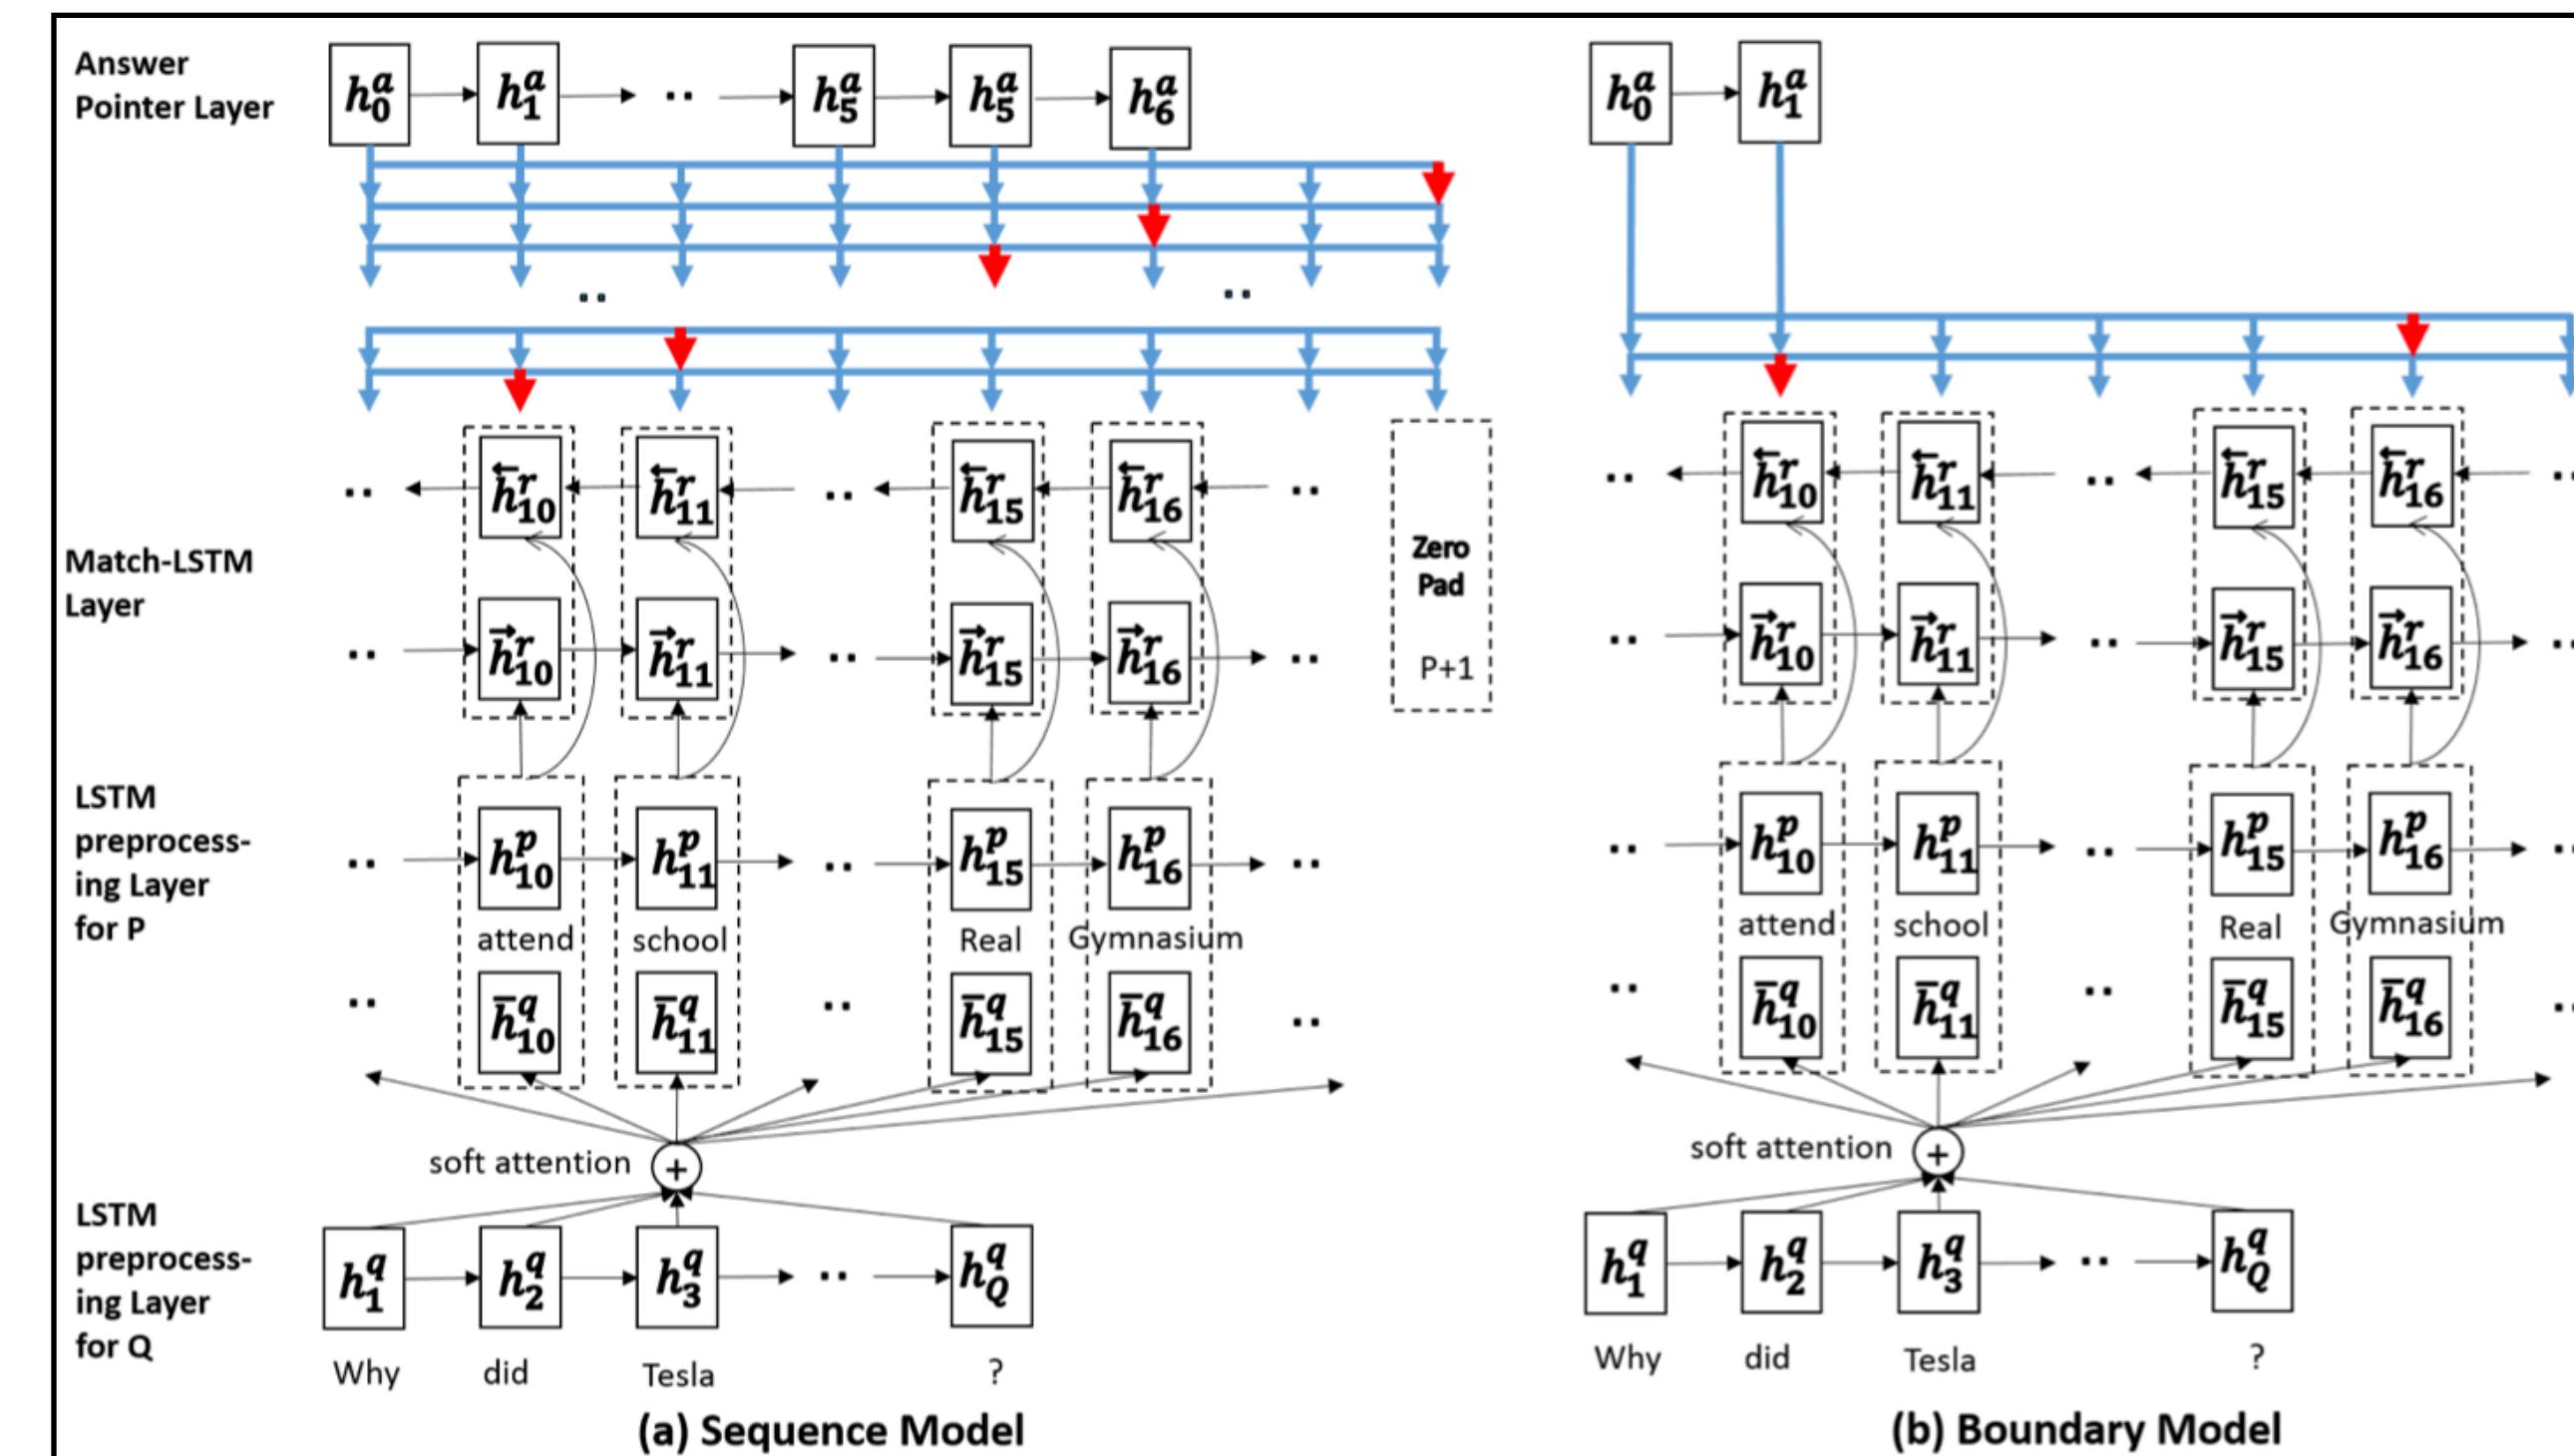

- A large amount of researchers are investigating SQuAD after its release. Tons of models are proposed.
- **Representative Works**

MATCH-LSTM

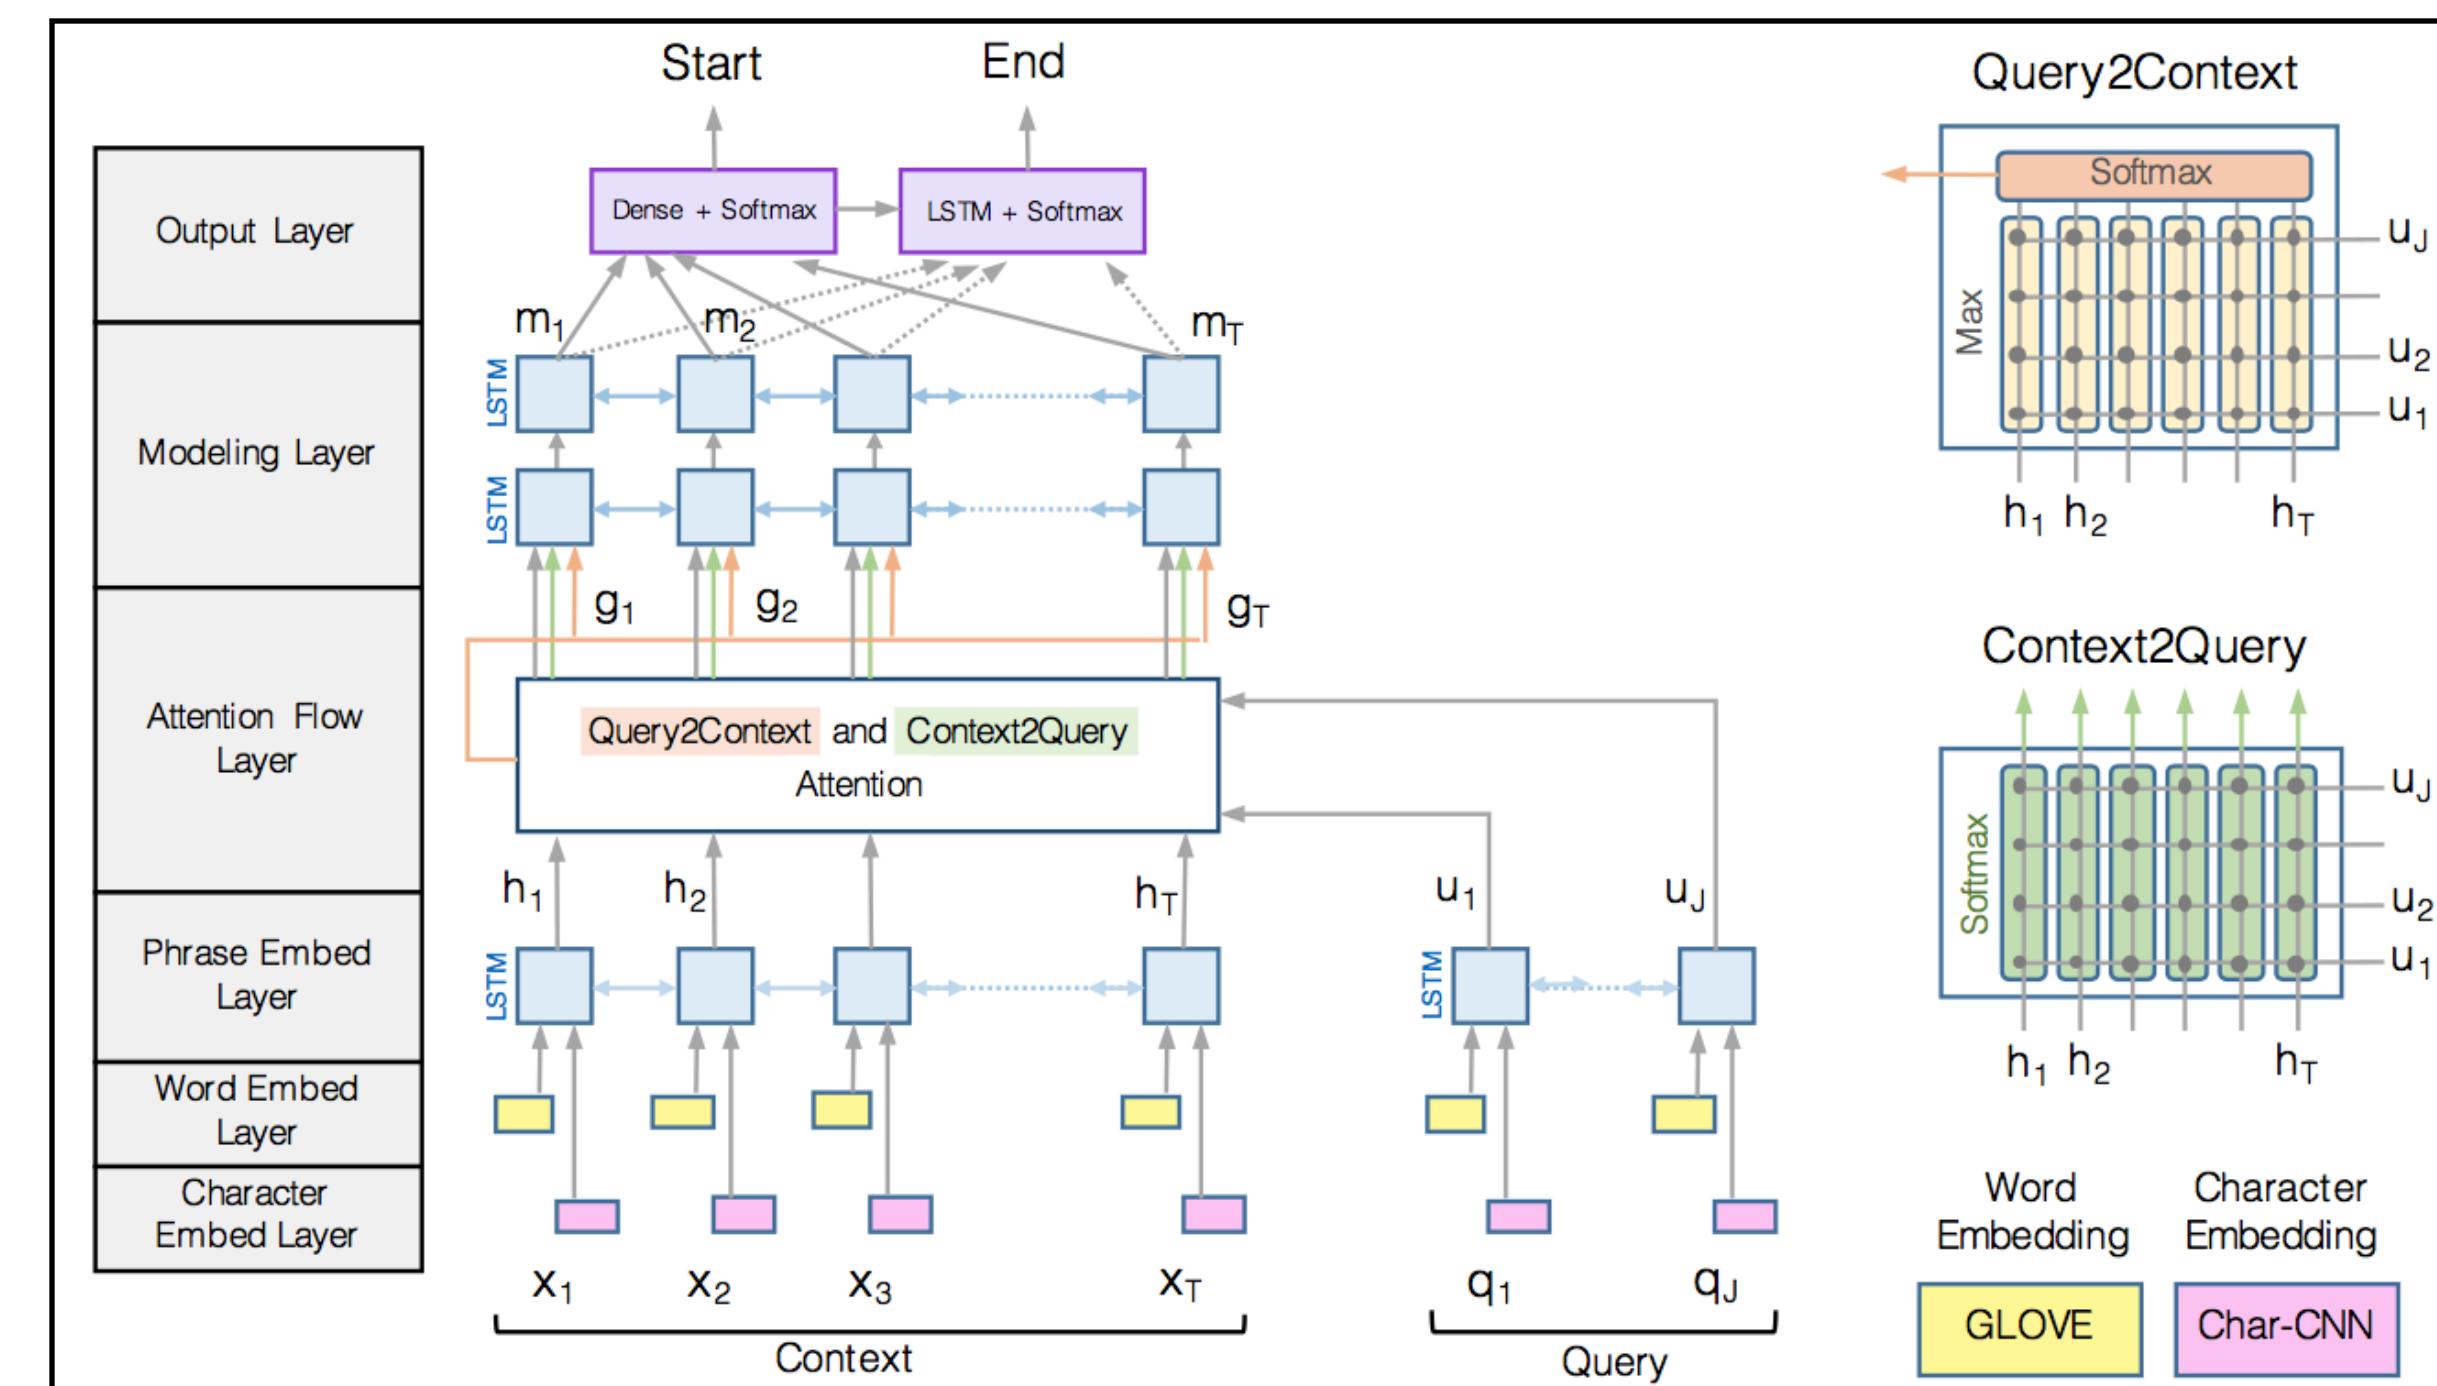

- Machine Comprehension using Match-LSTM and Answer Pointer (Wang and Jiang, 2016)
- Propose to use Pointer Network to directly output start and end position in document

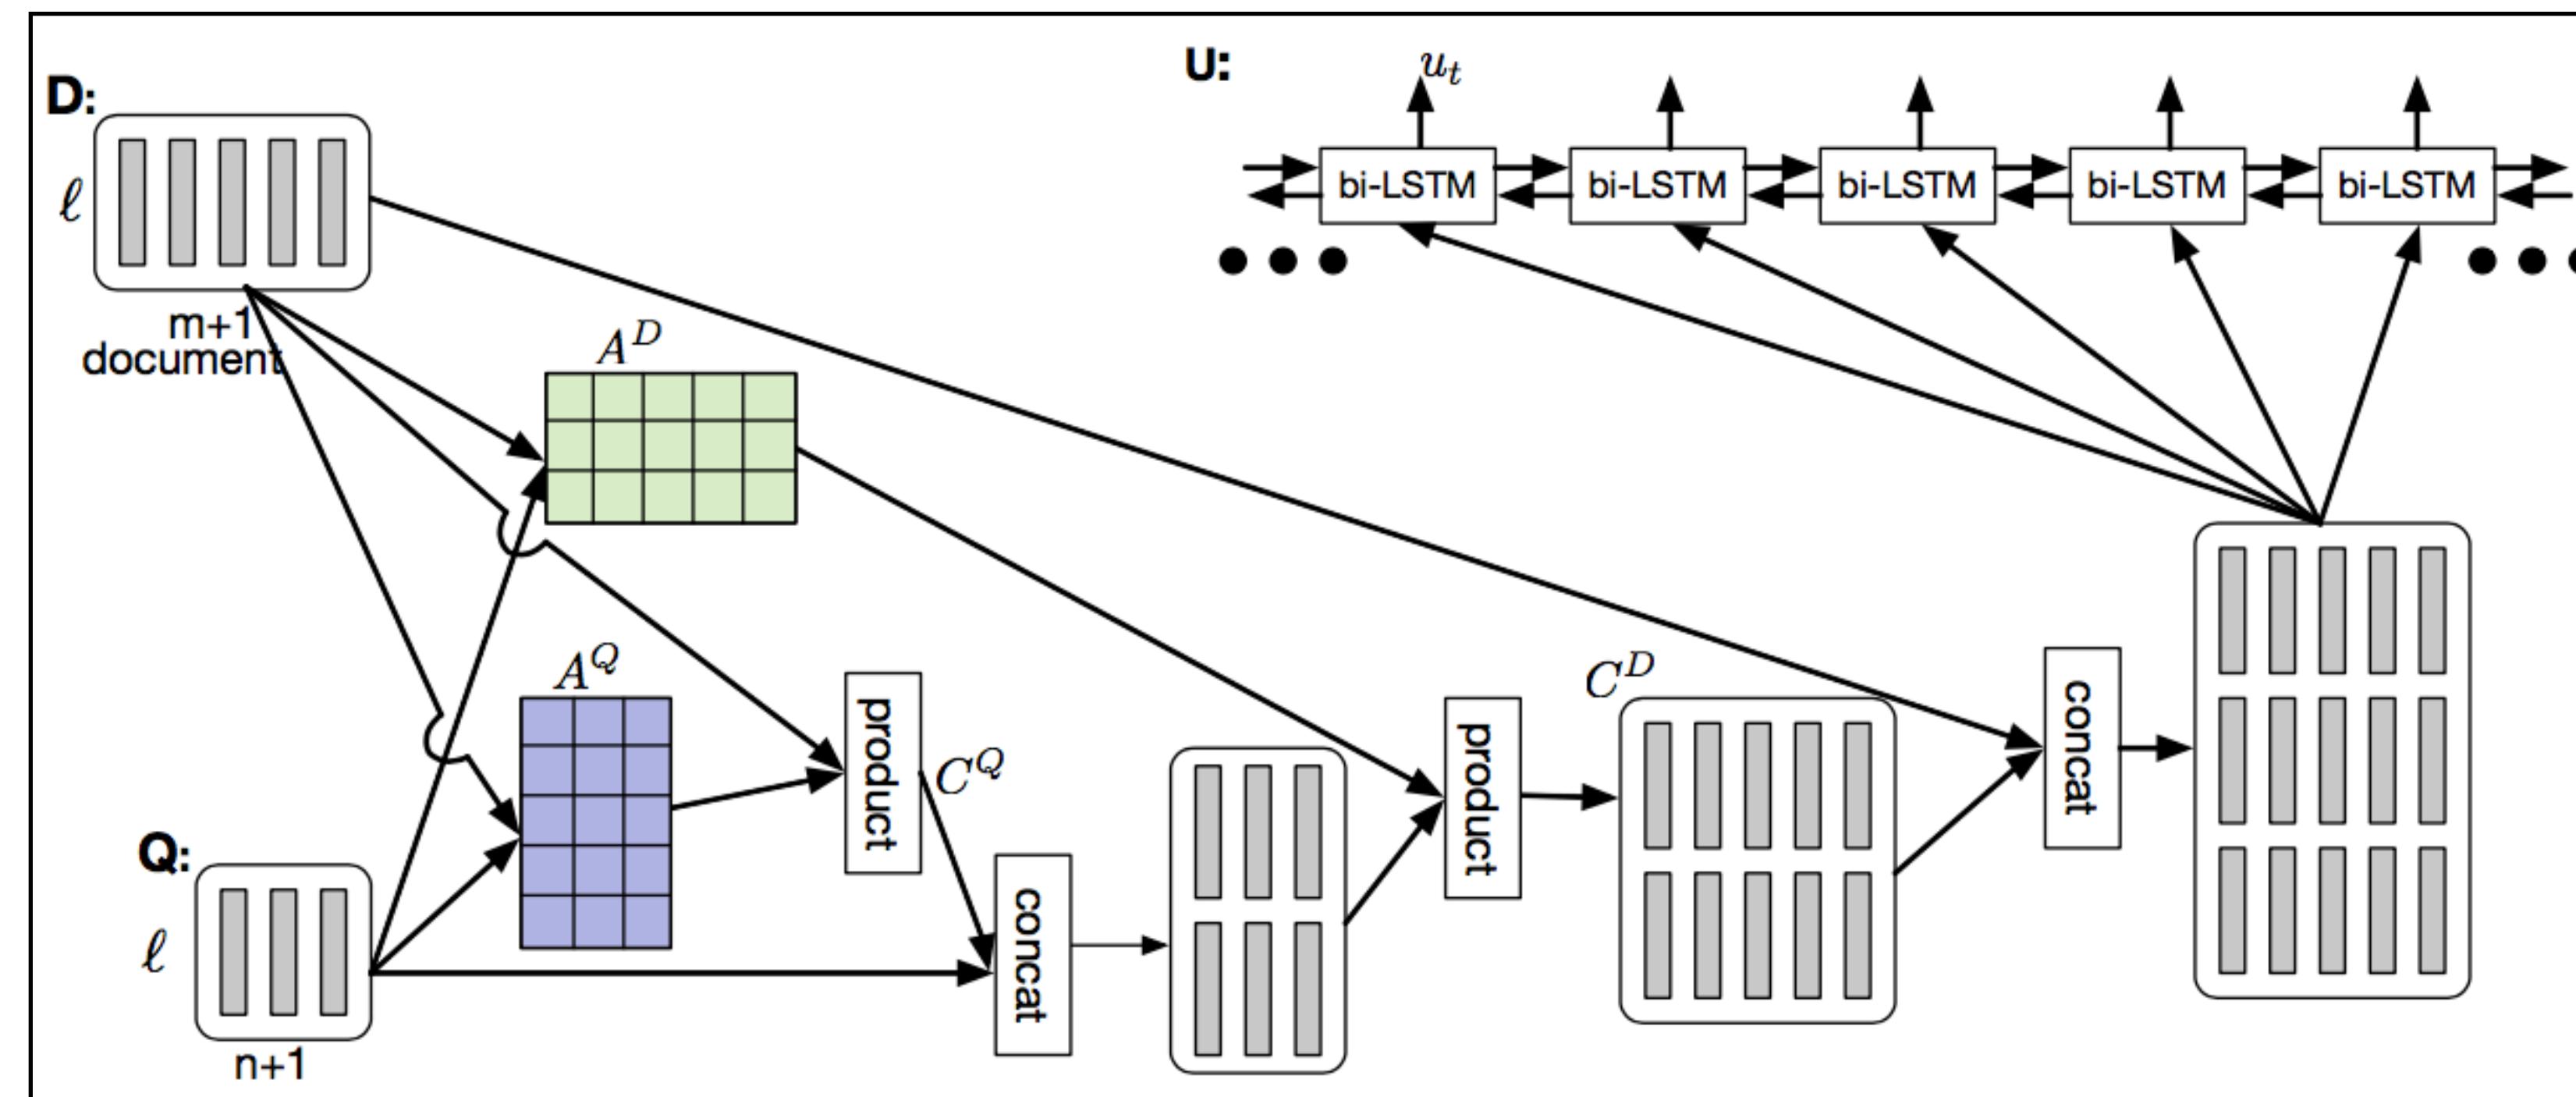

BIDAF

- Bi-Directional Attention Flow for Machine Comprehension (Seo et al., 2016)
- Propose bi-directional attention, which has become a **stereotype** in SQuAD task

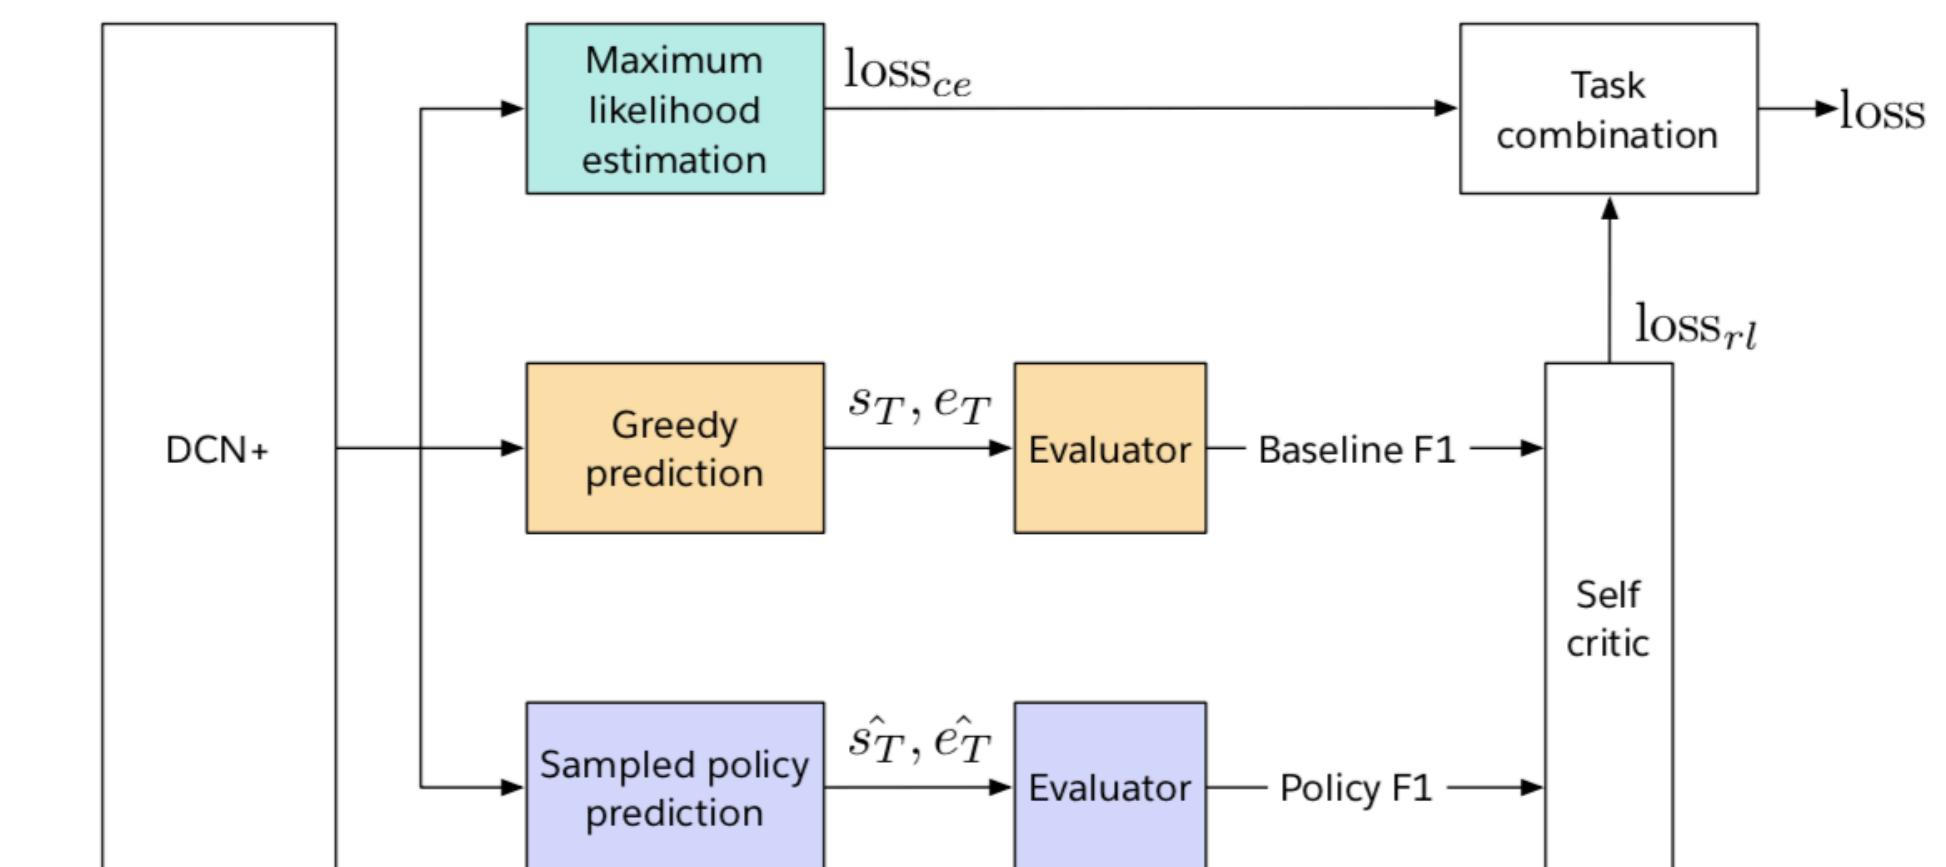

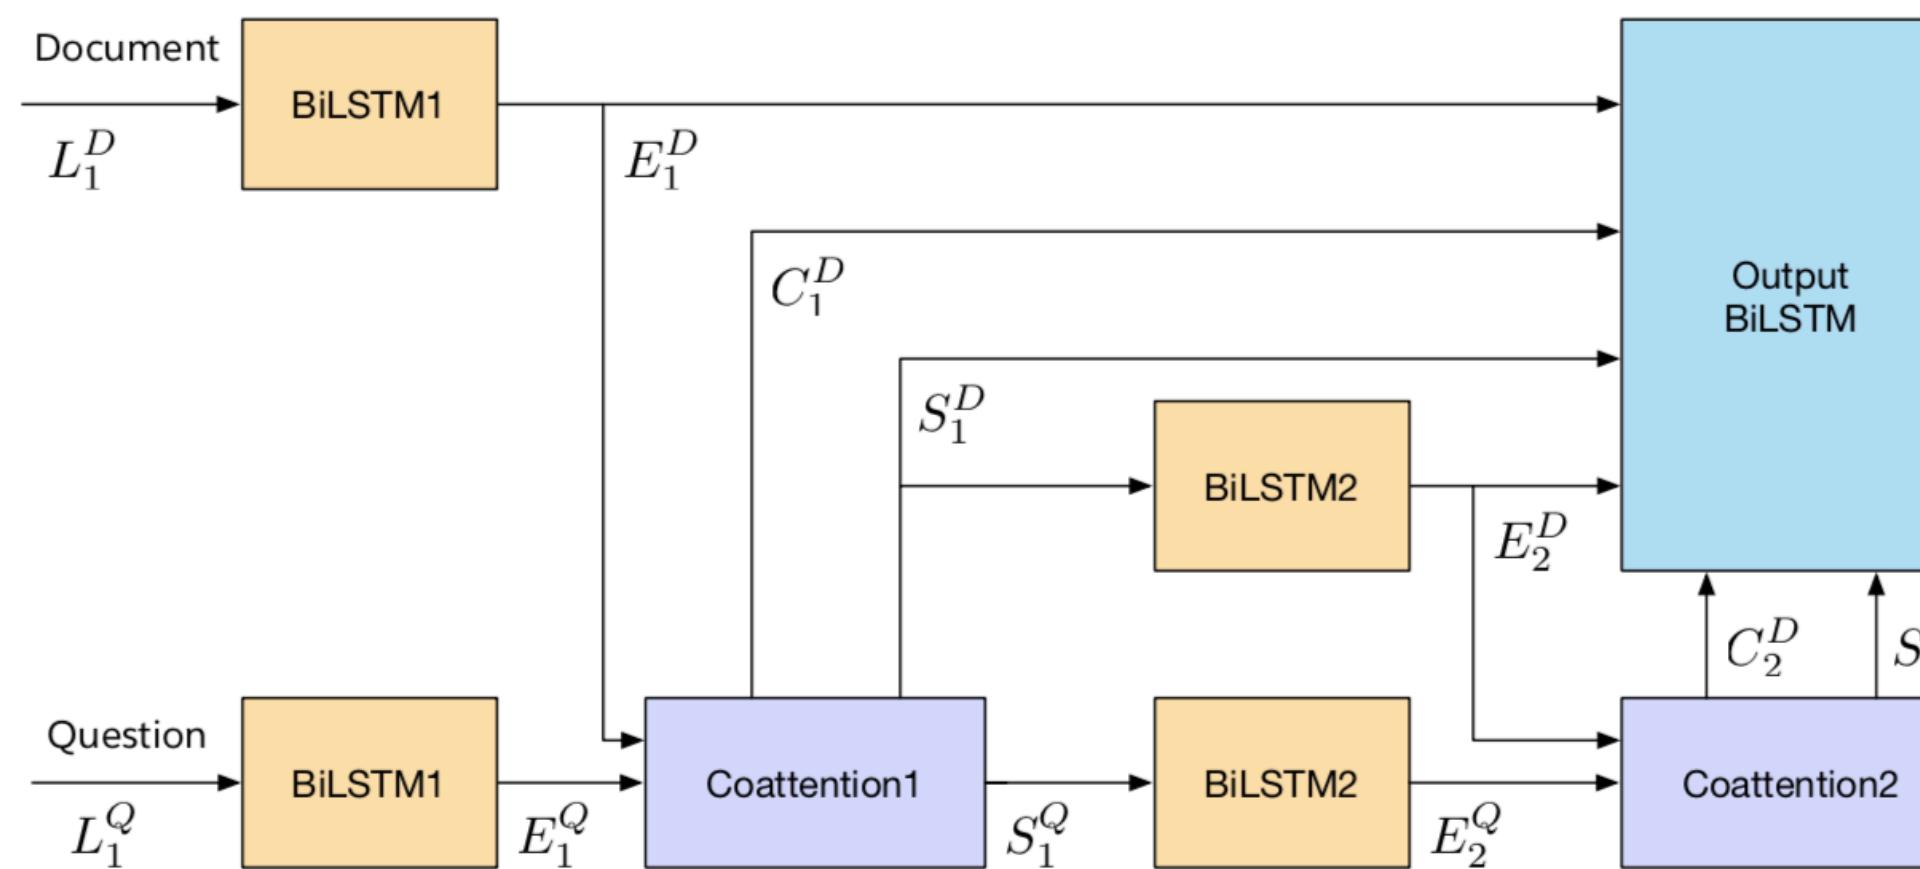

- Dynamic Coattention Networks for Question Answering (Xiong et al., 2016)
- Propose dynamic coattention model, iterative pointer mechanism

DCN+

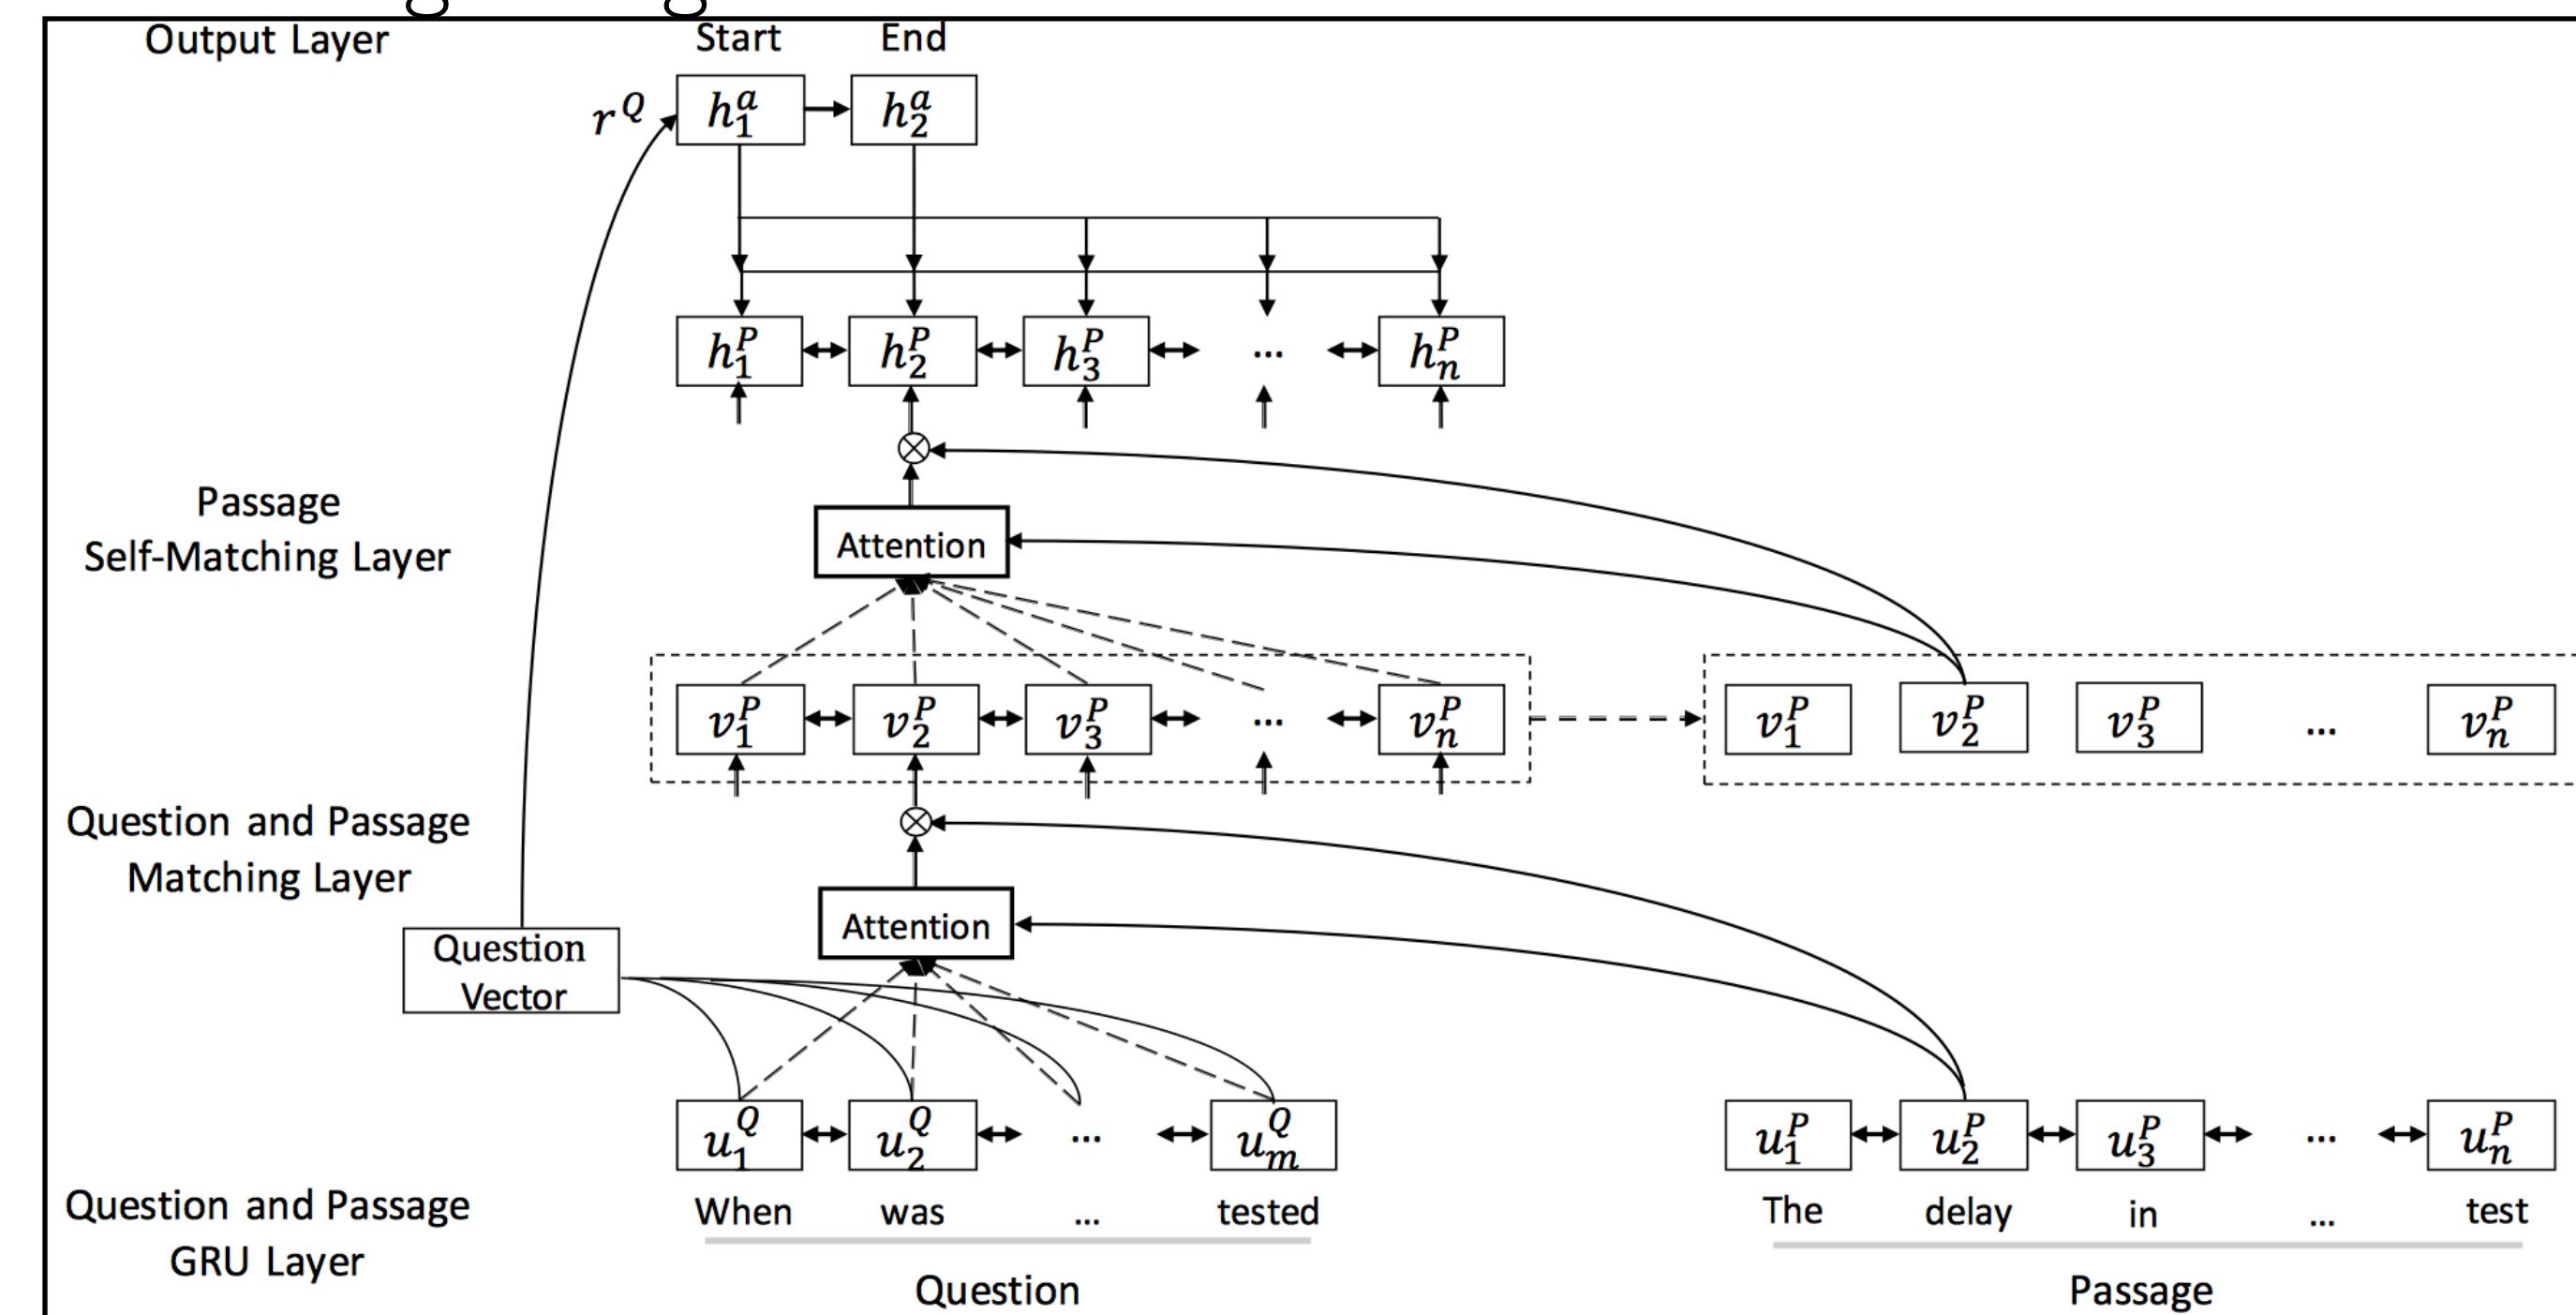

- DCN+: Mixed Objective and Deep Residual Coattention for Question Answering (Xiong et al., 2017)
- Utilize deep self-attention and residual networks
- Mixed objective that combines cross entropy loss with self-critical policy learning

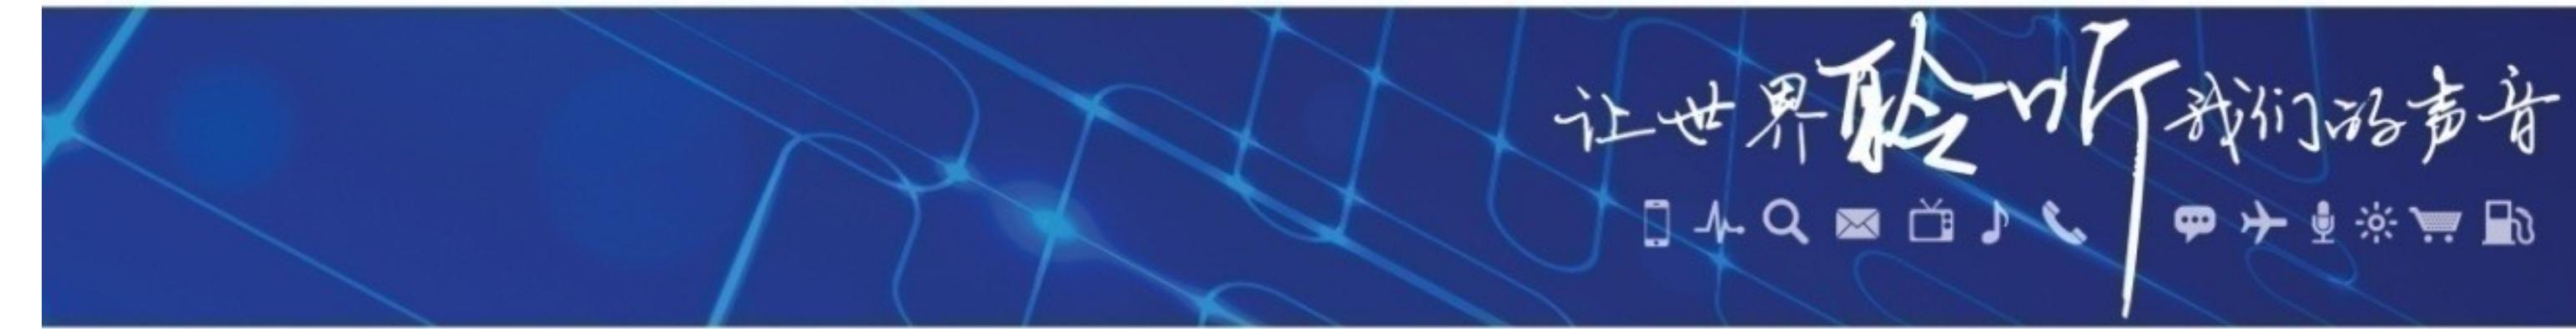

R-NET

- Gated Self-Matching Networks for Reading Comprehension and Question Answering (Wang et al., 2017)
- Propose to use self-matching and gated attention

OUR WORK

- Interactive AoA Reader: an improved version of AoA Reader (Cui et al., 2017)
- We have been working on SQuAD task for months, and get on the 1st place in the late July, 2017

Rank	Model	EM	F1
1 Jul 2017	Interactive AoA Reader (ensemble) <i>Joint Laboratory of HIT and iFLYTEK Research</i>	77.845	85.297
2 Jun 2017	r-net (ensemble) Microsoft Research Asia http://aka.ms/rnet	77.688	84.666
3 Jul 2017	r-net (single model) Microsoft Research Asia http://aka.ms/rnet	75.705	83.496
3 Jul 2017	smarnet (ensemble) <i>Eigen Technology & Zhejiang University</i>	75.989	83.475
4 Jul 2017	DCN+ (single model) <i>Salesforce Research</i>	74.866	82.806

*As of August 1, 2017. <http://stanford-qa.com>

Rank	Model	EM	F1
1 Oct 17, 2017	Interactive AoA Reader+ (ensemble) <i>Joint Laboratory of HIT and iFLYTEK</i>	79.083	86.450
2 Oct 24, 2017	FusionNet (ensemble) <i>Microsoft Business AI Solutions Team</i>	78.978	86.016
3 Nov 03, 2017	BiDAF + Self Attention + ELMo (single model) <i>Allen Institute for Artificial Intelligence</i>	78.580	85.833
3 Oct 12, 2017	r-net (ensemble) Microsoft Research Asia http://aka.ms/rnet	78.926	85.722
3 Oct 22, 2017	DCN+ (ensemble) <i>Salesforce Research</i>	78.852	85.996

*As of November 13, 2017. <http://stanford-qa.com>

OUR WORK

- As our work is not published, we cannot reveal the detailed architecture and algorithms
- But...we can tell you a little bit of the techniques that adopted (published techniques with modifications)
 - Char+Word level embeddings
 - Multiple hops for representation refining
 - Incorporating historical attentions
- And more? Stay tuned for our papers!

TAKEAWAYS - III

- What are the goooooooood things in these models?
 - Old things still works
 - Pointer Network for directly predict start/end position in document
 - Mutual attention mechanism
 - What's new?
 - Word-level + Char-level embeddings
 - More complex attention calculation with multiple attended representations

OUTLINE

- Introduction to Machine Reading Comprehension (MRC)
- (Almost) Recent Progress of MRC
 - Cloze-style MRC
 - Span Extraction MRC
- **Future Prospects**
- Conclusion

RECENT HIGHLIGHTS

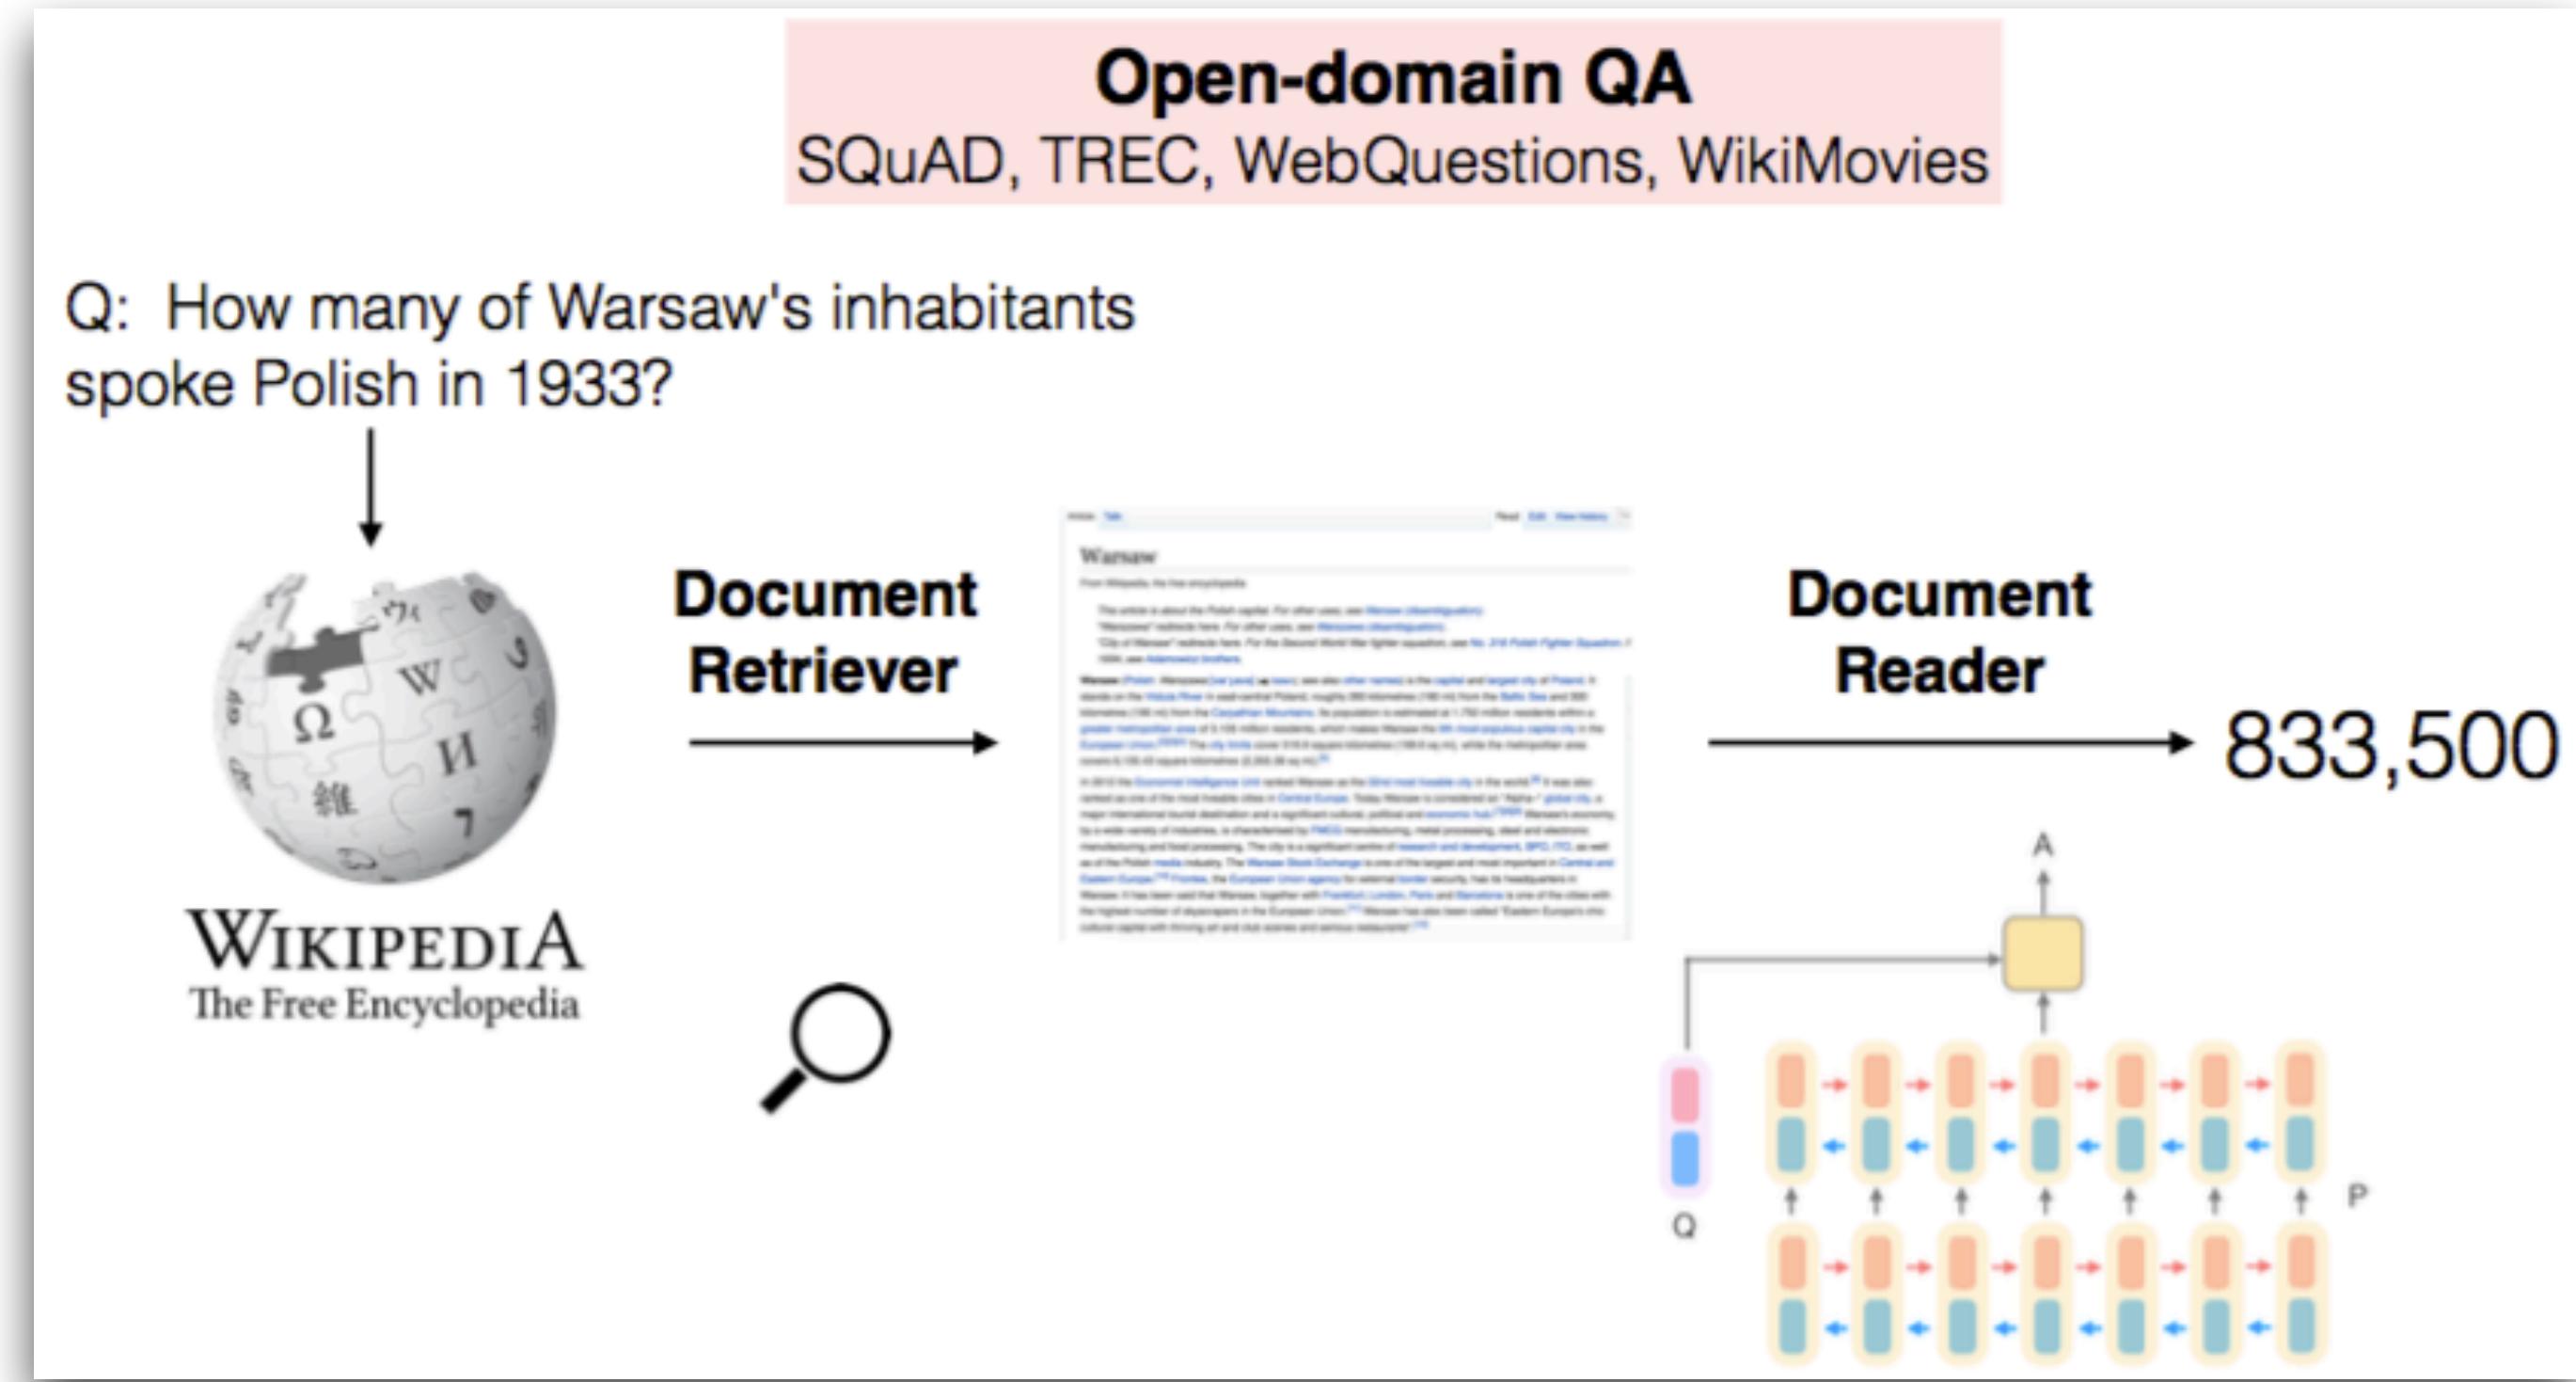

- Open-Domain MRC
 - Reading Wikipedia to Answer Open-Domain Questions (Chen et al., ACL2017)
- More complex MRC datasets
 - RACE (Lai et al., EMNLP2017), MS MARCO (Nguyen et al., 2016), NewsQA (Trischeler et al., 2017), TriviaQA (Joshi et al., ACL2017)
- SemEval 2018 Task11 & Task12
 - Trying to use knowledge base or common sense

OPEN-DOMAIN MRC

- Reading Wikipedia to Answer Open-Domain Questions (Chen et al., ACL2017)
 - Open-Domain MRC = Document Retriever + MRC

DATASET COMPARISON

- Comparisons on recent MRC datasets

Dataset	Size (# Query)	Question Source	Answer Type	Difficulty
SQuAD	~100K	Crowd-sourced	Passage span	Medium
RACE	~97K	Exams in China	Choice Selection (from A/B/C/D)	High
MS MARCO	~100K	User logs	Human generated	High
NewsQA	~120K	Crowd-sourced	Passage span	Relatively High
TriviaQA	~650K (~95K unique)	Auto-gathered / Human-annotated	Passage span	Relatively High

RACE

- RACE: Large-scale ReADING Comprehension Dataset From Examinations (Lai et al., EMNLP2017)
- Features
 - Needs more comprehensive understanding of context
 - Answer is no longer a span in document
 - Misleading choices among candidates
 - SOTA model in SQuAD failed to give excellent performance (70%+ → 40%)

Passage:

Is it important to have breakfast every day? A short time ago, a test was given in the United States. People of different ages, from 12 to 83, were asked to have a test. During the test, these people were given all kinds of breakfast, and sometimes they got no breakfast at all. Scientists wanted to see how well their bodies worked after eating different kinds of breakfast.

The results show that if a person eats a right breakfast, he or she will work better than if he or she has no breakfast. If a student has fruit, eggs, bread and milk before going to school, he or she will learn more quickly and listen more carefully in class. Some people think it will help you lose weight if you have no breakfast. But the result is opposite to what they think. This is because people become so hungry at noon that they eat too much for lunch. They will gain weight instead of losing it.

Question: What do the results show?

- A) They show that breakfast has affected on work and studies.
- B) The results show that breakfast has little to do with a person's work.
- C) The results show that a person will work better if he only has fruit and milk.
- D) They show that girl students should have less for breakfast.

SEMEVAL 2018 TASK 11&12

- SemEval 2018 Task 11: Machine Comprehension using Common Sense
- SemEval 2018 Task 12: Argument Reasoning Comprehension Task
- What's new
 - Trying to use common sense to solve MRC
 - Discriminate different choice according to the context

SemEval-2018 Task 11: Machine Comprehension using Commonsense Knowledge
Organized by simono - Current server time: Nov. 12, 2017, 12:10 p.m. UTC

▶ Current Next
Post-Evaluation Phase Evaluation Phase
Jan. 30, 2018, midnight UTC Jan. 8, 2018, midnight UTC

SemEval-2018 Task 12 - The Argument Reasoning Comprehension Task
Organized by ivan.habernal - Current server time: Nov. 12, 2017, 12:10 p.m. UTC

▶ Current Next
Trial (evaluation on dev data) Test (evaluation on test data)
June 1, 2017, midnight UTC Jan. 8, 2018, midnight UTC

- MRC Trends
- Automatically generated data → Human-annotated data
- Single document → Multiple documents
- Single sentence inference → Multiple sentences inference
- Answer retrieval → Summarization/Reasoning/Inference
- Model aspects: all in one is not all we need

OUTLINE

- Introduction to Machine Reading Comprehension (MRC)
- (Almost) Recent Progress of MRC
 - Cloze-style MRC
 - Span Extraction MRC
- Future Prospects
- Conclusion

CONCLUSION

- Current MRC \approx More Complex QA
- Does current MRC do reasoning?
 - Maybe not, but not totally
- Machine Reading Comprehension is a long-term studies that requires continuous efforts
- “All roads lead to Rome”——In the DL era, every model deserves a chance to win the game (if you use it in correct way and keep trial-and -error process)
